## Code No: P18CET14

HALL TICKET NUMBER

## PACE INSTITUTE OF TECHNOLOGY \& SCIENCES::ONGOLE (AUTONOMOUS)

## III B.TECH I SEMESTER END REGULAR EXAMINATIONS, JAN/FEB - 2022 WATER RESOURCE ENGINEERING-II <br> (CE Branch)

Time: 3 hours
Max. Marks: 60
Note: Question Paper consists of Two parts (Part-A and Part-B)
PART-A
Answer all the questions in Part-A ( $5 \mathrm{X} 2=10 \mathrm{M}$ )

| Q.No. |  | Questions | Marks | CO |
| :---: | :---: | :--- | :---: | :---: |
| KL |  |  |  |  |
| 1. | a) | Differentiate between non-erodible canals and erodible canals | $[2 \mathrm{M}]$ | 1 |
|  | b) | Explain the purpose of canal outlet and canal fall | $[2 \mathrm{M}]$ | 2 |
|  | c) | Explain Khosla's theory of independent variable | $[2 \mathrm{M}]$ | 3 |
|  | d) | Differentiate clearly between 'flood control reservoir' and 'multipurpose <br> reservoir'? | $[2 \mathrm{M}]$ | 4 |
|  | e) | Write two functions of horizontal filter of earthen dams | 2 |  |

PART-B
Answer One Question from each UNIT (5X10=50M)

| Q.No. |  | Questions | Marks | CO | KL |
| :---: | :---: | :---: | :---: | :---: | :---: |
| UNIT-I |  |  |  |  |  |
| 2. | a) | What do you understand by balancing depth? Derive an expression for the same | [5M] | 1 | 4 |
|  | b) | Why is Lacey's conception superior to that of Kennedy's? | [5M] | 1 | 3 |
| OR |  |  |  |  |  |
| 3. |  | Explain the causes and effects of flooding suggest corrective measures to avoid flooding situation | [10M] | 1 | 3 |
| UNIT-II4 |  |  |  |  |  |
| 4. |  | Describe with the help of neat sketches various types of cross-drainage works | [10M] | 2 | 3 |
| OR |  |  |  |  |  |
| 5. |  | What are various types of canal falls explain each one in detail along with neat sketches? | [10M] | 2 | 3 |
| UNIT-III |  |  |  |  |  |
| 6. |  | Figure shows the section of a hydraulic structure founded on sand. Calculate the average hydraulic gradient. Also, find the uplift pressures at point 6 and 16 m from the $u / \mathrm{s}$ end of the floor and find the thickness of the floor at those points. | [10M] | 3 | 5 |

OR

| OR |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 7. |  | Draw a diversion head work and label its components and explain about the silt regulation works | [10M] | 3 | 3 |
| UNIT-IV |  |  |  |  |  |
| 8. | a) | Explain the following with neat sketches <br> i).Surcharge storage ii).Valley storage iii). Safe yield iv) Secondary Yield | [5M] | 4 | 3 |
|  | b) | Describe in brief various investigations required for reservoir planning | [5M] | 4 | 3 |
| OR |  |  |  |  |  |
| 9. |  | The following particulars refer to a concrete dam: <br> RL of top of dam $=250.00$ <br> Free board $\quad=3.0 \mathrm{~m}$ <br> $\mathrm{U} / \mathrm{s}$ face is vertical <br> $\mathrm{D} / \mathrm{s}$ face is sloping at 0.7:1 from RL 240.00 <br> RL of base of the dam $=210.00$ <br> Determine the stability of the dam and the stresses induced when the reservoir is full. Take the unit weight of concrete as $24 \mathrm{kN} / \mathrm{m} 3, \mu=$ 0.70 , safe compressive stress $=2 \mathrm{MPa}$, safe bearing capacity $=1.5 \mathrm{MPa}$. Consider only self weight, water pressure and full uplift pressure. | [10M] | 4 | 5 |
| UNIT-V |  |  |  |  |  |
| 10. |  | Discuss various causes of failure of earth dams with neat sketches | [10M] | 5 | 3 |
| OR |  |  |  |  |  |
| 11. | a) | Enumerate the different types of spillways and draw neat sketches showing each type. | [6M] | 5 | 3 |
|  | b) | Estimate the discharge over an ogee spillway with coefficient of discharge is 2.2 and head is 4.2 m . The effective length of spillway is $120 . \mathrm{m}$. The weir crest is 8 m above the bottom of approach and consider velocity of approach. | [4M] | 5 | 4 |
