Future Readiness

INDUSTRY 4.0/COMPETENCY 5.0

CURRICULUM (C 26)

DIPLOMA IN COMPUTER SCIENCE AND ENGINEERING

**For Polytechnic Diploma courses in Andhra Pradesh
Transforming learners into future Technologists**

**GOVERNMENT OF ANDHRA PRADESH
STATE BOARD OF TECHNICAL EDUCATION AND TRAINING
ANDHRA PRADESH: AMARAVATI**

3 YEAR DIPLOMA IN COMPUTER SCIENCE AND ENGINEERING

CURRICULUM -2026 (C-26)

STATE BOARD OF TECHNICAL EDUCATION AND TRAINING
ANDHRA PRADESH: : AMARAVATI

1. PREAMBLE

The world is evolving rapidly, and education must evolve with it. In today's dynamic environment, our approach to learning must equip students not only with knowledge but also with the practical experience in innovation, critical thinking ability and problem-solving mindset required to excel in both academic and professional spheres.

At the heart of the new curriculum, lies the belief that education should be student-centric, fostering curiosity, creativity and a lifelong passion for learning. The State Board of Technical Education and Training (SBTET), Andhra Pradesh aims to create a safe, supportive, and inclusive learning environment where every student is encouraged to reach their fullest potential. This curriculum is designed to provide a strong foundation for lifelong growth and employability, ensuring that learners graduate not only with a diploma but also with the competence and confidence to thrive in a rapidly changing world.

The SBTET, A.P. has consistently strived to meet the aspirations of all stakeholders i.e., students, parents, industries, academia and society at large by keeping its diploma programmes relevant to emerging technologies and industrial advancements. To this end, SBTET, A.P. has regularly reviewed and updated its curricula through a systematic, evidence-based and consultative process.

Building on the success of earlier curriculum and responding to the demands of new-age technologies, SBTET, A.P. resolved to update the Polytechnic C-23 curriculum and introduce the new curriculum (C-26), aligning it with global technological trends, skill-development goals, and industry expectations. The revision process was initiated in November 2024, with comprehensive feedback collected from all stakeholders i.e., students, parents, industry experts, academia, alumni, faculty, heads of sections and principals across the state.

A pivotal meeting was convened under the chairmanship of Sri. Gummala Ganesh Kumar, I.A.S., Director of Technical Education & Chairman, SBTET, A.P. to discuss the revamping of the curriculum with an emphasis on industry relevance,

academic flexibility, skill orientation and employability.

Further, Sri. Gummala Ganesh Kumar, I.A.S., reiterated the importance of industrial exposure, project-based learning, and practical training in bridging the gap between classroom learning and industry requirements. He highlighted the need to make the curriculum more innovative, flexible, and technology-driven to prepare students for emerging fields such as Artificial Intelligence (AI), Machine Learning (ML), Quantum Computing, Internet of Things (IoT), Drone Technology, and Industry 4.0.

To ensure a holistic and futuristic approach, two regional workshops were conducted with industry experts, academic experts from higher-level institutes and subject experts at Tirupati and Visakhapatnam. The Programme-wise expert committees comprising members from industry, higher-education institutions and polytechnic faculty were constituted. In the subsequent workshops conducted, these committees explored strategies to integrate the following key components into the curriculum, with the objective of enhancing employability and industry readiness:

- Internet of Things (IoT) for all programmes
- A balanced ratio of theory and practical components
- Emerging technologies such as Artificial Intelligence (AI), Machine Learning (ML), Quantum Computing, and Drone Technology
- Industry 4.0 and 5G Technologies
- Introduction of elective courses to provide flexibility and promote specialization in emerging domains
- Inclusion of audit courses to encourage innovative and holistic development, ethics, environmental awareness, entrepreneurship and lifelong learning beyond the core curriculum
- Adoption of Practicum-based Learning, wherein certain courses are designed to be taught through hands-on, activity-oriented, and experiential methods instead of the conventional lecture mode, enabling students to apply concepts directly through practice and experimentation

A series of workshops, consultations, and validation meetings with subject

experts, industrialists, and academicians were conducted to comprehensively review and refine the draft curriculum. The final version was further vetted by industry professionals and academicians from reputed higher-education institutions to ensure academic rigor, practical relevance, and alignment with current and emerging industry needs.

The Curriculum 2026 (C-26) has been developed through the active participation of polytechnic faculty, industry representatives, and expert committees, following an Outcome-Based Education (OBE) framework in accordance with NBA guidelines.

This new curriculum reflects the collective vision of educators, industry experts, and policymakers to develop competent, innovative, ethical and highly employable diploma graduates. It equips learners with the skills, attitudes and mindset needed to embrace future challenges driven by AI, Quantum Computing, IoT, Industry 4.0, 5G and sustainable technologies.

The C-26 Curriculum has been approved by the Board Members, SBTET, Andhra Pradesh, for implementation from the academic year 2026-27.

2. KEY FEATURES OF THE CURRICULUM C-26

1. Curriculum is practice-intensive which is very much needed for industry integration. NPTEL/NASSCOM/Coursera certifications are also accepted.
2. Emerging technologies like Quantum computing, AIML, IOT, Cyber security, Android programming and Cloud computing is also included.
3. Employability focus, Dedicated communication and employability skills course is included. Improvement of soft skills like presentation, body language and professional etiquette is also included.
4. Updated subjects and topics relevant to industry are introduced in all courses at appropriate stages.
5. The number of theory subjects in each semester is limited to four (including electives) by restructuring related topics and removing repeated or higher-level content. Relevant laboratories are also reorganized to create space for new laboratories.
6. In the C-26 scheme, elective subjects are introduced in all semesters except the First Year. Students are given the choice to select one subject from two elective options.
7. In every semester, one audit subject is introduced which carries no credits and no weightage. The main aim is to provide stress-free education and a student-friendly learning environment.
8. A new concept called the “Practicum Subject” is introduced in every semester. It requires faculty to teach theory along with demonstrations of relevant parts, devices, or equipment. The objective is to help students understand concepts more clearly through direct visualization and to ensure industry readiness by linking classroom teaching with real-world applications.
9. The ratio of theory to practical content is maintained 50:50, with a greater focus on strengthening practical skills in laboratories and workshops.

3. ACKNOWLEDGEMENTS

The members of the working group sincerely thank Sri Gummala Ganesh Kumar, I.A.S., Director of Technical Education and Chairman of SBTET, Andhra Pradesh, and Sri Kona Sasidhar, I.A.S., Principal Secretary, Skills Development and Training Department, for their valuable guidance and support during the revision of the C-23 Curriculum and the development of the new C-26 Curriculum.

We are also thankful to SBTET, Andhra Pradesh, Mangalagiri, for organizing a series of workshops at different stages. These workshops brought together teachers from polytechnics, experts from reputed national Institutes, universities, engineering colleges and professionals from industry. Their discussions and feedback helped to review the C-23 Curriculum and design the improved C-26 Curriculum.

We express our gratitude to Sri G.V.V. Satyanarayana Murty, Secretary, SBTET, Andhra Pradesh, Sri V. Padma Rao, Joint Director of Technical Education, Sri A. Ravi Kumar, Joint Secretary (Academic), SBTET, Andhra Pradesh and all officers from the Directorate of Technical Education and State Board of Technical Education and Training, Andhra Pradesh, for their encouragement and continuous support.

Finally, we sincerely thank all faculty members from various polytechnics across the state who contributed to this endeavour. Their ideas, teamwork, and commitment played a key role in shaping the C-26 Curriculum successfully.

4. RULES AND REGULATIONS

4.1 Duration and Pattern of Diploma Programmes

All Diploma Programmes approved by AICTE are of three years duration.

- The first year follows a yearly system.
- The remaining period (two years) follows a semester system.
- A run-through system is followed for all Diploma Programmes, as per eligibility rules.

4.2 Procedure for Admission into the Diploma Programmes:

Selection of candidates is governed by the rules and regulations laid down in this regard

from time to time.

- a. Candidates who wish to seek admission into any of the Diploma Programmes will have to appear for the Common Entrance Test for admissions into polytechnics (POLYCET) conducted by the State Board of Technical Education and Training, Andhra Pradesh, Mangalagiri. Only the candidates satisfying the following requirements will be eligible to appear for the Common Entrance Test for admissions into polytechnics (POLYCET).

The candidates seeking admission should have passed/appeared for S.S.C. examination, conducted by the Board of Secondary Education, Andhra Pradesh, or equivalent examination thereto, by the time of applying for the Common Entrance Test for admission into polytechnics (POLYCET). In case of candidates whose results of their qualifying examinations are pending, their selection shall be subject to production of proof of their passing the qualifying examination in one attempt or compartmentally at the time of admission.

- b. Admissions are made based on the merit obtained in the Common Entrance Test (POLYCET) and the reservation rules stipulated by the Government of Andhra Pradesh from time to time.
- c. For admission into Diploma in Pharmacy programme for which entry qualification is 10+2 (MPC/BiPC), candidates need not appear for POLYCET. A separate notification will be issued for admission into this Programme.

4.3 Medium of Instruction

The medium of instruction and examination for all Diploma programmes shall be English

4.4 Permanent Identification Number (PIN)

Every student is given a Permanent Identification Number (PIN) at the time of admission.

This number is used to record and maintain the student's academic and examination details throughout the Diploma along with APAAR ID.

4.5 Number of Working Days per Semester/Year:

- a) The academic year for all the programmes shall be in accordance with the academic calendar.
- b) The working days in a week shall be from Monday to Saturday.
- c) There shall be 7 periods of 50 minutes duration each on all working days.
- d) The minimum number of working days for each semester/year shall be 90/180 days excluding examination days. If the prescribed minimum is not achieved due to any reason, special arrangements shall be made to conduct classes and complete the syllabus.
- e) The timings of the institutions shall be preferably from 9:30 a.m. to 4:30 p.m.

4.6 Eligibility (Attendance to appear for the Summative Assessment)

- a) A candidate shall be permitted to appear for the Summative Assessment in all programmes, if he or she has attended a minimum of 75% of working days during the year/semester.
- b) Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each semester or first year may be granted on medical grounds.
- c) A stipulated fee shall be payable towards condonation for shortage of attendance.
- d) Candidates having less than 65% attendance shall be detained.
- e) Students whose shortage of attendance is not condoned in any semester / year

and who have not paid the condonation fee in time are not eligible to take the Summative Assessment of that semester/year and they will be detained. They may seek readmission for that semester/year (when offered) in the next subsequent academic semester/year.

- f) For Industrial Training:
 - i) During Industrial Training, the candidate shall put in a minimum of 90% attendance.
 - ii) If the student fails to secure 90% attendance during industrial training, the student shall reappear for industrial training at his own expense.

4.7 Readmission Rules

Readmission shall be granted to eligible candidates by the respective Principal/Regional Joint Director/Director of Technical Education.

- a) (i) Within 15 days after commencement of class work in any semester.
(ii) For Industrial Training: before commencement of the Industrial Training.
- b) Within 30 days after commencement of class work in any year (including D. Pharmacy Programme or first year course work in Engineering and Non-Engineering Diploma streams). Otherwise, such cases shall not be considered for readmission for that year and they are advised to seek readmission in the next eligible academic year.
- c) The percentage of attendance of the readmitted candidates shall be calculated from the first day of beginning of the regular class work for that year/semester, as officially announced by CTE but not from the day on which he/she has actually reported to the class work.
- d) A candidate detained in any year or semester shall be allowed readmission to the same year/semester only in the subsequent academic year. This provision shall equally apply to the industrial training also.

4.8 Scheme of Evaluation

- a) First Year:

Theory Courses: 70 marks for the Summative Assessment (3 hours) + 30 marks for Formative Assessment.

Laboratory/Drawing Courses: 60 or 30 marks for the Summative

Assessment (3 hours) + 40 or 20 marks for Formative Assessment as per the allocated marks to that course.

b) III to V Semesters:

Theory Courses: 70 marks for the Summative Assessment (3 hours) + 30 marks for

Formative Assessment.

Laboratory/Drawing Courses: 60 or 30 marks for the Summative Assessment + 40 or 20 formative assessment as per the allocated marks to the course.

4.9 Formative Assessment Scheme:

Formative Assessment shall be conducted for awarding marks on the dates specified and it consists of two components namely, Assessment through Unit Tests and Continuous Internal Assessment (CIA).

Total Formative Assessment Marks (30) = Unit Test (20) + CIA (10)

a) Theory Courses:

Three-unit tests shall be conducted for I year and two Unit Tests for semesters. Unit test shall be of 90 minutes duration and for a maximum of 40 marks for each test.

S. No.	Type of Assessment	Weightage Assigned	Remarks
	Formative Assessment (30 Marks)		
1	Formative Assessment through Unit Tests (UT): 20 Marks		
	Testing of knowledge through Unit Tests for Year - UT1+UT2+UT3 for Semester - UT1 + UT2	20	Each Unit test shall be conducted for 40 marks and scaled down to 20. Average of all the unit tests will be taken as Unit Test marks
2	Formative Assessment through Continuous Internal Assessment (CIA) :10 Marks		
	1. Assignments	05*	All activities shall be recorded. Relevant records are to be filed and secured for further scrutiny of higher authorities
	2. Dynamic Learning Activities: Project Work/ Seminar /Group Discussion, Quizzes	05**	

	etc.		
	TOTAL	30	

**At least one assignment should be completed for each unit which carries 10 marks. The total assignment marks should be scaled down to 5.*

***At least one dynamic learning activity is to be conducted which carries 10 marks. The total marks should be scaled down to 5.*

b) Practical Courses:

Award of marks for Formative Assessment shall be as follows:

i) Drawing Courses:

Distribution of Marks for the Formative Assessment			
First Year (Total: 40 Marks)		Semesters (Total: 40 Marks)	
Max: 20 Marks	Max: 20 Marks	Max: 20 Marks	Max: 20 Marks
From the average of THREE Unit Tests.	From the average of Assessments of Regular Class work Exercises.	From the average of TWO Unit Tests.	From the average of Assessment of Regular Class work Exercises.

- Each Unit Test will be conducted for a duration of 120 minutes with maximum marks of 40 and scaled down to 20 Marks.

ii) Laboratory Courses:

a) Student's performance in Laboratories / Workshop shall be assessed during the year/ semester of study for 40 marks in each Laboratory Course. The procedure for evaluation for Laboratory Courses, other than Drawing courses:

- i. Formative Assessment for Laboratory Course shall be done on the basis of tasks performed by the student in the laboratory.
- ii. Question paper for Formative Assessment shall be task-based and shall be designed to assess practical skills, procedures, and application of concepts.

b) Formative Assessment in Laboratory courses shall be done during the course of study and marks shall be awarded by the concerned teacher.

Formative Assessment for laboratory courses can be done for 40 marks

Sl. No.	Type of Assessment	Weightage Assigned	Remarks
	Formative Assessment: 40 Marks		
1	Formative Assessment through Unit Tests (UT): 20 Marks		
	Practical & Theory	20	Each Unit test shall be

	evaluation: Testing of knowledge through Unit Tests for Year - UT1+UT2+UT3 for Semester - UT1 + UT2		conducted for 20 Marks. Average of all the Tests will be taken as Unit Test marks
2	Formative Assessment through Continuous Internal Assessment (CIA) :20 Marks		
	Experiment wise observations, individual laboratory performance	20	
	T O T A L		40

c) For laboratory examinations, there shall be two examiners. External examiner shall be appointed by the Principal in consultation with respective Head of the Section, preferably choosing a qualified person from the list given below in order of preference. Appointment order copy shall be filed and secured.

i) Near by Industries.

ii) Govt./Semi Govt organizations like R & B, PWD, PR, Railways, BSNL, APSRTC, APSEB etc.

iii) Govt./ University Engineering Colleges.

iv) Senior Faculty from nearby Polytechnics.

Internal examiner shall be the person concerned with Formative Assessment as mentioned in (b) above. The Summative Assessment shall be held along with all theory papers in respect of drawing courses.

In case of drawing course earmarked as Practicum (practical course) the Summative Assessment shall be held along with practical papers.

d) Question Paper for Practical Examination: Question paper should cover the experiments / exercise prescribed to test various skills like handling, manipulating, testing, troubleshooting, repair, assembling and dismantling etc. from more than one experiment / exercise

e) Records pertaining to Formative Assessment marks of both theory and practical Courses are to be maintained for official inspection. All the evaluation formats/proformas shall be maintained as per the instructions issued by SBTET, A.P. from time to time

iii) Practicum Theory Courses:

Assessment for Practicum theory courses can be done for 30 marks

Sl. No.	Type of Assessment	Weightage Assigned	Remarks
	Formative Assessment (30 Marks)		
1	Formative Assessment through Unit Tests (UT): 20 Marks		
	Theory & Practical evaluation: Testing of knowledge through Unit Tests for Year - UT1+UT2+UT3 for Semester - UT1 + UT2	20	Each Test shall be conducted for 40 Marks (Theory:30 Marks Practical:10 Marks) and scaled down to 20. Average of all the Tests will be taken as Unit Test marks
2	Formative Assessment through Continuous Internal Assessment (CIA) :10 Marks		
	a) Assignments	05*	All activities shall be recorded. Relevant records are to be filed and secured for further scrutiny of higher authorities
	b) Dynamic Learning Activities: Project Work/ Seminar/Group Discussion, Quizzes etc.	05**	
	TOTAL		30

**At least one assignment should be completed for each unit which carries 10 marks. The total assignment marks should be scaled down to 5.*

***At least one dynamic learning activity is to be conducted which carries 10 marks. The total marks should be scaled down to 5.*

iv) Practicum Practical Courses:

Assessment for Practicum practical courses can be done for 40 marks

Sl. No.	Type of Assessment	Weightage Assigned	Remarks
	Formative Assessment: 40 Marks		
1	Formative Assessment through Unit Tests (UT): 20 Marks		
	Practical & Theory evaluation: Testing of knowledge through Unit Tests for Year - UT1+UT2+UT3 for Semester - UT1 + UT2	20	Each Test shall be conducted for 40 marks (Theory:10marks Practical:30marks) and scaled down to 20. Average of all the Tests will be taken as Unit Test marks.
2	Formative Assessment through Continuous Internal Assessment (CIA) :10 Marks		
	Experiment wise observations, individual laboratory performance	20	
	TOTAL		40

v) Activity Periods:

1.	a) Library	All activities shall be duly recorded & the relevant documents shall be filed and securely maintained for scrutiny by higher authorities. 0.5 or 1 Credits shall be awarded to the successful candidates for each semester/year accordingly.
	b) IPSGM/Sports & Games	
	c) Extra-curricular activities (NSS / NCC/ Clean & Green of Campus etc.)	

vi) Industrial Training:

In case of Industrial Training, SOP will be circulated by SBTET, A.P from time to time. The Formative Assessment and Summative Assessment shall be done as illustrated in the following table:

Assessment No	Upon completion of	Conducted by	Based on	Max Marks
Pre-Assessment	15 days to 30 days from the commencement of training	Mentor faculty member visits the industry 15 days to 30 days from the commencement of training and will submit a detailed report to the principal outlining each candidate's details and observed work culture		
1 (Formative Assessment)	Mid Semester Assessment after three months (at industry)	1.The mentor faculty member concerned 2. Industry Training In charge	Learning outcomes as given in the scheme of assessment, for Industrial Training	120
2 (Formative Assessment)	Last month of training (at industry)	1. The mentor faculty member concerned 2. Industry Training In charge	Learning outcomes as given in the scheme of assessment, for Industrial Training	120

3 (Summative Assessment)	After completion of the training (at Institution)	1.The faculty member concerned, 2.HoS concerned 3.An external examiner from Industry	1.Demonstration of any one of the skills listed in learning outcomes	30
			2.Training Report	20
			3. Viva Voce	10
TOTAL				300

Each staff member shall be assigned a batch of students 10 to 15 as a mentor faculty for making assessment during industrial training.

vii) Project Work:

The guidelines to be followed for Project work are as follows:

- ✓ The Project Title and Abstract must be approved by a committee comprising the Principal, Head of the Section (HoS) and the concerned faculty members
- ✓ Students should be encouraged to undertake project work with the potential for publication in academic and professional journals

The Formative Assessment consisting of 40% of the total marks shall be distributed as follows:

Assessment	To be conducted at	Marks (Evaluated for)
Review-1	After the completion of 4 weeks from the start of the semester	10
Review-2	After the completion of 10 weeks from the start of the semester	15
Review-3	After the completion of 14 weeks from the start of the semester	15

The Summative Assessment consisting of 60% of the total marks shall be distributed as follows:

Assessment	To be conducted	Conducted by	Based on	Max Marks
Summative	After completion of the Project work	1.Project Guide 2.HoS concerned 3.An external examiner	1.Demonstration of skill relevant to the Project	30
			2. Project Report	20

			3. Viva Voce	10
TOTAL				60

4.10 Minimum Pass Marks

a) Theory Courses:

To pass a theory course, a candidate must secure a minimum of 35% in the Summative Assessment (i.e., Min 25 Marks) and a combined minimum of 35% from both the Formative and Summative Assessment marks put together.

b) Practical Courses:

For passing a practical Course, a candidate has to secure a minimum of 50% in Summative Assessment and a combined minimum of 50% of both Formative and Summative Assessment marks put together. In case of D.C.C.P., the pass mark for Typewriting and Shorthand is 45% in the Summative Assessment. There are no marks for formative assessment in case of Typewriting and Shorthand courses in D.C.C.P programme.

c) Industrial Training:

The Industrial training shall carry 300 marks and pass marks is 50% in each assessment at industry (Mid semester Assessment and second assessment) i.e 120 marks out of 240 and in final summative assessment 30 marks out of 60 marks at institution level put together i.e. 150 marks out of 300 marks.

d)The courses successfully completed shall be awarded the allotted credits and the corresponding grade shall be assigned based on the percentage of marks secured.

4.11 Provision for Improvement

Improvement is allowed only after he / she has completed all the courses from First Year to Final semester of the Diploma.

a) Improvement is allowed in any 4 (Four) courses of the Diploma Programme.

b) The student can avail the improvement chance only once and it must be taken within the two examinations immediately following the completion of their Diploma. However, the duration including Improvement examination shall not exceed FIVE years from the year of first admission.

c) No improvement is allowed in Practical / Lab Courses or Project work or Industrial Training assessment. However, improvement in drawing

Course(s) is allowed.

- d) If improvement is not achieved, the marks obtained in the previous Examinations hold good.
- e) Improvement is not allowed in respect of the candidates who are punished under Mal-Practice in any examination.
- f) Examination fee for improvement shall be paid as per the notification issued by State Board of Technical Education and Training from time to time.
- g) All the candidates who wish to appear for improvement of performance shall deposit the original Marks Memos of all the years / Semesters including Consolidated Marks Memo(CMM) and also original Diploma Certificate to the Board. If there is improvement in performance of the current examination, the revised Memorandum of marks including CMM and Original Diploma Certificate will be issued, else the submitted originals will be returned.

4.12 Rules of Promotion:

- i. A candidate shall be permitted to appear for first year examination provided he / she has 75% attendance (which can be condoned on medical grounds up to 10%) i.e. attendance after condonation on medical grounds should not be less than 65% and has to pay the examination fee.
- ii. A candidate shall be promoted to 3rd semester if he/she puts in the required percentage of attendance in the first year and pays the examination fee. A candidate who could not pay the first-year examination fee has to pay the promotion fee as prescribed by State Board of Technical Education and Training, AP from time to time before commencement of 3rd semester.
- iii. A candidate shall be promoted to 4th semester provided he/she puts the required percentage of attendance in the 3rd semester and paid the examination fee. A candidate, who could not pay the 3rd semester exam fee, has to pay the promotion fee as prescribed by State Board of Technical Education and Training AP from time to time before commencement of 4th semester. A candidate is eligible to appear for the 4th semester examination if he/she puts the required percentage of attendance in the 4th semester and pays the examination fee.

- iv A candidate shall be promoted to 5th semester provided he / she puts the required percentage of attendance in the 4th semester and pays the examination fee. A candidate, who could not pay the 4th semester examination fee, has to pay the promotion fee as prescribed by State Board of Technical Education and Training from time to time before commencement of 5th semester. A candidate is eligible to appear for the 5th semester examination if he/she puts the required percentage of attendance in the 5th semester and pays the examination fee.
- v A candidate shall be sent to Industrial Training/6th semester provided he/she puts in the required percentage of attendance in the 5th semester and pays the examination fee / promotion fee as prescribed by SBTET. A candidate is eligible to appear for Industrial Training assessment (Seminar/Viva-Voce) only if he/ she puts the required percentage of attendance, i.e., 90% in the 6th semester Industrial Training and pays the examination fee.
- vi Industrial Training shall be treated as the 6th semester, irrespective of whether the training is undertaken during the 5th or 6th semester.

For IVC & ITI Lateral Entry students:

- i) A candidate shall be permitted to appear for Third semester examination provided he/she puts in 75% attendance (which can be condoned on medical grounds up to 10%) and pays the examination fee for third semester.
- ii) A candidate shall be promoted to 4th semester provided he/she puts the required percentage of attendance in the 3rd semester and pays the examination fee. A candidate who could not pay the 3rd semester exam fee, has to pay the promotion fee as prescribed by SBTET, A.P from time to time before commencement of 4th semester. A candidate is eligible to appear for the 4th semester examination if he/she puts the required percentage of attendance in the 4th semester and pays the examination fee.
- iii) A candidate shall be promoted to 5th semester provided he / she put the required percentage of attendance in the 4th semester and pays the examination fee. A candidate, who could not pay the 4th semester examination fee, has to pay the promotion fee as prescribed by State Board of Technical Education and Training from time to time before commencement of 5th semester. A candidate is eligible to appear for the 5th

semester examination if he/she puts the required percentage of attendance in the 5th semester and pays the examination fee.

- iv) A candidate shall be sent to Industrial Training/VI semester provided he/she puts in the required percentage of attendance in the 5th semester and pays the examination fee /promotion fee as prescribed by SBTET. A candidate is eligible to appear for Industrial Training assessment (Seminar/Viva-Voce) only if he / she puts the required percentage of attendance, i.e., 90% in the 6th semester Industrial Training and pays the examination fee.

4.13 Student Performance Evaluation

Successful candidates shall be awarded the Diploma under the following CGPA.

CGPA secured	Division
CGPA \geq 7.5	First Class with Distinction (who completed Diploma within 3 years)
7.5 > CGPA \geq 6	First Class
CGPA < 6	Second Class

Note: Candidate should acquire 120 credits to award diploma.

Awarding Grade and Grade Points

Students will be awarded Grades and Grade Points considering their Percentage of Marks Evaluated in each Theory and Practical Courses and the Conversion of Percentage of Marks obtained in the Examinations to the Grade Points and Awarding Grades for Every Course is tabulated as shown below:

For Theory Courses		
Percentage of Marks	Grade Points, GP (10)	Grade Awarded
Above 90	10	A+
From 81 to 90	09	A
From 71 to 80	08	B+
From 61 to 70	07	B
From 51 to 60	06	C+
From 41 to 50	05	C
From 35 to 40	04	D
Below 35	0	F (FAIL)

For Practical Courses		
Percentage of Marks	Grade Points, GP (10)	Grade Awarded
Above 90	10	A+
From 81 to 90	09	A
From 71 to 80	08	B+
From 61 to 70	07	B
From 51 to 60	06	C+
Equal to 50	05	C
Below 50	0	F (FAIL)

The merit level of a student would be indicated by

1. "Semester Grade Point Average (SGPA) " for the Year or for a Semester.
2. "Cumulative Grade Point Average (CGPA)" for awarding Diploma.

Conversion Formula, EP = Equivalent Percentage = [CGPA Obtained] x 10

4.14 Examination Fee Schedule

Examination fees are as per the notifications issued by the State Board of Technical Education and Training (SBTET), Andhra Pradesh, from time to time.

4.15 Structure of Examination Question Paper

I. Formative Assessment:

a) Theory Courses

For First Year: Three Unit Tests.

For semesters: Two Unit Tests.

Each test shall be of 90 minutes duration, carrying a maximum of 40 marks and will consist of Part A and Part B

Part A (16 Marks):

1. Objective Type Questions:

Multiple Choice Questions / True or False / Fill in the Blanks-

4 × 1 marks = 4 marks

2. Short Answer Questions:

Four questions - 4 × 3 marks = 12 marks

Part B (24 Marks):

Essay-Type Questions: (Attempt any 3 out of 4)

3 × 8 marks = 24 marks

Total Marks: 4 + 12 + 24 = 40 marks

Computation of Marks

First Year: Average of 3 tests

Semester System: Average of 2 tests

The marks obtained out of 40 shall be scaled down to 20 and treated as the Unit

Test marks for each course.

b) Drawing Courses (both Conventional/Hybrid) :

First Year:

Three-unit tests shall be conducted for 40 marks. The duration of each test is 120 minutes

The question paper pattern is as follows:

Part A: Answer all 4 question, 4 X 5M =20M.

Part B: Answer any 2 questions out of 4, 2 X 10M =20M.

Semesters:

Two-unit tests shall be conducted for 40 marks. The duration of each test is 120 minutes

The question paper pattern is as follows:

Part A: Answer all 4 questions, 4 X 5M =20M.

Part B: Answer one question out of two 1 X 20M =20M.

The marks obtained for 40 shall be scaled down to 20 marks and the average of 3tests/2tests shall be taken as final Unit test marks for the course. Remaining 20 marks are given by the teacher based on the performance of the student during regular class work of that course.

c) Laboratory/Workshops:

Fifty percent of the total marks shall be allotted to continuous assessment in labs/workshops and the remaining fifty percent shall be derived from two tests

d) Assessment of Practicum Courses:

i) Practicum Theory Course (out of 30 Marks)

Theory and Practical Assessment: 20 Marks

Continuous Internal Assessment: 10 Marks

Total Marks for the course = 20+10= 30 Marks

ii) Practicum Practical Course (out of 40 Marks)

Practical & Theory Assessment: 20 Marks

Continuous Internal Assessment: 20 Marks

Total Marks for the course = 20+20 = 40 Marks

II. Summative Assessment:

The question paper for theory examination is patterned in such a manner that the weightage of periods/marks allotted for each of the topics for a particular course be considered. Summative Assessment paper is of 3 hours duration.

a) Each theory paper has Section A (short answers) and Section B (essay questions).

Section A: Answer 10 out of 12 questions, Total = 10 × 3M = 30M

Section B: Answer 5 out of 8 questions, Total = 5 × 8M = 40M

Total theory marks for Summative Assessment = 70 Marks.

b) Drawing Course:

I year

Section A: 4 questions 4 X 5M = 20 marks (all to be answered).

Section B: answer 4 questions out of 6 questions. 4 × 10M = 40 marks.

Drawing Courses - III Semester to V Semester

As per the weightage of marks given in blueprint of the respective course

c) Practical Examinations:

For practical with total 60 marks: Experiment/exercise = 50 marks; Viva-voce = 10 marks; Total = 60.

For practical with total 30 marks: Experiment/exercise = 25 marks; Viva-voce = 5 marks; Total = 30.

Question papers for practical are drawn by lottery and cover required skills. Changes to the pattern will be notified in advance.

d) Note on Laboratory Evaluation:

Laboratory teaching shall be task/competency based and the Semester-end question papers should follow SBTET norms.

4.16 Issue of Memorandum of Marks

All candidates who appear for the Summative Assessment will be issued memorandum of marks without any payment of fee. However, candidates who lose the original memorandum of marks have to pay the prescribed fee to the Secretary, State Board of Technical Education and Training, A.P. for each duplicate memo. After successful completion of all courses, Consolidated Memorandum of Marks will be issued.

4.17 Maximum Period for Completion of Diploma

The maximum period to complete a Diploma is twice the duration of the course from the date of first admission (this includes any periods of detention or discontinuation). After this period, students will forfeit the right to complete the Diploma and will not be allowed to appear for exams. This applies to all the Diploma Programmes.

4.18 Eligibility for Award of Diploma

A candidate is eligible for the Diploma if:

- i) They have pursued the course for not less than 3 years and not more than 6

years.

ii) Students must complete all the required courses. Those who fail to fulfil the requirements within the maximum permissible period shall forfeit their seat and will not be eligible for readmission

For IVC & ITI Lateral Entry students:

i) They must pursue the course for not less than 2 years and not more than 4 years.

ii) They must complete all required courses. Failure to meet the requirements within the maximum permissible period shall result in forfeiture of the seat, and the student will not be eligible for readmission.

Note: As and when a new curriculum is introduced in future, existing curriculum students under C-26 scheme shall write their backlog courses if any in the new curriculum equivalent courses decided by the SBTET, AP.

4.19 Malpractice Cases:

If any candidate resorts to Malpractice during examinations, he / she shall be booked and the punishment shall be awarded as per SBTET, AP rules and regulations in vogue.

4.20. Discrepancies/ Pleas:

Any Discrepancy /Plea regarding results etc., shall be represented to the SBTET, AP within one month from the date of issue of results. Thereafter, no such cases shall be entertained in any manner.

4.21. General

- i. The Board may change or amend the academic rules and regulations or syllabi at any time and the changes or amendments made shall be applicable to all the students, for whom it is intended, with effect from the dates notified by the competent authority.
- ii. All legal matters pertaining to the State Board of Technical Education and Training, AP are within the jurisdiction of Mangalagiri, Guntur District Andhra Pradesh only.
- iii. In case of any ambiguity in the interpretation of the above rules, the decision of the Secretary, SBTET, A.P., Mangalagiri is final.

VISION

Develop Computer Engineers to be technologically adept, innovative, self-motivated and responsible citizen with human values, high quality skills and to contribute significantly towards ever changing software Industry Technologies.

MISSION

M1	To provide opportunity to Diploma students who are capable of playing pivotal role in wide aspects of Computer Science and Engineering and Software Industry.
M2	To make the students understand basic concepts underlie in Computer Science and Engineering and able to apply them creatively in the fields of Software Industry.
M3	To train the student sensitive to the Environment, safety and economic context.
M4	To produce technically skilled students through intensive training in Computer Science and Engineering tools and applications and to prepare the students for professional career and further research.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

Computer Science and Engineering programme is ever changing to transform students into competent professionals with qualities, ethics and human values. On completion of the programme, the students should have acquired the following characteristics

PEO1	To produce best Diploma Computer Science and Engineering technicians by correlating growing need of the industries in modern topics with the academic input and giving the technical knowledge for further learning.
PEO2	To prepare the students as productive Software Engineers, possessing supportive and leadership skill in multi-disciplinary domains, expertise in Practical orientation, Communication Skills and latest developments.
PEO3	To give the depth of related skills and expertise in a single field, and the ability to collaborate with other disciplines and work at the Supervisory cadre.
PEO4	To promote the students in professionalism, by successful completion of the Diploma in Computer Science and Engineering by emphasizing Field Practices in industry-oriented activities.
PEO5	To sensitize the students on social and economic commitment and to inculcate a nature to guard the values of community and protect environment.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO1	Foundation of Computer System: Ability to understand the principles and working of computer systems and can assess the hardware and software aspects of computer systems.
PSO2	Foundations of Computer Science and Engineering : Ability to understand the structure and development methodologies of Computer Science and Engineering and possess professional skills and knowledge of usage of various industry relevant programming languages.

PSO3	Foundation of Mathematical concepts: Ability to apply mathematical methodologies to solve computation task, model real world problem using appropriate data structure and suitable algorithm, methodologies in developing computer related problem solutions as well as apply them in establishing new firms in small scale with the help of experience gained as part of industrial training.
------	--

PROGRAMME OUTCOMES (POs)

PO1	Basic and Discipline Specific Knowledge: To apply knowledge of mathematics, science and engineering fundamentals and engineering specialization to Engineering Problems.
PO2	Problem Analysis: Identify and analyse well-defined engineering problems using codified standard methods mechanical engineering problems for meaningful solutions
PO3	Design/Development of Solutions: Design solutions for well-defined technical problems and assist with the design of systems components or processes to meet specific needs.
PO4	Engineering tools, Experimentation and Testing: Apply modern engineering tools and appropriate techniques to conduct standard tests and measurements.
PO5	Engineering Practices for Society, Sustainability and Environment: Apply appropriate technology in context of society, sustainability, environment and ethical practices.
PO6	Project Management: Use engineering management principles individually, as a team member or a leader to manage projects and effectively communicate about well-defined engineering activities.
PO7	Life-long Learning: Ability to analyse individual needs and engaging updating in the context of technological changes.

MAPPING OF PEOs WITH MISSIONS

PEO	M1	M2	M3	M4
To produce best Diploma in Computer Science and Engineering technicians by correlating growing need of the industries in modern topics with the academic input and giving the technical knowledge for further learning.	✓	✓	✓	✓
To prepare the students as productive Computer Engineers possessing supportive and leadership skills in multidisciplinary domains, expertise in Practical	✓	✓	✓	✓

orientation, Communication Skills and latest developments.				
To give the depth of related skills and expertise in a single field, and the ability to collaborate with other disciplines and work at the supervisory cadre	✓	✓	✓	✓
To promote the students in professionalism, by successful completion of the Diploma in Computer Science and Engineering by emphasizing Field Practices in industry-oriented activities.	✓	✓	✓	✓
To sensitize the students on social and economic commitment and to inculcate a nature to guard the values of community and protect environment.	✓	✓	✓	✓

NOTE : In some of the courses PO5, PO6 and PO7 strength is between 1 and 2, to strengthen them, the following remedial measures for all the courses are suggested.

Short fall in PO	Remedial measures
PO5	By conducting 1) Guest lectures on motivational aspects and ethics. 2) Concerned teacher will educate the students to follow ethics and morals in developing solutions. 3) providing access to Online courses like Swayam program. 4) seminars by senior students to the junior students to assimilate the methods followed by them to the juniors. 5) Head of section will frequently visit and observe the activities being followed by the students to correct their behaviour and to inculcate morals and ethics.
PO6	They can achieve this from industrial training module scheduled in 6 th semester of this curriculum by observing, analysing and applying the mathematical and scientific fundamentals in solving the real time problems that will arise in day-to-day activities in industry.
PO7	1. Providing access to Online courses like Swayam program. 2. By utilizing Learning Management System (LMS) established by SBTET

	<p>3. By subscribing e-magazines/ print magazines to the institute library and made them accessible to the students.</p> <p>4. By arranging Guest lectures from the technical experts.</p>

9	Managing Moods & Moments	10	11	1	1
	Total	90	100	12	8

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To inculcate knowledge of functional English and enrich vocabulary.
(ii)	To impart effective listening, speaking, reading, and writing skills.
(iii)	To sensitise the students on themes related to personality, technological advancements, sustainability, and human values.

COURSE OUTCOMES

CO1	CM101.1	Learn and apply various English grammatical concepts to communicate in academic, professional, personal, and social
-----	---------	---

		contexts.
CO2	CM 101.2	Use appropriate vocabulary in academic, professional and business correspondence, and on social media platforms.
CO3	CM 101.3	Listen/read and comprehend diverse academic, professional, and general listening and reading materials.
CO4	CM 101.4	Communicate effectively and fluently in oral and written forms in various life situations.
CO5	CM 101.5	Display scientific temper and universal human values; adopt technology for holistic development and harmonious living through one's demeanour and communication.

LEARNING OUTCOMES

1.0 Exploring English

- 1.1. To read and comprehend simple sentences in a short passage.
- 1.2. To apply rules of spelling, correct the misspelt words and use dictionary to enrich vocabulary
- 1.3. To identify various parts of speech suitable to the context and use articles & prepositions accurately.
- 1.4. To describe a given situation/picture using simple sentences.
- 1.5. To value the importance of English for employability.

2.0 The Better You!

- 2.1. To read and comprehend formal and informal conversations.
- 2.2. To use words suitable to the context in spoken and written communication.
- 2.3. To use the appropriate forms of verbs.
- 2.4. To engage in conversations in both formal and informal contexts.
- 2.5. To demonstrate a positive attitude in personal and academic spheres.

3.0 Drive to Destiny

- 3.1. To read and comprehend paragraphs for specific and general information, and distinguish different types of paragraphs
- 3.2. To distinguish word pairs and use them contextually.
- 3.3. To frame sentences with proper subject-verb agreement.
- 3.4. To describe actions using appropriate tenses.
- 3.5. To set and achieve academic and personal goals.

4.0 Renew, Rewire & Resolve

- 4.1. To read and comprehend the content and structure of e-mails for different purposes.
- 4.2. To recognise the root words and use appropriate affixes contextually.
- 4.3. To use various kinds of sentences for different communicative situations.
- 4.4. To draft E-mails for academic and professional purposes.
- 4.5. To apply critical thinking and creativity for solving problems.

5.0 Brains & Bots

- 5.1. To read and comprehend the description of a process and the use of sequence markers.
- 5.2. To communicate effectively using phrasal verbs.
- 5.3. To use active and passive voice appropriately.
- 5.4. To describe processes and procedures using appropriate sentence forms.
- 5.5. To appraise the importance and use of robotics and artificial intelligence in human life.

6.0 The Blue Planet: Mend or End!

- 6.1. To read and comprehend the content, structure and purpose of formal and informal letters.
- 6.2. To describe using appropriate forms of adjectives
- 6.3. To substitute phrases or clauses with a single word.
- 6.4. To draft personal and professional letters.
- 6.5. To realise the importance of environmental protection and ensure sustainability.

7.0 One World - One Dream

- 7.1. To read and comprehend an essay and analyse its features.
- 7.2. To identify and create shortened forms of words or phrases.
- 7.3. To report the expressions of the speaker with necessary grammatical changes.
- 7.4. To draft well-organised essays for academic and professional purposes.
- 7.5. To appraise the importance of inclusivity in society.

8.0 The Net Norms

- 8.1. To comprehend and analyse the given text for making notes and summarising.
- 8.2. To use contemporary language in informal communication.
- 8.3. To split or combine ideas using conjunctions for effective communication.
- 8.4. To make notes of textual information and summarise the information.
- 8.5. To demonstrate ideal behaviour on the internet.

9.0 Managing Moods & Moments

- 9.1. To read and comprehend different types of reports.
- 9.2. To analyse and evaluate grammatical errors.
- 9.3. To use words and phrases in sentences of your own.
- 9.4. To draft organised and comprehensive reports on experiments, events, visits and incidents.
- 9.5. To assess the reasons and manage stress and time effectively.

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PS01	PS02	PS03
CO1	POs 1 to 4 are not directly applicable to the English course. However, activities that use content from science and technology relevant to the Programme taken up by the student shall be exploited for communication in the Course.					3	2	Programme Specific Outcomes are branch-specific with technical aspects that are not directly applicable to the English Language course.		
CO2						3	2			
CO3						3	2			
CO4						3	2			
CO5					2		2			
Average					2	3	2			

3-Strongly Mapped 2- Moderately Mapped 1- Slightly Mapped

Note: The gaps in CO and PO mapping will be met by one or more appropriate activities from the following:

- (i) Assignments (ii) Tutorials (iii) Seminars (iv) Guest Lectures (v) Group Discussions (vi) Quizzes (iv) Library Visits etc.,

COURSE CONTENT

1.0 Exploring English

Reading – Role play – Picture Interpretation – Sounds and Spellings – Parts of Speech – Articles and Prepositions

2.0 The Better You!

Reading – Dialogue Writing – Synonyms and Antonyms – Word order – Verbs

3.0 Drive to Destiny

Reading – Paragraph Writing – Homophones, Homonyms, Homographs – Concord – Tenses

4.0 Renew, Rewire & Resolve

Reading – E-mail Writing – Roots, Affixes – Kinds of Sentences

5.0 Brains & Bots

Reading – Describing Process – Phrasal Verbs – Voice

6.0 The Blue Planet: Mend or End!

Reading – Letter Writing – One-word Substitutes – Degrees of Comparison

7.0 One World - One Dream

Reading – Essay Writing – Abbreviations & Acronyms – Reported Speech

8.0 The Net Norms

Reading – Note making & Summarising – Gen-Z Vocabulary – Synthesis of Sentences

9.0 Managing Moods & Moments

Reading – Report Writing – Usage – Error Analysis

Note: The textbook “English Essentials” (A Textbook of English for I Year Engineering Diploma Courses - by SBTET, AP) is the prescribed text for this course. It comprises various language inputs and activities addressing the Learning outcomes specified in each unit. Every unit will have six major components: Listening, Speaking, Reading, Writing, Vocabulary, and Grammar. The activities will be designed as Individual, Pair and Group activities to facilitate self and peer learning.

COURSE OBJECTIVES

Up on completion of the course, the student shall be able to	
(i)	To apply the principles of Algebra, Trigonometry and Co-ordinate Geometry to real-time problems in engineering.
(ii)	To build the concepts of indefinite integrals and definite integrals.

COURSE OUTCOMES

CO1	CM102.1	Resolve partial fractions and solve problems on matrices and determinants.
CO2	CM102.2	Use the concept of trigonometric functions, their inverses and complex numbers.
CO3	CM102.3	Find the equations and properties of straight lines, circles and conic sections in coordinate system.
CO4	CM102.4	Evaluate the limits and derivatives of various functions and apply to engineering problems.
CO5	CM102.5	Integrate various functions using different methods and evaluate definite integrals.

LEARNING OUTCOMES

C.O. 1 Resolve partial fractions and solve problems on matrices and determinants.

- L.O.** 1.1 Define rational, proper and improper fractions of polynomials.
 1.2 Explain the procedure of resolving proper fractions of the type
- $$\frac{f(x)}{(ax+b)(cx+d)}$$
- 1.3 Define a MAPPING and order of a MAPPING.
 1.4 State various types of matrices with examples (emphasis on 3rd order square matrices).
 1.5 Compute sum, difference, scalar multiplication and product of matrices. Illustrate the properties of these operations such as commutative, associative and distributive properties with examples and counter examples.
 1.6 Define the transpose of a MAPPING and state its properties – examples.
 1.7 Define symmetric and skew-symmetric matrices with examples. Resolve a square MAPPING into a sum of symmetric and skew-symmetric matrices with examples.
 1.8 Define determinant of a square MAPPING; minor, co-factor of an element of a 3x3 square MAPPING with examples. Expand the determinant of a 3x3 MAPPING using Laplace expansion formula. State and apply the properties of determinants to solve simple problems.
 1.9 Distinguish singular and non-singular matrices. Define multiplicative inverse of a MAPPING and list properties of adjoint and inverse. Compute adjoint and multiplicative inverse of a square MAPPING.
 1.10 Solve a system of three linear equations in three unknowns using Cramer's rule.

C.O. 2 Solve problems using the concept of trigonometric functions, their inverses and complex numbers.

- L.O.** 2.1 Recall the trigonometric ratios and their values at specified angles.
 2.2 Draw graphs of trigonometric functions - Explain periodicity of trigonometric functions.
 2.3 Define compound angles and state the formulae of $\sin(A \pm B)$, $\cos(A \pm B)$, $\tan(A \pm B)$ and $\cot(A \pm B)$.
 2.4 Give simple examples on compound angles to derive the values of $\sin 15^\circ$, $\cos 15^\circ$, $\sin 75^\circ$, $\cos 75^\circ$, $\tan 15^\circ$, $\tan 75^\circ$ etc.
 2.5 Derive identities like $\sin(A+B)\sin(A-B) = \sin^2 A - \sin^2 B$ etc.

- 2.6 Solve simple problems using the identities on compound angles.
- 2.7 Derive the formulae of multiple angles $2A$, $3A$ etc., and sub-multiple angle $A/2$ in terms of angle A of trigonometric functions.
- 2.8 Derive useful allied formulae like $\sin^2 A = \frac{1 - \cos 2A}{2}$ etc.
- 2.9 Solve simple problems using the multiple and sub-multiple formulae.
- 2.10 Derive the formulae on transforming sum or difference of two trigonometric ratios into a product and vice versa - examples on these formulae.
- 2.11 Solve problems by applying these formulae to sum or difference or product of two terms.
- 2.12 Explain the concept of inverse of a trigonometric function by selecting an appropriate domain and range.
- 2.13 Define inverses of six trigonometric functions along with their domains and ranges.
- 2.14 Derive relations between inverse trigonometric functions so that the given inverse trigonometric function can be expressed in terms of other inverse trigonometric functions with examples.
- 2.15 State various properties of inverse trigonometric functions and identities like $\sin^{-1} x + \cos^{-1} x = \frac{\pi}{2}$ etc.
- 2.16 Apply formulae like $\tan^{-1} x + \tan^{-1} y = \tan^{-1} \left(\frac{x+y}{1-xy} \right)$, where $x \geq 0, y \geq 0, xy < 1$ etc., to solve simple problems.
- 2.17 Explain what is meant by solution of trigonometric equations and find the general solutions of $\sin x = k$, $\cos x = k$ and $\tan x = k$ with appropriate examples.
- 2.18 Solve models of the type $a \sin^2 x + b \sin x + c = 0$ and $a \sin x + b \cos x + c = 0$.
- 2.19 State sine rule, cosine rule, tangent rule and projection rule and solve a triangle using these formulae.
- 2.20 List various formulae for area of a triangle with examples.
- 2.21 Define a complex number, its modulus, conjugate, amplitude and list their properties.
- 2.22 Define arithmetic operations on complex numbers with examples.
- 2.23 Represent the complex number in various forms like modulus-amplitude (polar) form and Exponential (Euler) form with examples.
- 2.24 Explain the concept of hyperbolic trigonometric functions and list appropriate formulae.

C.O. 3 Find the equations and properties of straight lines, circles and conic sections in coordinate system.

- L.O.** 3.1 Write different forms of a straight line – general form, point-slope form, slope-intercept form, two-point form, intercept form and normal form or perpendicular form.
- 3.2 Find distance of a point from a line, acute angle between two lines, intersection of two non-parallel lines and distance between two parallel lines.
- 3.3 Define locus of a point and circle.
- 3.4 Write the general equation of a circle and find its centre and radius.
- 3.5 Find the equation of a circle, given (i) centre and radius, (ii) two ends of the diameter (iii) three non collinear points of type $(0, 0), (a, 0), (0, b)$.
- 3.6 Define a conic - Explain the terms focus, directrix, eccentricity, axes and latus-rectum of a conic.

- 3.7 Find the equation of a conic when focus, directrix and eccentricity are given.
 3.8 Describe the properties of Parabola $y^2 = 4ax$.

C.O.4 Evaluate the limits and derivatives of various functions.

- L.O. 4.1 Explain the concept of limit and meaning of $\lim_{x \rightarrow a} f(x) = l$ and state the properties of limits.
- 4.2 Evaluate the limits of the type $\lim_{x \rightarrow a} \frac{f(x)}{g(x)}$
- 4.3 State the Standard limits $\lim_{x \rightarrow a} \frac{x^n - a^n}{x - a}$, $\lim_{x \rightarrow 0} \frac{\sin x}{x}$, $\lim_{x \rightarrow 0} \frac{\tan x}{x}$, $\lim_{x \rightarrow 0} \frac{a^x - 1}{x}$, $\lim_{x \rightarrow 0} \frac{e^x - 1}{x}$, (without proof) and solve simple problems using these standard limits.
- 4.4 Explain the concept of continuity of a function at a point and on an interval
- 4.5 State the concept of derivative of a function $y = f(x)$ – definition, first principle as $\lim_{h \rightarrow 0} \frac{f(x+h) - f(x)}{h}$ and also write standard notations to denote the derivative of a function.
- 4.6 Explain the significance of derivative in scientific and engineering applications.
- 4.7 Find the derivatives of standard algebraic, logarithmic, exponential and trigonometric functions using the first principle.
- 4.8 Find the derivatives of hyperbolic and inverse hyperbolic functions.
- 4.9 State the rules of differentiation of sum, difference, scalar multiplication, product and quotient of functions with simple illustrative examples.
- 4.10 Explain the method of differentiation of a function of a function (Chain rule) with illustrative examples.
- 4.11 Explain the method of differentiation of parametric functions with examples.
- 4.12 Explain the procedure for finding the derivatives of implicit functions with examples.
- 4.13 Explain the need of taking logarithms for differentiating some functions of $[f(x)]^{g(x)}$ type – examples on logarithmic differentiation.
- 4.14 Explain the concept of finding the second order derivatives with examples.
- 4.15 Define maximum and minimum values of a function and find the maximum and minimum values for quadratic polynomials.
- 4.16 Explain the concept of functions of several variables, finding partial derivatives and difference between the ordinary and partial derivatives with simple examples.

C.O. 5 Integrate various functions using different methods and evaluate definite integrals.

- L.O. 5.1 Explain the concept of Indefinite integral as an anti-derivative.
- 5.2. State the indefinite integral of standard functions and properties of $\int (u + v) dx$ and $\int k u dx$, where u, v are functions of x and k is constant.
- 5.3. Solve problems involving standard functions using these properties.
- 5.4. Evaluate integrals involving simple functions of the following type by the method of substitution.
- i) $\int f(x) dx$, where $f(x)$ is in standard form.

$$ii) \int [f(x)]^n f'(x) dx, n \neq -1.$$

$$iii) \int \frac{f'(x)}{f(x)} dx.$$

5.5. Find the integrals of $\tan x$, $\cot x$, $\sec x$ and $\operatorname{cosec} x$ w.r.t. x .

5.6. Evaluate the Standard integrals of the functions of the type :

$$i) \frac{1}{a^2 + x^2}, \frac{1}{a^2 - x^2}, \frac{1}{x^2 - a^2}$$

$$ii) \frac{1}{\sqrt{a^2 + x^2}}, \frac{1}{\sqrt{a^2 - x^2}}, \frac{1}{\sqrt{x^2 - a^2}}$$

$$iii) \sqrt{a^2 + x^2}, \sqrt{a^2 - x^2}, \sqrt{x^2 - a^2}$$

5.7. Evaluate integrals using decomposition method for integrand of the type

$$\frac{px + q}{(ax + b)(cx + d)}.$$

5.8. Solve problems using integration by parts.

5.9. Use Bernoulli's rule to evaluate the integrals of the form $\int u.v dx$.

5.10. State the fundamental theorem of integral calculus.

5.11. Explain the concept of definite integral.

5.12. Solve simple problems on definite integrals.

5.13. State various properties of definite integrals.

5.14. Evaluate simple problems on definite integrals using these properties.

CO/PO – MAPPING

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	2	2	3				3	2	2
CO2	3	3	2	2				3	2	2
CO3	3	3	2	2				3	2	2
CO4	3	3	3	3				3	3	3
CO5	3	3	3	3				3	3	3
Avg.	3	2.8	2.4	2.6				3	2.4	2.4

3 = Strongly mapped (High), 2 = moderately mapped (Medium), 1 = slightly mapped (Low)

Note: The gaps in CO/PO mapping can be met with appropriate activities as follows:

For PO5: Appropriate quiz programmes may be conducted at intervals and duration as decided by concerned faculty.

For PO6: Seminars on applications of mathematics in various engineering disciplines are to be planned and conducted.

For PO7: Plan activities in such a way that students can visit the Library to refer standard books on Mathematics and access the latest updates in reputed national and international journals. Additionally, encourage them to attend seminars and learn mathematical software tools.

COURSE CONTENT

Unit-I: Algebra

- 1. Partial Fractions:** Definitions of rational, proper and improper fractions of polynomials. Resolve rational fractions (proper fractions) of type $\frac{f(x)}{(ax+b)(cx+d)}$ into partial fractions.
- 2. Matrices:** Definition of a MAPPING, types of matrices - Algebra of matrices, equality of two matrices, sum, difference, scalar multiplication and product of matrices. Transpose of a MAPPING, Symmetric, skew-symmetric matrices - Determinant of a square MAPPING, minor and cofactor of an element, Laplace's expansion, properties of determinants - Singular and non-singular matrices, Adjoint and multiplicative inverse of a square MAPPING - System of linear equations in 3 variables - Solutions by Cramer's rule.

Unit-II: Trigonometry

- 3. Trigonometric ratios:** Definition of trigonometric ratios of any angle, values of trigonometric ratios at specified values, draw graphs of trigonometric functions, periodicity of trigonometric functions.
- 4. Compound angles:** Formulas of $\sin(A \pm B)$, $\cos(A \pm B)$, $\tan(A \pm B)$, $\cot(A \pm B)$ and related identities.
- 5. Multiple and sub-multiple angles:** Formulae for trigonometric ratios of multiple angles $2A$, $3A$ and sub multiple angle $A/2$.
- 6. Transformations:** Transformations of products into sums or differences and vice versa.
- 7. Inverse trigonometric functions:** Definition, domains and ranges - basic properties.
- 8. Trigonometric equations:** Concept of a solution, principal value and general solution of trigonometric equations: $\sin x = k$, $\cos x = k$ and $\tan x = k$, where k is a constant. Solutions of simple quadratic equations and equations of type $a \sin^2 x + b \sin x + c = 0$ and $a \sin x + b \cos x + c = 0$.
- 9. Properties of triangles:** Relations between sides and angles of a triangle - sine rule, cosine rule, tangent rule and projection rule - area of a triangle.
- 10. Complex Numbers:** Definition of a complex number, modulus, conjugate and amplitude of a complex number - Arithmetic operations on complex numbers - Modulus-Amplitude (polar) form, Exponential form (Euler form) of a complex number.
- 11. Hyperbolic functions:** Definition of hyperbolic and inverse hyperbolic trigonometric functions - and list formulae.

UNIT-III: Coordinate geometry

- 12. Straight lines:** Various forms of a straight line - Angle between two lines, perpendicular distance from a point to the straight line, point of intersection of non-parallel lines and distance between parallel lines.
- 13. Circle:** Locus of a point, Circle definition - Circle equation given (i) centre and radius, (ii) two ends of a diameter (iii) three non-collinear points of type $(0,0)$, $(a,0)$, $(0,b)$ - General equation of a circle - its centre and radius.
- 14. Conic sections:** Definition of a conic - Equation of a conic when focus, directrix and eccentricity are given - Properties of parabola in the standard form $y^2 = 4ax$.

UNIT-IV: Differential Calculus

- 15. Concept of Limit:** Definition and Properties of Limits and Standard Limits - Continuity of a function at a point.
- 16. Concept of derivative:** Definition (first principle) - different notations - Derivatives of standard algebraic, logarithmic, exponential, trigonometric, inverse trigonometric,

hyperbolic and inverse hyperbolic functions - Derivatives of sum, difference, scalar multiplication, product, quotient of functions - Chain rule, derivatives of parametric functions, derivatives of implicit functions, logarithmic differentiation - Second order derivatives – Define maximum and minimum values of a function and find the maximum or minimum values for quadratic polynomial. Functions of several variables, first order partial derivatives.

UNIT-V: Integral Calculus

17. Indefinite Integration: Integration regarded as an anti-derivative – Indefinite integrals of standard functions. Properties of indefinite integrals. Integration by substitution or change of variable. Integrals of $\tan x$, $\cot x$, $\sec x$ and $\operatorname{cosec} x$. Evaluation of integrals which are of the following forms:

$$i) \frac{1}{a^2 + x^2}, \frac{1}{a^2 - x^2}, \frac{1}{x^2 - a^2}$$

$$ii) \frac{1}{\sqrt{a^2 + x^2}}, \frac{1}{\sqrt{a^2 - x^2}}, \frac{1}{\sqrt{x^2 - a^2}}$$

$$iii) \sqrt{a^2 + x^2}, \sqrt{a^2 - x^2}, \sqrt{x^2 - a^2}$$

Integration by decomposition of the integrand into simple rational, algebraic functions - Integration by parts, Bernoulli's rule.

18. Definite Integration: Definite integral, fundamental theorem of integral calculus, properties of definite integrals, evaluation of simple definite integrals.

COURSE OBJECTIVES

Upon completion of the course the student shall be able

(i)	To understand the basic concepts of physics for various Engineering applications as required for industries.
(ii)	To equip the students with the scientific advances in technology and make the student suitable for any industrial organization.

COURSE OUTCOMES

CO1	CM103.1	Familiarize with various physical quantities, their SI units and errors in measurements; Understand the concepts of vectors for solving engineering problems.
CO2	CM103.2	Solve problems in engineering using appropriate equations and formulae related to Mechanics; Understand the concepts of gravitation, planetary motion with reference to applications in satellites

CO3	CM103.3	Familiarize with the knowledge of various forms of energy, thermal physics and concepts of acoustics in relevance to the societal requirements.
CO4	CM103.4	Familiarize with the basic knowledge of electricity, magnetism and advances in Modern Physics such as photoelectric cell, optical fibers, superconductors and nanotechnology.

LEARNING OUTCOMES

1 UNITS AND MEASUREMENTS

- 1.1 Introduction to Units and Measurements
- 1.2 Define the terms: a) Physical quantity b) Fundamental physical quantities and c) Derived physical quantities.
- 1.3 Explain the concept of units in measurement.
- 1.4 Define the term 'unit'.
- 1.5 Define fundamental units and derived units.
- 1.6 State the SI units of fundamental quantities along with their symbols.
- 1.7 State the common multiples and submultiples used in the SI system.
- 1.8 State the rules for writing SI units.
- 1.9 State the advantages of using SI units.
- 1.10 Differentiate between direct and indirect measurements.
- 1.11 Define accuracy and least count in the context of measurement.
- 1.12 Define error in measurement.
- 1.13 Define absolute, relative and percentage errors and state their respective formulae.
- 1.14 Solve numerical problems on errors in measurements.

2 ELEMENTS OF VECTORS

- 2.1 Explain the concept of vectors.
- 2.2 Define scalar and vector quantities with relevant examples for each.
- 2.3 Represent a vector geometrically.
- 2.4 Define equal vectors, negative vector, unit vector, position vector, co-initial vectors, co-planar vectors.
- 2.5 Resolve a given vector into its rectangular components.

- 2.6 State and explain the triangle law of addition of vectors.
- 2.7 State the parallelogram law of addition of vectors.
- 2.8 Derive the expressions for the magnitude and direction of the resultant vector using the parallelogram law.
- 2.9 Illustrate applications of the parallelogram law of vectors using examples
(i) Bow and arrow (ii) working of a sling (iii) Flying of a bird.
- 2.10 Define dot product (scalar product) of two vectors.
- 2.11 Explain (i) work done (ii) power as examples of dot product.
- 2.12 Define cross product (vector product) of two vectors.
- 2.13 Explain (i) linear velocity (ii) torque as examples of cross product.
- 2.14 Solve numerical problems on (i) resolution of vectors (ii) the parallelogram law of vectors (iii) dot product.

3 MECHANICS

- 3.1 Define linear momentum; Mention its SI unit.
- 3.2 Define force. Mention its SI unit.
- 3.3 Define torque. Mention its SI unit.
- 3.4 Define concurrent forces, co-planar forces.
- 3.5 State and explain Lami's theorem.
- 3.6 State equations of motion of a body moving in a straight line with uniform acceleration.
- 3.7 Define projectile. Give examples.
- 3.8 Derive the equation for the path of an oblique projectile.
- 3.9 Define periodic motion.
- 3.10 Define Ideal Simple pendulum.
- 3.11 Write formula for the time period of a simple pendulum.
- 3.12 Solve numerical problems on equations of motion and simple pendulum.

4 FUNDAMENTALS OF ASTRODYNAMICS

- 4.1 Define acceleration due to gravity (g); Mention its SI unit.
- 4.2 State and explain Newton's universal law of gravitation.
- 4.3 Define universal gravitational constant (G) and mention its value in SI unit.
- 4.4 Derive the relationship between acceleration due to gravity (g) and the universal gravitational constant (G).
- 4.5 State and explain Kepler's laws of planetary motion.
- 4.6 Define orbital velocity and state its formula.
- 4.7 Define escape velocity and state its formula.
- 4.8 Derive the relationship between escape velocity and orbital velocity.
- 4.9 Define the term 'satellite'.
- 4.10 Define natural and artificial satellites. Give examples for each.
- 4.11 Mention the applications of artificial satellites.
- 4.12 Solve numerical problems on (i) Newton's law of gravitation (ii) orbital velocity (iii) escape velocity.

5 ENERGY AND THERMAL PHYSICS

- 5.1 Define work done; Mention its SI unit.
- 5.2 Define power; Mention its SI unit.
- 5.3 Define energy; Mention its SI unit.
- 5.4 List various forms of energy.
- 5.5 Define potential energy; Give examples and derive its equation.
- 5.6 Define kinetic energy; Give examples and derive its equation.
- 5.7 Derive the relationship between kinetic energy and linear momentum.
- 5.8 State the law of conservation of energy; Give any two examples.
- 5.9 State Boyle's law; Write its equation.
- 5.10 State Charles's volume law; Write its equation.
- 5.11 State Charles's pressure law; Write its equation.
- 5.12 Define an Ideal gas.
- 5.13 Derive the ideal gas equation ($PV = nRT$).
- 5.14 Solve numerical problems on (i) Work done (ii) Potential energy (iii) Kinetic energy (iv) Relation between K.E. and momentum (v) Gas laws

6 CONCEPTS OF ACOUSTICS

- 6.1 Define longitudinal waves. Give examples.
- 6.2 Define transverse waves. Give examples.
- 6.3 Define sound. Mention SI unit for intensity of sound.
- 6.4 Define musical sound.
- 6.5 Define noise.
- 6.6 Distinguish between musical sound and noise.
- 6.7 Define noise pollution.
- 6.8 Explain the sources of noise pollution.
- 6.9 Explain the effects of noise pollution.
- 6.10 Explain methods of minimizing noise pollution.
- 6.11 Define Beats. Write formula for beat frequency.
- 6.12 State Doppler's Effect. Mention its applications.
- 6.13 Explain the concept of echo.
- 6.14 Mention the applications of echo.
- 6.15 Define reverberation and reverberation time.
- 6.16 Write Sabine's formula and name the parameters in it.
- 6.17 Solve numerical problems on echo.

7 ELECTRICITY AND MAGNETISM

- 7.1 State and explain Ohm's law.
- 7.2 Define electrical resistance; Mention its SI unit.
- 7.3 Define specific resistance (resistivity); Mention its SI unit.
- 7.4 State and explain Kirchhoff's Current Law.
- 7.5 State and explain Kirchhoff's Voltage Law.
- 7.6 Derive an expression for the balancing condition of Wheatstone's bridge with neat diagram.
- 7.7 Describe Meter bridge with necessary circuit diagram.
- 7.8 Write formula to find unknown resistance using meter bridge.
- 7.9 Explain the concept of magnetic field.
- 7.10 Define uniform and non-uniform magnetic fields.
- 7.11 Define magnetic pole strength; Mention its SI unit.

- 7.12 Define magnetic moment; Mention its SI unit.
- 7.13 Define magnetic lines of force.
- 7.14 Write the properties of magnetic lines of force.
- 7.15 State Coulomb's inverse square law of magnetism. Write its equation.
- 7.16 Derive the expression for the moment of couple acting on a bar magnet placed in a uniform magnetic field.
- 7.17 Solve numerical problems on (i) Ohm's law (ii) Kirchhoff's first law (iii) Wheatstone bridge and Meter bridge (iv) Coulomb's inverse square law of magnetism.

8 MODERN PHYSICS

- 8.1 State and explain photoelectric effect.
- 8.2 Write Einstein's photoelectric equation and name the terms in it.
- 8.3 Explain the working of a photoelectric cell.
- 8.4 List the applications of the photoelectric cell.
- 8.5 Define critical angle.
- 8.6 Explain the phenomenon of total internal reflection.
- 8.7 Define optical fiber; Explain the principle and working of an optical fiber.
- 8.8 List the applications of optical fiber.
- 8.9 Define Superconductor and superconductivity.
- 8.10 List the applications of superconductors.
- 8.11 Define Nanotechnology and Nano materials.
- 8.12 Write applications of Nano materials.

CO-PO MAPPING

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3	2	1	1	1		1
CO2	3	2	1	1	1		2
CO3	3	2	1	1	1		2
CO4	3	2	1	1	3		2
Average	3	2	1	1	1.5		1.75

3 = strongly mapped, 2 = moderately mapped, 1 = slightly mapped

Note: The gaps in CO and PO mapping will be achieved by one or more appropriate activities from the following.

(i) Seminars (ii) Viva-voce (iii) Assignments (iv) Quiz competitions (v) Industrial visits (vi) Techfest (vii) Mini project (viii) Group discussions (ix) Virtual labs (x) Library visit for e-books.

COURSE CONTENT

1. Units and measurements

Introduction – Physical quantity – Fundamental and Derived quantities – Unit-Fundamental and derived units - SI system of units –Multiples and Sub multiples – Rules for writing S.I. units-Advantages of SI units – Direct and indirect measurements – Accuracy and least count – Errors: Absolute, relative and percentage errors – Problems.

2. Elements of Vectors

Introduction of Scalars and Vectors – Representation of a vector –Types of vectors - Resolution of vector into rectangular components – Triangle law of vectors - Parallelogram law of vectors- examples- derivation of magnitude and direction of resultant vector- Dot product- Cross product - Problems.

3. Mechanics

Introduction to Mechanics – Momentum –force-torque. Concurrent and coplanar forces - Lami's theorem – equations of motion of a body moving in a straight line – projectile - path of projectile in oblique projection – periodic motion -Ideal simple pendulum- Time period of simple pendulum- Problems.

4. Fundamentals of Astro dynamics

Concept of acceleration due to gravity (g) -Newton's law of gravitation- Universal Gravitational constant G – Relation between g and G- Kepler's laws of planetary motion – Orbital velocity and escape velocity – Satellites: Natural and artificial - Applications of artificial satellites – Problems.

5. Energy and thermal Physics

Work done, Power and Energy - forms of energy - Potential energy - Kinetic energy- Momentum- K.E and Momentum relation – Law of Conservation of energy- Boyle's law - Charle's volume law -Charle's pressure law- Ideal Gas equation- Problems.

6. Concepts of Acoustics

Longitudinal wave- transverse wave- musical sound - noise - Noise pollution – Causes, effects, Methods of minimizing noise pollution- Beats - Doppler's Effect - applications - Echo- Reverberation - Reverberation time-Sabine 's formula - Problems.

7. Electricity and Magnetism

Ohm's law- Resistance - Specific resistance - Kirchoff's laws - Wheatstone's bridge- Meter Bridge. Concept of magnetic field- magnetic pole strength – Magnetic Moment- magnetic lines of force - Coulomb's inverse square law of magnetism– Torque acting on a bar magnet- Problems.

8. Modern Physics

Photoelectric effect – Einstein photo electric equation – photoelectric cell – Applications of photoelectric cell – critical angle, Total internal reflection- Optical Fiber - Principle – working-Applications of optical fibers - Superconductivity–applications – Nanotechnology – applications.

TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED FOR UNIT TESTS I, II & III

Unit test	Learning outcomes to be covered
Unit test - I	From 1.1 to 3.12
Unit test - II	From 4.1 to 6.17
Unit test - III	From 7.1 to 8.12

Engineering Chemistry and Environmental Studies

Course code	Course Title	No. Of periods/ week	Total No. of Periods/Year	FA Marks	SA Marks	Credits
26CM104T	ENGINEERING CHEMISTRY AND ENVIRONMENTAL STUDIES	3	90	30	70	4

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1	Basic Concepts of Chemistry	14	18	2	1.5	CO1
2	Solutions, Acids and Bases	14	18	2	1.5	CO1
3	Electrochemistry	12	11	1	1	CO2
4	Corrosion	8	11	1	1	CO2
5	Water Treatment	8	11	1	1	CO3
6	Polymers and Engineering Materials	10	11	1	1	CO4
7	Fuels and Alternative Energy Sources	6	3	1	0	CO4
8	Environmental Studies	18	17	3	1	CO5
TOTAL		90	100	12	8	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To develop a fundamental understanding of core chemical principles and their relevance to a wide range of engineering applications.
(ii)	To explore and analyze natural and anthropogenic environmental challenges through an interdisciplinary lens, incorporating physical, chemical and socio - cultural perspectives.
(iii)	To reinforce theoretical concepts by conducting relevant experiments/exercises.

COURSE OUTCOMES

CM104.1	Explain the basics of atomic structure, chemical bonding, oxidation-reduction, mole concept, concentration expressing methods of solutions, acids-bases, pH and buffer solutions.
CM104.2	Explain electrolysis, Galvanic cell, batteries and corrosion.
CM104.3	Explain the chemistry involved in the treatment of hardness in water.
CM104.4	Explain the preparation and applications of polymers, and understand the composition and uses of alloys, nanomaterial and green fuels.
CM104.5	Explain environmental concepts, pollution types, global issues, green chemistry principles and sustainable development goals.

CO-PO MAPPING

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	-	-	-	-	-	-	-	-	-
CO2	3	1	1	1	1	-	1	-	-	-
CO3	3	1	1	1	1	-	1	-	-	-
CO4	3	1	1	-	1	-	1	-	-	-
CO5	3	1	-	-	1	1	1	-	-	-
Average	3	1	1	1	1	1	1	-	-	-

3 = Strongly mapped 2 = Moderately mapped 1 = Slightly mapped

Note: The gaps in CO and PO mapping will be achieved by one or more appropriate activities from the following:

- (i). Seminars (ii). Tutorials (iii). Guest Lectures (iv). Assignments (v). Quiz Competitions, (vi). Industrial Visit (vii). Tech Fest (viii). Mini Project (ix). Group Discussions (x). Virtual Classes and (xi). Library Visit for e-books.

LEARNING OUTCOMES

1.0 Basic Concepts of Chemistry

- 1.1 Explain the charge, mass of fundamental particles of an atom (electron, proton and neutron).
- 1.2 Understand the concept of Atomic number and Mass number.
- 1.3 Calculate the number of electrons, number of protons and number of neutrons in atoms, if Atomic number and Mass number are given.
- 1.4 Explain the Postulates of Bohr's atomic theory and its limitations.
- 1.5 Explain the values and significance of four Quantum numbers.
- 1.6 Define Orbital of an atom and draw the shapes of s, p orbitals.
- 1.7 Distinguish between orbit and orbital.
- 1.8 Explain (i). Aufbau principle (ii). Hund's rule and (iii). Pauli's exclusion principle.
- 1.9 Write the Electronic configuration of elements up to Atomic number 20.
- 1.10 Explain the significance of chemical bonding.
- 1.11 Understand the concept of Octet rule.
- 1.12 Define Ionic bond and explain it in the formation of NaCl.
- 1.13 Define Covalent bond and explain it in the formation of H₂, O₂ & N₂ molecules (Lewis Dot Method).
- 1.14 List out the Properties of Ionic compounds and Covalent compounds and distinguish between their properties.
- 1.15 Understand the electronic concept of oxidation, reduction and redox reactions.

2.0 Solutions, Acids and Bases

- 2.1 Define the terms: (i). Solution (ii). Solute and (iii). Solvent with examples.
- 2.2 Classify solutions based on physical state of solvent with examples.
- 2.3 Define the terms: (i). Atomic weight, (ii). Molecular weight, and (iii). Equivalent weight.
- 2.4 Calculate Molecular weight and Equivalent weight of the given Acids (HCl, H₂SO₄, H₃PO₄), Bases (NaOH, Ca(OH)₂, Al(OH)₃ and Salts (NaCl, Na₂CO₃, AlCl₃).
- 2.5 Define Mole and solve numerical problems on Mole concept.
- 2.6 Define Molarity, Normality and solve numerical problems on Molarity and Normality.
 - (a). Calculate the Molarity & Normality, if Weight of solute and Volume of solution are given.
 - (b). Calculate the weight of solute, if Molarity or Normality with volume of solution are given.
- 2.7 Explain Arrhenius theory of Acids and Bases and give its limitations.
- 2.8 Define pH and mention its Significance.
- 2.9 Define buffer solution and classify buffer solutions with examples. Give its applications.

3.0 Electrochemistry

- 3.1 Define the terms (i). Conductor (ii). Semiconductor (iii). Insulator. (iv).

Electrolyte (Strong and Weak) and (v). Non-electrolyte. Give two examples for each.

- 3.2 Define Electrolysis and Explain electrolysis by taking an example of molten NaCl.
- 3.3 State the applications of electrolysis.
- 3.4 Understand Electrode potential and Standard reduction potential (SRP).
- 3.5 Define electrochemical series and state its significance.
- 3.6 Define Galvanic cell. Explain the construction and working of Galvanic cell.
- 3.7 Distinguish between electrolytic cell and galvanic cell.
- 3.8 Define battery and list the types of batteries with examples.
- 3.9 Explain the construction, working and applications of (i). Dry cell (Leclanché cell) and (ii). Lithium-ion battery.

4.0 Corrosion

- 4.1 Define the term corrosion.
- 4.2 State the factors which influencing the rate of corrosion.
- 4.3 Describe the formation of (a). Composition cell (b). Stress cell and (c). Concentration cell during corrosion.
- 4.4 Define rusting of iron and explain the mechanism of rusting of iron.
- 4.5 Explain the methods of prevention of corrosion by:
 - (a). Protective Coatings (through flow chart with examples) and
 - (b). Cathodic Protection Methods.
 - (i). Sacrificial Anode Process and
 - (ii). Impressed Voltage Process

5.0 Water Treatment

- 5.1 Define soft water and hard water.
- 5.2 Define hardness of water and classify its types.
- 5.3 List out the salts that causing hardness of water (with Formulae).
- 5.4 State the disadvantages of using hard water in industries.
- 5.5 Define Degree of hardness and units of hardness (mg/L and ppm).
- 5.6 Explain the method of softening of hard water by Ion exchange method (By indicative reactions).
- 5.7 Explain the concept of Reverse Osmosis in removing hardness of water.
- 5.8 List out the applications and advantages of reverse osmosis technique.
- 5.9 List out the essential qualities of drinking water/potable water.
- 5.10 Explain Municipal treatment of water for drinking purpose (only flow chart).

6.0 Polymers and Engineering Materials.

- 6.1** Explain monomers, polymers and the concept of polymerization.
- 6.2** Describe the methods of polymerization (a). Addition Polymerization of Polythene and (b). Condensation Polymerization of Bakelite (Only flow chart).
- 6.3** Define plastic. Write the monomers and uses of plastics: (i). PVC and (ii) Nylon (6,6).
- 6.4** Define Biodegradable polymers. State applications of (i). PHBV and (ii). PBAT.
- 6.5** Define an alloy. Write the composition and applications of the following alloys: (i). Stainless Steel and (ii). Nitinol.
- 6.6** Define Nano Materials and State applications of (i). Graphene and (ii). Nanotubes.

7.0 Fuels and Alternative Energy Sources

- 7.1** Define the term fuel.
- 7.2** Classification of fuels as Natural fuels and Synthetic fuels.
- 7.3** Write the composition and uses of the following:
 - (i) LPG (ii) CNG and (iii). Power alcohol.
- 7.4** State the Renewable and Non- renewable energy sources with examples.
- 7.5** Define Green fuel. State the advantages and disadvantages of hydrogen as a green fuel.

8.0 Environmental Studies

- 8.1** Importance of environmental studies.
- 8.2** Define the following terms:
 - (i). Pollution, (ii). Pollutant, (iii). Sink, (iv). Receptor, (v). Particulate Matter, (vi). Dissolved Oxygen (DO) and (vii). Threshold Limit Value (TLV).
- 8.3** State the uses of forest resources.
- 8.4** Define deforestation. Explain the causes, effects and controlling methods of deforestation.
- 8.5** Define Air pollution. Explain the causes, effects and controlling methods of Air pollution.
- 8.6** Explain the global impacts of Air pollution: (i). Global Warming, (ii). Ozone Layer Depletion and (iii). Acid Rain.
- 8.7** Define Water pollution. Explain the causes, effects and controlling methods of Water pollution.
- 8.8** Define e – pollution. State the sources of e – pollution. Explain its health effects and its management.
- 8.9** Define Green Chemistry. List the Green Chemistry Principles.
- 8.10** Define Sustainable Development and List the Sustainable Development Goals.

COURSE CONTENT

1. Basic Concepts of Chemistry

Atomic Structure

Introduction - Fundamental particles – their mass and charge – Atomic number and Mass number - definition with examples – calculation of electrons, protons and neutrons in atoms – Bohr's atomic theory and limitations - Quantum numbers – Orbital concept, shapes of s, p Orbitals – Distinguish between Orbit and Orbital - Aufbau principle - Hund's rule - Pauli's exclusion Principle - Electronic configuration of elements (Atomic number(Z) from 1 to 20).

Chemical Bonding

Introduction – Octet rule - Types of chemical bonds – Ionic bond (NaCl) and Covalent bond (H₂, O₂ & N₂ molecules) as examples – Properties of Ionic and Covalent compounds. Electronic concept of oxidation, reduction and redox reactions.

2. Solutions, Acids and Bases

Solutions

Introduction – Idea of solute, solvent and solution - Types of solutions based on physical state of solvent – Atomic weight – Molecular weight, Equivalent Weight (Acids, Bases and Salts) - Mole concept – Numerical problems on Mole concept - Methods of expressing concentration of a solution – Molarity - Normality – Numerical problems on Molarity and Normality.

Acids and Bases

Introduction - Arrhenius theory of acids and bases – pH Scale – its significance – Buffer solution – Definition – Types of buffer solutions with examples – its applications.

3. Electrochemistry

Introduction - Conductors, Semiconductors, Insulators with examples - Electrolytes (Strong and Weak) and Non-electrolytes – Definition – Examples – Electrolysis – Definition – Electrolysis of molten NaCl – Applications of electrolysis – Electrode potential - Standard reduction potential – Definition – Electrochemical series – Significance – Construction and working of Galvanic cell – Differences between Electrolytic cell and Galvanic cell - Batteries - Types of batteries – Definition and examples – construction, working and applications of: (i). Dry Cell (Leclanché Cell) and (ii). Lithium-ion battery.

4. Corrosion

Introduction – Definition - Factors influencing the rate of corrosion – Composition cell, Stress cell and Concentration cell during corrosion – Rusting of iron and its mechanism – Prevention of corrosion - Protective Coating methods (flow chart with examples) - Cathodic Protection methods.

5. Water Treatment

Introduction – Soft and Hard water – Hardness of water – Types of hardness – salts responsible for hardness - Degree of hardness – Methods of expressing hardness (mg/L and ppm) – Disadvantages of using hard water in industries - Softening of hard water by Ion exchange method – Concept of Reverse Osmosis process – Applications and Advantages of Reverse Osmosis - Essential qualities of drinking water/potable water – Municipal treatment of water for drinking purpose (only flow chart).

6. Polymers and Engineering Materials

Polymers:

Introduction- Monomers - Polymers - Polymerization – Types of Polymerization – Addition polymerization (Polythene) and Condensation polymerization (only flow chart of Bakelite) - Plastics – monomers and uses of PVC and Nylon (6,6) - Biodegradable Polymers: (i). PHBV and (ii). PBAT (Composition and Uses).

Engineering Materials:

Alloys - Definition - Composition and applications of (i). Stainless Steel and (ii). Nitinol, Nano Materials – Definition - Applications of (i) Graphene and (ii). Nanotubes.

7. Fuels and Alternative Energy Sources

Introduction – Definition - Classification of fuels – Composition and uses of (i). LPG (ii). CNG and (iii). Power alcohol - Renewable and Non-renewable energy sources – Advantages and disadvantages of Hydrogen as a green fuel.

8. Environmental Studies

Introduction - Importance of environmental studies – Important terms related to environment – Pollution, Pollutant, Sink, Receptor, Particulate Matter, Dissolved Oxygen (DO), Threshold Limit Value (TLV) - Uses of forest resources – Deforestation - Definition – causes, effects, controlling methods – Air pollution – Definition, causes, effects, controlling methods - Global impacts of Air pollution – Global warming, Ozone layer depletion, Acid rain – Water pollution – Definition, causes, effects, controlling methods – e - pollution, Definition, sources, effects, management - Green Chemistry – Definition – Principles of Green Chemistry – Sustainable Development – Definition – Goals.

TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED FOR UNIT TESTS I, II & III

Unit Test	Learning outcomes to be covered
Unit Test –I	From 1.1 to 2.9
Unit Test –II	From 3.1 to 5.10
Unit Test –III	From 6.1 to 8.10

PYTHON PROGRAMMING

Course code	Course Title	No. Of periods/ week	Total No. of Periods/Year	FA Marks	SA Marks	Credits
26CM105T	PYTHON PROGRAMMING	6	180	30	70	6

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weight age of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Introduction to Python Programming	40	14	02	01	CO1
2.	Control Flow and Loop statements	25	14	02	01	CO2
3.	Functions and Arrays	40	25	03	02	CO3
4.	Built-in Data Structures	35	22	02	02	CO4
5.	Python Libraries, File Handling and Exception handling.	40	25	03	02	CO5
Total		180	100	12	08	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To know the fundamentals of Python programming and to understand syntax, scripting and program execution in 'Python'.
(ii)	To develop various python programs using control structures, functions & arrays.
(iii)	To develop programs using data structures.
(iv)	To Implement Python Libraries.
(v)	To implement file handling & exception handling concepts.

COURSE OUTCOMES

CO1	CM105.1	Explain Basic concepts of Python programming as well as scripting, debugging and execution.
CO2	CM105.2	Develop Python programs using Control statements & Loops.
CO3	CM105.3	Develop Python programs using Functions and arrays.
CO4	CM105.4	Develop Python programs using Built-in Data structures.
CO5	CM105.5	Develop Python application programs using Python libraries, exceptions and Files.

LEARNING OUTCOMES

1.0 Introduction to python programming

- 1.1 Recite history of Python.
- 1.2 List Python features
- 1.3 List and Explain Applications of Python
- 1.4 Explain Python Integrated Development and Learning Environment (IDLE)
- 1.5 Explain process of Running Python Scripts.
- 1.6 Explain Identifiers, Keywords, Indentation & Variables
- 1.7 List and explain various data types
- 1.8 Explain declaration & initialization of variables.
- 1.9 Explain Input and Output statements.
- 1.10 Explain formatted input output.
- 1.11 State the usage of comments
- 1.12 List and Explain various Operators.
- 1.13 Explain Boolean values.
- 1.14 Explain Operator precedence rules.
- 1.15 State the purpose of modules.
- 1.16 Define functions.
- 1.17 List types of functions
- 1.18 List and Explain Built-in Functions.
- 1.19 Explain the Steps in Developing a simple python program and execution.

2.0 Control Flow and Loop Statements

- 2.1 List and Explain various Control Flow constructs.
 - 2.1.1 If
 - 2.1.2 If-Else
 - 2.1.3 if-elif-else
- 2.2 List and Explain various Loop Statements.
 - 2.2.1 for Loop
 - 2.2.2 while loop
- 2.3 Use break, continue & pass statements.
- 2.4 Implement the python programs using control structures.

3.0 Functions and Arrays

- 3.1 Give introduction to functions
- 3.2 Use Function Arguments: Default arguments, Keyword arguments, Variable Length arguments, Anonymous Functions & Return Statement.
- 3.3 List and explain Scope of variables
- 3.4 Explain creation of modules.
- 3.5 Explain importing of modules.
- 3.6 Explain Python Variables: Namespace and scoping
- 3.7 Explain Python Packages
- 3.8 List and Explain Strings: String slices, immutability
- 3.9 List and Explain String functions and methods.
- 3.10 Explain about String module.
- 3.11 Explain about Python Arrays.
- 3.12 Explain accessing of elements in an Array.
- 3.13 Explain Array methods.

4.0 Built-in Data Structures

- 4.1 Explain Python Lists.
- 4.2 Describe Basic List Operations.
- 4.3 Explain List Slices.
- 4.4 Explain List methods.
- 4.5 Explain List traversing.
- 4.6 Explain mutability.
- 4.7 Explain aliasing.
- 4.8 Explain Cloning of lists.
- 4.9 Explain List comprehension.
- 4.10 Tuples.
 - 4.10.1 Explain Tuple assignment.
 - 4.10.2 Explain Tuple as return value.
 - 4.10.3 Explain Tuple Comprehension.
- 4.11 Dictionaries
 - 4.11.1 Explain creation of dictionary.
 - 4.11.2 Explain Dictionary operations and methods.
 - 4.11.3 Explain Dictionary Comprehension.
- 4.12 Explain Sets.

5.0 Python Libraries, File Handling & Exception Handling

- 5.1 Give introduction to python library.
- 5.2 Import modules in a python program.
- 5.3 Use Python standard library's functions and modules.
- 5.4 Turtle, Random, Datetime, CSV, Numpy & Pandas.
- 5.5 Create Python library.
- 5.6 Give introduction to Files.
- 5.7 Explain opening and closing Files.
- 5.8 Explain reading and writing Files.
- 5.9 Use Standard Input, Output and error streams.
- 5.10 Explain exception handling
 - 5.10.1 Define Error and Exception.
 - 5.10.2 State the difference between Error and Exception.
 - 5.10.3 Use user-defined exceptions.
 - 5.10.4 Use try except block.
 - 5.10.5 Explain raising exceptions.

CO-PO/PSO MAPPING

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	1	2	1	1	1	2	2	1	
CO2	3	2	2	2	1	1	1	2	2	2
CO3	3	2	2	1	1	1		2	2	2
CO4	3	1	2	1	1	1	3	2	2	2
CO5	3	1	2	1	2	3	2	2	2	2
Average	3	1.75	2	1.2	1.2	1.8	1.6	2	1.8	1.8

3=strongly mapped, 2=moderately mapped, 1=slightly mapped

COURSE CONTENT

UNIT – I: Introduction

Introduction to Python, installation, Applications, IDLE, Data types, variables, Input and Output statements, Operators, expressions, statements, precedence of operators, comments, modules, functions, types of functions, built-in functions, flow of python program execution.

UNIT – II: Control Flow and Loop Statements:

Control Flow- If, if-else, if-elif-else, for, while, break, continue, pass statements. sample python programs using control flow and Loop statements.

UNIT – III: Functions and Arrays:

Introduction to Functions: Defining, Calling Functions, Passing Arguments, Types of function arguments -Keyword Arguments, Default Arguments, Variable-length arguments, Anonymous Functions, Function Returning multiple values, Scope of the Variables in a Function - Global and Local Variables.

Modules: Creating modules, import statement, name spacing, Python Packages.

Strings: string slices, immutability, string functions and methods, string module.

Python arrays: Access the Elements of an Array, array methods.

UNIT – IV: Data Structures

Lists: list operations, list slices, list methods, list traversing, mutability, aliasing, cloning lists, list comprehension.

Tuples: tuple assignment, tuple as return value, tuple comprehension.

Dictionaries: operations and methods, comprehension.
sets.

UNIT – V: Python Libraries, File Handling and Exception Handling.

Python Libraries: Introduction, importing modules in python program, use python standard library functions and modules - Python libraries - Turtle, Random, Datetime, CSV, Numpy & Pandas.

File Handling: Open Files, File Processing and Closing a File.

Error and Exceptions: Difference between an error and Exception, Handling Exception, try except block, Raising Exceptions, User Defined Exceptions

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I, II & III**

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 to 2.1
Unit test-II	From 2.2 to 3.13
Unit test-III	From 4.1 to 5.15

CODING FUNDAMENTALS

Course code	Course Title	No. Of periods/ week	Total No. of Periods/Year	FA Marks	SA Marks	Credits
26CM106A	CODING FUNDAMENTALS	2	60	--	--	--

TIME SCHEDULE

S.No.	Chapter/Unit Title	No. of Periods	COs Mapped
1.	Fundamentals of Computers	10	CO1
2.	Programming Methodology	15	CO2
3.	Introduction to coding	10	CO3
4.	Fun with functions	15	CO4
5.	Understanding arrays and collections	10	CO5
Total Periods		60	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To know the fundamentals of Computers.
(ii)	To familiarize with programming methodologies like algorithms and flowcharts.
(iii)	To understand coding basics.
(iv)	To familiarize with functions.
(v)	To familiarize with arrays and collections.

COURSE OUTCOMES

CO1	CM106.1	Explain computer fundamentals
CO2	CM106.2	Explain various flowchart, algorithm methods
CO3	CM106.3	Explain the concept of coding and basics of coding
CO4	CM106.4	Explain the concept of functions, events and event handlers
CO5	CM106.5	Explain the arrays and collections

LEARNING OUTCOMES

1.0 Fundamentals of Digital Computer

- 1.1. Define various terms related to computers – Computer, Hardware, Software, Firmware, High Level Language, Low Level Language.
- 1.2. Draw and explain block diagram of a computer in detail.
- 1.3. Describe the current family of CPUs used in Computers.
- 1.4. State the use of storage devices used in a computer.
- 1.5. List the two types of memory used in a computer.

- 1.6. State the importance of cache memory.
- 1.7. Explain the generations of computers.
- 1.8. Classification of computers - based on a) size, b) processor.
- 1.9. State the importance of binary number system for use in Digital Computers.

2.0 Implement Programming Methodology

- 2.1. State the different steps involved in problem solving.
- 2.2. Define an algorithm.
- 2.3. List four characteristics of algorithm.
- 2.4. Define flowchart.
- 2.5. Define a program.
- 2.6. Differentiate between program and algorithm.
- 2.7. State the steps involved in algorithm development.
- 2.8. Differentiate between algorithm and flowchart.
- 2.9. Develop algorithms for simple problems.
- 2.10. Draw the various symbols used in flowcharts.
- 2.11. Draw flowcharts for simple problems.

3.0 Introduction to coding

- 3.1. Define coding.
- 3.2. Define Pseudocode.
- 3.3. Explain the Process of writing code.
- 3.4. Define variables.
- 3.5. Explain naming of variables.
- 3.6. List Data types.
- 3.7. Explain operations on variables.
- 3.8. Explain AND, OR and NOT logical operators.
- 3.9. State Combining of logical operators.
- 3.10. List different Relational operators.
- 3.11. List Different control statements.
- 3.12. Explain Nested control statements.
- 3.13. Define loops.
- 3.14. Explain Increment loops.
- 3.15. List Different types of loops.
- 3.16. State Entry criteria for a loop.
- 3.17. State Exit criteria for a loop.
- 3.18. Explain Break statement.
- 3.19. Explain Continue statement.
- 3.20. List Examples of sequential execution, selection and iteration.
- 3.21. Define bug.

4.0 Fun with functions

- 4.1. Define functions.
- 4.2. Examples of functions.
- 4.3. List Advantages using functions.
- 4.4. State different function parameters.
- 4.5. State about returning a value in a function.
- 4.6. Define an event.
- 4.7. List different event handlers.

5.0 Understanding arrays and collections

- 5.1. Explain collections.
- 5.2. Define arrays.
- 5.3 List various types of arrays with examples.
- 5.4 Explain the process of iterating over collections.
- 5.5 Explain modifying collections.

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3							3	1	1
CO2	1	2	2	1		3		1	3	1
CO3	3	1		1		1	1	3	1	1
CO4	3		2	2	1		1	2	1	2
CO5	3		2		1	1	1	2	1	2
Average	2.60	1.50	2.00	1.33	1.00	1.67	1.00	2.20	1.40	1.40

3=Strongly mapped , 2=moderately mapped, 1=slightly mapped

COURSE CONTENT

1.0 Fundamentals of Digital Computer

Computer, Hardware, Software, Firmware, High Level Language, Low Level Language - Block diagram of a digital computer, Clock speed and word length, Functional blocks of a CPU: ALU and Control unit, classification of computer memory, generations & classification of computers, binary number system.

2.0 Programming Methodology.

Steps involved in problem solving – Define an algorithm, Program - Characteristics of algorithm - Differentiate between program and algorithm- Steps involved in algorithm development - Differentiate algorithm and flowchart - Algorithms for simple problems - Symbols used in flowcharts -Flowcharts for simple problems.

3.0 Introduction to coding

Need for coding – correlate coding with real life examples - pseudo code – process of writing pseudo code – Define Variables - naming of variables-Different data types in variables- operations on variables –Different types of logical operators and their functions i.e AND , OR and NOT – combining logical AND , OR and NOT operators - different types of relational operators -Different types of control statements if, if-else - Nested control statements - loops in coding-increment loops-decrement loops – entry

criteria-exit criteria-break statement-continue statement-sequential execution, selection and iteration-Define bug

4.0 Fun with functions

Functions-examples-user defined and built-in functions- Different function parameters-returning a value in a function - Events- Event Handlers

5.0 Understanding arrays and collections

Collections-Arrays – examples for arrays and collections-Process of iterating over collections-Modifying collections.

Python Programming Lab

Course code	Course Title	No. Of periods/ week	Total No. of Periods/Year	FA Marks	SA Marks	Credits
26CM107L	PYTHON PROGRAMMING LAB	6	180	40	60	6

TIME SCHEDULE

S.No.	Chapter/Unit Title	No. of Periods	COs Mapped
1.	Exercises on basics, expressions and operators.	30	CO1
2.	Exercises on control structures.	35	CO2
3.	Exercises on functions and Arrays.	35	CO3
4.	Exercises on Data structures.	40	CO4
5.	Exercise on python libraries, file handling and exception handling	40	CO5
Total Periods		180	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To enable students to understand and execute basic Python programs using fundamental concepts such as expressions, operators, control structures, functions, and arrays.
(ii)	To develop the ability to design and implement Python programs using core data structures and user-defined functions for solving computational problems.
(iii)	To equip students with skills to develop Python applications using standard Python libraries, file handling techniques, and exception handling mechanisms.

COURSE OUTCOMES

CO1	CM107.1	Execute Simple python programs (basics, expressions and operators)
CO2	CM107.2	Execute Python programs using control structures
CO3	CM107.3	Execute Python Programming using Functions, Arrays
CO4	CM107.4	Develop Python programs using Data structures
CO5	CM107.5	Develop Python programs using Python libraries, File handling and exception handling.

LEARNING OUTCOMES

1. Write and execute simple python Program.
2. Write a program to demonstrate various data types in Python
3. Write /execute simple 'Python' program: Develop minimum 2 programs using different data types (numbers, string, tuple, list, and dictionary).
4. Write a program to perform different Arithmetic Operations on numbers in Python
5. Write /execute simple 'Python' program: Develop minimum 2 programs using Arithmetic Operators, exhibiting data type conversion.
6. Write a Python script that prints prime numbers less than 20.
7. (i) Write simple programs to convert U.S. dollars to Indian rupees.
(ii) Write simple programs to convert bits to Megabytes, Gigabytes and Terabytes.
8. Write simple programs to calculate the area and perimeter of the square, and the volume & perimeter of the cone.
9. Write program to: (i) determine whether a given number is odd or even.
(ii) Find the greatest of the three numbers using conditional operators.
10. Write a program to: i) Find factorial of a given number. ii) Generate multiplication table up to 10 for numbers 1 to 5.
11. Write a python program to find factorial of a number using Recursion
12. Write a program to print Factors of a given Number.
13. Write a program to: i) Find factorial of a given number. ii) Generate multiplication table up to 10 for numbers 1 to 5 using functions.
14. Write a program to: i) Find factorial of a given number using recursion. ii) Generate Fibonacci sequence up to 100 using recursion.
15. Write a python program to define a module to find Fibonacci Numbers and import the module to another program
16. Write a python program to define a module and import a specific function in that module to another program
17. Write a program to create, concatenate and print a string and accessing sub-string from a given string
18. Write a program to Create a list, add element to list, delete element from the lists.
19. Write a program to Sort the list, reverse the list and counting elements in a list.
20. Write a program to demonstrate working with tuples in python.
21. Write a program to Create dictionary, add element to dictionary, delete element from the dictionary.
22. Write a program to calculate average, mean, median, and standard deviation of numbers in a list.
23. Write a program to: i) To create simple file and write "Hello World" in it.
ii) To open a file in write mode and append Hello world at the end of a file.
24. Write a program to: i) To open a file in read mode and write its contents to another file but replace every occurrence of character 'h' ii) To open a file in read mode and print the number of occurrences of a character 'a'.
25. Write a program that inputs a text file. The program should print all of the unique words in the file in an alphabetical order

26. Write a pandas program to load the CSV into a dataframe and perform arithmetic operations on the data loaded.
27. Write a program to create a 5 * 5 Numpy array with random integers between 1 and 100.
28. Write a python program to handle built-in exceptions (ZeroDivisionError, IndexError, NameError).

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3

3=strongly mapped, 2=moderately mapped, 1=slightly mapped

Key Competencies

S. No.	Name of the Experiment	Objectives	Key Competencies
1.	Write and execute simple python Program.	Write a simple python program to print Hello World! and debug and execute	<ul style="list-style-type: none"> • Know the usage of Python IDLE • Edit and save the program • Check for the syntax errors and clear the errors • Run the program and check for the output.
2.	Write a program to demonstrate different number data types in Python	Write a simple python program using integer, float, string and debug and execute	<ul style="list-style-type: none"> • Know the usage of Python IDLE • Edit and save the program • Check for the syntax errors and clear the errors • Run the program and check for the output.
3.	Write /execute simple 'Python' program: Develop minimum 2 programs using different data types (numbers, string, tuple, list, dictionary).	Write a Python program to identify different data types.	<ul style="list-style-type: none"> • Identify different data types • Write basic python program using data types • Evaluate arithmetic expression • Run the program • Rectify the syntactical errors

			<ul style="list-style-type: none"> • Execute the program and check the output for its correctness
4.	Write a program to perform different Arithmetic Operations on numbers in Python	Write a program to perform different Arithmetic Operations such as addition, subtraction, multiplication and division	<ul style="list-style-type: none"> • Identify different arithmetic operators • Write basic python program using arithmetic operations • Evaluate arithmetic expression • Run the program • Rectify the syntactical errors • Execute the program & check the output for its correctness
5.	Write /execute simple 'Python' program: Develop minimum 2 programs using Arithmetic Operators, exhibiting data type conversion.	Write a Python program to identify arithmetic operators and data type conversion	<ul style="list-style-type: none"> • Identify different arithmetic operators • Build arithmetic expressions • Identify the priorities of operators • Evaluate arithmetic expression • Run the program • Rectify the syntactical errors • Execute the program and check the output for its correctness
6.	Write a Python script that prints prime numbers less than 20.	Write a Python script that prints prime numbers less than 20.	<ul style="list-style-type: none"> • Identify 20 prime numbers • Edit and save the program • Check for the syntax errors and clear the errors • Run the program and check for the output.
7.	(i) Write simple programs to convert U.S. dollars to Indian rupees. ii) Write simple programs to convert bits to Megabytes, Gigabytes and Terabytes.	Write a Python program to identify arithmetic operators and data type conversion	<ul style="list-style-type: none"> • Identify different arithmetic operators • Build arithmetic expressions • Identify the priorities of operators • Evaluate arithmetic expression • Run the program • Rectify the syntactical errors

			<ul style="list-style-type: none"> • Execute the program Check the output for its correctness
8.	Write simple programs to calculate the area and perimeter of the square, and the volume & perimeter of the cone.	Write a Python program to identify arithmetic operator data type conversion	<ul style="list-style-type: none"> • Identify different arithmetic operators • Build arithmetic expressions • Identify the priorities of operators • Evaluate arithmetic expression • Run the program • Rectify the syntactical errors • Execute the program Check the output for its correctness
9.	Write program to: (i) Determine whether a given number is odd or even. (ii) Find the greatest of the three numbers using conditional operators.	Write a Python program to identify conditional statements in Python.	<ul style="list-style-type: none"> • Build a relational expression • Use the if statement for decision making • Rectify the syntax errors • Check the output for correctness
10.	Write a program to: i) Find factorial of a given number. ii) Generate multiplication table up to 10 for numbers 1 to 5.	Write a Python program to identify loops statements in Python.	<ul style="list-style-type: none"> • Build the termination condition for looping • Use while statement with correct syntax • Check whether correct number of iterations are performed by the while loop • Rectify the syntax errors • Debug logical errors
11.	Write a python program to find factorial of a number using Recursion	Write a python program for the factorial for a given number using recursion	<ul style="list-style-type: none"> • Build the application using recursion. • Build the terminating condition for recursion. • Rectify the syntax errors • Debug logical errors
12.	Write a program to: To print Factors of a given Number.	Write a Python program to make use of function.	<ul style="list-style-type: none"> • Build the termination condition for looping • Use while statement with correct syntax • Check whether correct number of iterations are

			<p>performed by the while loop</p> <ul style="list-style-type: none"> • Rectify the syntax errors • Debug logical errors
13.	Write a program to: i) Find factorial of a given number. ii) Generate multiplication table up to 10 for numbers 1 to 5 using functions	Write a Python program to using functions	<ul style="list-style-type: none"> • Build the termination condition for looping • Use while statement with correct syntax • Check whether correct number of iterations are performed by the while loop • Rectify the syntax errors • Debug logical errors
14.	Write a program to: i) Find factorial of a given number using recursion. ii) Generate Fibonacci sequence up to 100 using recursion.	Write a Python program to make use of recursion.	<ul style="list-style-type: none"> • Build the application using recursion. • Build the terminating condition for recursion. • Rectify the syntax errors • Debug logical errors
15.	Write a python program to define a module to find Fibonacci Numbers and import the module to another program	Write a Python program using module and importing the module	<ul style="list-style-type: none"> • Build the application using module. • Develop the logic for Fibonacci series. • Import the module • Rectify the syntax errors • Debug logical errors
16.	Write a python program to define a module and import a specific function in that module to another program	Write a Python program using module and importing the module	<ul style="list-style-type: none"> • Build the application using module. • Develop the logic for Fibonacci series. • Import the module • Rectify the syntax errors • Debug logical errors
17.	Write a program to create, concatenate and print a string and accessing sub-string from a given string	Write a program to create, concatenate and print a string and accessing sub-string from a given string.	<ul style="list-style-type: none"> • Build the application • Develop the logic for string concatenation and substring • Rectify the syntax errors • Debug logical errors
18.	Write a program to: Create a list, add element to list, delete element from the lists.	Write a Python program to identify various	<ul style="list-style-type: none"> • Create a one list with correct syntax • Create a list

		lists and list manipulation methods in Python.	<ul style="list-style-type: none"> • Read elements from list • Add elements to list • Delete elements • Rectify the syntax errors • Debug logical errors • Check for the correctness of output for the given input
19.	Write a program to: Sort the list, reverse the list and counting elements in a list.	Write a Python program to identify various lists and list manipulation methods in Python.	<ul style="list-style-type: none"> • Create a one list with correct syntax • Create a list • Read elements from list • Add elements to list • Delete elements • Rectify the syntax errors • Debug logical errors • Check for the correctness of output for the given input
20.	Write a program to demonstrate working with tuples in python	Write a Python program to identify various tuples and manipulate	<ul style="list-style-type: none"> • Create a tuple with correct syntax • Create a tuple • Read elements from tuple • Add elements to tuple • Delete elements • Rectify the syntax errors • Debug logical errors • Check for the correctness of output for the given input
21.	Write a program to: Create dictionary, add element to dictionary, delete element from the dictionary.	Write a Python program to identify various dictionary and dictionary manipulation methods in Python.	<ul style="list-style-type: none"> • Create a one dictionary with correct syntax • Create a dictionary • Read elements from list • Add elements to dictionary • Delete elements from dictionary • Rectify the syntax errors • Debug logical errors • Check for the correctness of output for the given input

22.	Write a program to: To calculate average, mean, median, and standard deviation of numbers in a list.	Write a Python program to identify various statistical functions.	<ul style="list-style-type: none"> • Create a list • add elements to list • perform statistical functions on that list
23.	File Input/output: Write a program to: i) To create simple file and write "Hello World" in it. ii) To open a file in write mode and append Hello world at the end of a file.	Write a Python program to identify the steps to create a file and append to file.	<ul style="list-style-type: none"> • Create a Python file • Add contents to file
24.	Write a program to: i) To open a file in read mode and write its contents to another file but replace every occurrence of character 'h' ii) To open a file in read mode and print the number of occurrences of a character 'a'.	Write a Python program to identify the steps to open a file in read/write mode.	<ul style="list-style-type: none"> • Open a Python file in write mode • Add contents to the file • Open a Python file in Read mode • Print the file
25.	Write a program that inputs a text file. The program should print all of the unique words in the file in alphabetical order	Write a Python program to identify the steps to open a file in read/write mode.	<ul style="list-style-type: none"> • Open a Python file in write mode • Add contents to the file • Open a Python file in Read mode • Develop the logic to find unique words • Print the unique words
26.	Write a pandas program to load the CSV into a dataframe and perform arithmetic operations on the data loaded	Write a Python program using the pandas library to perform the task	<ul style="list-style-type: none"> • Import the pandas python library • Write the python code to load the CSV into dataframe • Perform the arithmetic operations • Debug the python program • Check the correctness
27.	Write a program to create a 5 * 5 Numpy array with random integers between 1 and 100	Write a Python program using the Numpy library to perform the task	<ul style="list-style-type: none"> • Import the Numpy python library • Write the python code to create an array of size 5 *5 • Generate the random integers between 1 and 100 • Debug the python program • Check the correctness
28.	Write a python program to handle built-in exceptions (ZeroDivisionError, IndexError, NameError)	Write a python program to handle built-in exceptions (ZeroDivisionError,	<ul style="list-style-type: none"> • Create a program using the exceptions. • Use Try Catch blocks

		IndexError, NameError)	<ul style="list-style-type: none"> • Debug the python program • Check the correctness

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I, II & III**

Unit Test	Learning outcomes to be covered
Unit test-I	From 1 to 10
Unit test-II	From 11 to 20
Unit test-III	From 21 to 28

Computer Hardware Lab

Course code	Course Title	No. Of periods/ week	Total No. of Periods /Year	FA Marks	SA Marks	Credits
26CM108L	COMPUTER HARDWARE LAB	4	120	40	60	3

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	COs Mapped
1.	Computer Hardware Basics	24	CO1
2.	Mother Board Basics	24	CO2
3.	Hard Disk Basics	24	CO3
4.	Operating System Basics	28	CO4
5.	Troubleshooting Basics	20	CO5
	Total	120	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To identify and understand the components of a computer system and motherboard, including connectors, pins, CMOS setup options, and SMPS voltage color coding.
(ii)	To develop practical skills in assembling and disassembling computers, installing hardware components such as RAM, CPU, and HDD, and performing disk partitioning and formatting.
(iii)	To enable installation and configuration of system software, printers, control panel settings, and to troubleshoot common computer hardware issues effectively.

COURSE OUTCOMES

CO1	CM108.1	Identify and Assemble the PC with suitable components.
CO2	CM108.2	Identify the components, connectors & pins on a Motherboard.
CO3	CM108.3	Install and partition the Hard disk.
CO4	CM108.4	Install operating system and printers.
CO5	CM108.5	Troubleshoot hardware devices.

LEARNING OUTCOMES

1.0 Computer Hardware Basics

1. Identification of various Hardware components of Computer.
2. Using various options of CMOS setup.
3. Installing and removing of Motherboard from computer.
4. Printing the summary of your system Hardware and verify for correctness.
5. Assembling of a PC.
6. De-Assembling of a PC.

2.0 Mother Board Basics

1. Identification of various components of Motherboard.
2. Identification of various back panel connectors of Motherboard.
3. Identification of various pins & connectors.
4. Installing and removing RAM, CPU, HARD DISK
5. Identification of various motherboards based on the form factor such as AT, ATX, micro ATX, mini ATX, Baby AT et.
6. Identification on voltage levels of each wire in SMPS based on the standard color of the wire.

3.0 Hard Disk basics

1. Familiarity with hard disk interfacing standards like IDE/SCSI /SATA / PATA.
2. Practice on Partition of Hard disk.
3. Practice on formatting a hard disk in FAT/NTFS Format.
4. Calculating Hard Disk Storage Capacity.
5. Recovery of lost data on hard drive using Recovery Tools.
6. Defragmenting the Hard Disk.

4.0 Operating system basics

1. Installation of operating system software (Windows 10/11).
2. Installation of device driver software.
3. Installation of application software (MS-Office 2007/ 2010).
4. Practice on various options of control panel.
5. Installation of printer using control panel.
6. Installation of any anti-virus software for protecting pc.
7. Practice on changing resolution, color, appearance, screensaver options of the display Setting in pc.
8. Knowing the precautions to be taken while troubleshooting the hardware.

5.0 Trouble shooting Basics

1. Identification of steps in troubleshooting: Visual inspection, Layman checks, measurement of voltage levels, Beep sounds, Error codes and Use of Advanced Diagnostic tools.
2. Troubleshooting Keyboard, Printer Problems.
3. Troubleshooting no display on monitor Problem.
4. Troubleshooting RAM Issues.

Key Competencies

S.No.	Name of the experiment	Objectives	Key Competencies
1	Exercise on Identification and familiarization of various components of computer system.	Identification and familiarization of various components of computer system.	<ul style="list-style-type: none"> ❖ Identify and note down motherboard, Components and Chips. ❖ Identify various Internal and External slots in the motherboard and clean them with blower/ Brush. ❖ Practicing Inserting and Removing RAM with care.
2	Exercise on various operations and modifications required for CMOS setup.	Perform various operations and modifications required for CMOS setup.	<ul style="list-style-type: none"> ❖ Identify location of CMOS battery on motherboard. ❖ Know how to replace CMOS battery. ❖ Identify keyboard key for entering BIOS setup. ❖ Setup CMOS settings ❖ Check the status of CMOS settings after replacement.
3	Exercise on Installing and removing of Motherboard from computer	Perform motherboard installation, removal and identification	<ul style="list-style-type: none"> ❖ Identify motherboard form factors (ATX, microATX, mini-ITX) ❖ Recognize various motherboard components (CPU socket, RAM slots, chipset, PCIe slots, power connectors) ❖ Demonstrate correct procedure for removing and installing a motherboard

			<ul style="list-style-type: none"> ❖ Properly mount the motherboard using standoffs and screws ❖ Align the I/O shield and rear ports correctly
4	Exercise on Print the summary of your system Hardware and verify for correctness	Print the summary of your system Hardware and verify for correctness	<ul style="list-style-type: none"> ❖ Know how to open system summary window ❖ Check whether all the hardware peripherals are working properly or not. ❖ Know how to install device drivers ❖ Know how to enable and disable hardware peripherals. ❖ Print the hardware summary page
5	Assembling a PC	understand the step-by-step process of assembling a personal computer.	<ul style="list-style-type: none"> ❖ Recognize essential hardware components (motherboard, RAM, CPU, HDD, PSU, cabinet, etc.) ❖ Understand the role and placement of each component ❖ Install the motherboard, processor, RAM, and storage devices into the cabinet ❖ Mount and connect the SMPS ❖ Connect cables (SATA, power, front panel I/O, etc.) ❖ Install expansion cards (optional) ❖ Connect and manage power cables safely and efficiently ❖ Organize internal wiring to promote airflow and safety
6	De-Assembling of a PC	To understand the systematic process of disassembling a personal computer.	<ul style="list-style-type: none"> ❖ Identify all major components: motherboard, CPU, RAM, HDD/SSD, SMPS, GPU, etc. ❖ Detach cables and connectors carefully (SATA, power, front panel, etc.) ❖ Use tools like screwdrivers correctly and safely. ❖ Handle delicate components such as RAM and processor without damage. ❖ Follow a correct and logical sequence for disassembling the system. ❖ Place screws and components in organized manner for easy reassembly.

7	Identification of various components of Motherboard	To identify and understand the function of key components on a computer motherboard.	<ul style="list-style-type: none"> ❖ Identify components such as CPU socket, RAM slots, chipset, power connectors, SATA/IDE ports, CMOS battery, etc. ❖ Recognize expansion slots (PCI, PCIe, AGP), and onboard headers (USB, front panel, fan headers). ❖ identify the purpose of each component (e.g., chipset controls data flow, CPU socket holds the processor). ❖ Understand how components work together within the computer system.
8	Identification of various back panel connectors of Motherboard	To identify the different connectors present on the back panel of a motherboard.	<ul style="list-style-type: none"> ❖ Recognize common back panel ports: <ul style="list-style-type: none"> • USB Ports (Type-A, Type-C) • HDMI / VGA / DVI • Ethernet (RJ-45) • Audio Jacks • PS/2 Ports • DisplayPort / Serial / Parallel Ports (if present) ❖ identify the use of each connector for devices like monitors, keyboards, mice, network cables, printers, speakers, etc. ❖ Visually and physically distinguish between similar-looking ports (e.g., USB vs. HDMI).
9	Identification of various pins of connectors in Motherboard	To identify different types of connector pins and headers located on the motherboard.	<ul style="list-style-type: none"> ❖ Recognize key pin headers such as: ❖ Back panel connectors (PS2, USB, HDMI, VGA, DVI, RJ-45, SERIAL, PARALLEL PORTS) ❖ Front panel connector (F_PANEL): power switch, reset switch, power LED, HDD LED ❖ USB headers (USB1, USB2...) ❖ Audio headers (HD_AUDIO, AC'97) ❖ Fan headers (CPU_FAN, SYS_FAN) ❖ Power connectors (24-pin ATX, 4/8-pin CPU power) ❖ SATA ports and M.2 slots ❖ Understand the layout of pins (e.g., +ve, -ve, GND, VCC) for each connector. ❖ Read diagrams and pin out charts to match wires correctly.

10	Installing and removing RAM, CPU, HARD DISK in motherboard	To learn the correct procedure for installing and removing RAM, CPU, and Hard Disk in a computer system.	<ul style="list-style-type: none"> ❖ Properly insert and remove RAM modules from DIMM slots. ❖ Correctly install the CPU into the socket (LGA/PGA) and apply thermal paste if required. ❖ Install and connect SATA/SSD hard disks, including power and data cab.
11	Identify various motherboards based on the form factor such as AT,ATX, micro ATX, mini ATX , Baby AT etc	To identify and differentiate various motherboard form factors used in personal computers.	<ul style="list-style-type: none"> ❖ Visually identify the key characteristics of common form factors such as: <ul style="list-style-type: none"> • AT (Advanced Technology) • ATX (Advanced Technology Extended) • Micro ATX • Mini ATX / Mini-ITX • Baby AT ❖ Understand how form factor affects: <ul style="list-style-type: none"> • Cabinet size and type • Power supply connector types • Number of expansion and memory slots • Cooling options.
12	Identify voltage levels of each wire in SMPS based on the standard color of the wire	To identify different wires of the SMPS (Switched Mode Power Supply) based on their color codes.	<ul style="list-style-type: none"> ❖ Know the purpose and acceptable range of each voltage rail. ❖ Understand potential issues from overvoltage or under voltage. ❖ Learn how to safely measure voltage from an SMPS using a multimeter. ❖ Follow ESD and electrical safety protocols while dealing with power supply wires. ❖ Match wire voltages to the components they power (e.g., CPU requires 12V, USB uses 5V). ❖ Identify different SMPS connectors (24-pin ATX, 4-pin CPU, SATA, Molex) and their pin/wire color mapping.
13	Familiarize with hard disk interfacing standards like IDE/SCSI /SATA / PATA	To understand various types of hard disk interfaces used in personal computers	<ul style="list-style-type: none"> ❖ Identify and differentiate between IDE, PATA, SATA, and SCSI interfaces by their connectors and cables. ❖ Understand the technical specifications (speed, number of pins, data transfer type) of each interface standard. ❖ Recognize compatible hard disks and motherboards for each interface type. ❖ Understand the historical development and obsolescence of

			older standards (IDE, PATA) and the adoption of newer ones (SATA).
14	Practice on Partition of Hard disk	To understand the concept and purpose of hard disk partitioning	<ul style="list-style-type: none"> ❖ Grasp how a hard disk can be divided into multiple partitions for better data management. ❖ Use system tools like Windows Disk Management or diskpart (command line) for partitioning tasks. ❖ Choose appropriate file systems (e.g., NTFS for Windows) during formatting. ❖ Apply logical planning to create partitions based on user/system needs (e.g., OS, data, backup)
15	Practice on formatting a hard disk FAT/NTFS Format	To understand the concept and purpose of formatting a hard disk	<ul style="list-style-type: none"> ❖ Distinguish between FAT32 and NTFS in terms of features, limitations, and usage scenarios. ❖ Format a hard drive or partition using both graphical and command-line tools (e.g., format, diskpart). ❖ Select the appropriate file system based on the system requirement (e.g., NTFS for Windows, FAT32 for external drives). ❖ Configure volume labels and choose cluster sizes based on the type of usage.
16	Calculating Hard Disk Storage Capacity	To understand the components that determine a hard disk's storage capacity	<ul style="list-style-type: none"> ❖ Understand disk structure: number of platters, tracks, sectors, bytes per sector, etc. ❖ Convert between different units of storage (e.g., 1 GB = 1024 MB, etc.) ❖ Interpret technical specs of a hard drive (e.g., from a product label or manual) to estimate usable capacity. ❖ Understand why usable space is less than labelled capacity (e.g., due to formatting, file system overhead, 1 GB = 1000 MB marketing vs. 1024 MB actual).
17	How to recover lost data on hard drive using Recovery Tools	How to recover lost data on hard drive.	<ul style="list-style-type: none"> ❖ Verify the available recovery tools of Operating system. ❖ Know how to recover lost data on Hard drive using Restore point. ❖ Know how to recover lost data on Hard drive using Recovery Image.

18	Defragmenting the Hard Disk	To understand the concept of disk fragmentation and how it affects system performance.	<ul style="list-style-type: none"> ❖ Identify how data gets fragmented on traditional hard drives and its impact on read/write speed. ❖ Use built-in tools like Windows Defragment and Optimize Drives. ❖ Analyse disk drives for fragmentation percentage before initiating defragmentation. ❖ Perform defragmentation safely without interrupting other operations. ❖ Observe changes in performance post-defragmentation. ❖ Set up scheduled defragmentation for regular maintenance.
19	Installation of operating system software (Windows 10 / 11)	To understand the step-by-step procedure of installing a Windows operating system.	<ul style="list-style-type: none"> ❖ Prepare a PC for OS installation (bootable media, BIOS settings, partitioning) ❖ Carry out a complete and clean installation of Windows 10 or Windows 11. ❖ Set and modify the boot device priority in BIOS/UEFI settings. ❖ Create, delete, and format partitions during installation as needed. ❖ Choose correct file system (e.g., NTFS) for Windows installation ❖ Install required drivers post-OS installation for full hardware support.
20	Installation of device driver software	To understand the role and importance of device drivers in a computer system.	<ul style="list-style-type: none"> ❖ Recognize which devices require drivers (e.g., graphics card, audio, LAN, chipset). ❖ Use Windows Device Manager to view device status, update, install, or uninstall drivers. ❖ Install drivers from CDs, USBs, or downloaded packages. ❖ Fix common issues such as "driver not recognized," "yellow warning sign," or "code 10 error." ❖ Match correct driver versions to operating systems and hardware models. ❖ Test devices after driver installation to ensure proper working (e.g., sound output, network connectivity).

21	Installation of application software (MS-Office 2007/2010)	To install Microsoft Office 2007 / 2010 suite including Word, Excel, PowerPoint, and other components.	<ul style="list-style-type: none"> ❖ Perform installation from CD/DVD, USB, or downloaded setup file. ❖ Choose between typical, custom, or complete installations depending on user needs. ❖ Check system compatibility (OS, RAM, storage) before installation ❖ Enter product key and complete activation process for licensed software. ❖ Choose and manage installation paths or directories during setup. ❖ Confirm installation by launching Office applications and checking version details.
22	Practice on various options of control panel	To explore and understand the purpose of various tools and settings available in the Windows Control Panel.	<ul style="list-style-type: none"> ❖ Navigate through Control Panel efficiently in both Category and Classic views. ❖ Adjust screen resolution, theme, desktop background, and screen saver. ❖ Create, delete, and manage user accounts and passwords. ❖ Add and remove hardware devices; access printer settings. ❖ View and change adapter settings, connect to Wi-Fi, and set up local networks. ❖ Set system date/time, region, and language preferences. ❖ Install/uninstall programs, manage default apps, and check installed updates.
23	Installation of printer using control panel	To understand how to install a printer manually using the Control Panel in Windows	<ul style="list-style-type: none"> ❖ Add a new printer through Control Panel using "Devices and Printers" > "Add a printer" option. ❖ Select or install appropriate drivers for USB, network, or wireless printers. ❖ Choose correct ports (USB, LPT1, TCP/IP) during manual installation. ❖ Set the installed printer as the default printer and configure preferences ❖ Identify and fix installation errors like "printer not found" or "driver unavailable." ❖ Perform a successful test print to verify installation.

24	Installation of any anti-virus software for protecting pc	To understand the need for anti-virus software in protecting a computer from malware and other threats.	<ul style="list-style-type: none"> ❖ Install anti-virus software from a setup file or online installer (e.g., Avast, Quick Heal, AVG, etc.). ❖ Grant necessary permissions during installation and accept license agreements. ❖ Run full system scans, quick scans, or custom scans and interpret the results. ❖ Identify threats, view quarantine folder, and restore or delete infected files. ❖ Ensure virus definitions are up to date and software is working effectively. ❖ Confirm background protection is active and responding to potential threats.
25	Practice on changing resolution, color, appearance, screensaver options of the display setting of pc	To understand how to access and modify display settings in a Windows PC.	<ul style="list-style-type: none"> ❖ Access the Display Settings through the desktop or Control Panel. ❖ Change the resolution to optimize screen display based on monitor capability. ❖ Modify screen layout (landscape/portrait) as required. ❖ Choose appropriate color schemes and Windows themes for better visibility and aesthetics. ❖ Select, preview, and set timers for screensavers; configure password protection on resume. ❖ Use high contrast modes or larger text options for improved accessibility. ❖ Personalize display options according to user needs or preferences.
26	Know the precautions to be taken while troubleshooting the hardware	To understand the importance of safety and preventive measures during hardware troubleshooting.	<ul style="list-style-type: none"> ❖ Recognize the dangers of working with powered devices and exposed circuitry. ❖ Use of anti-static wrist straps, mats, and ESD-safe tools to prevent component damage. ❖ Ensure power is disconnected before opening the cabinet or removing parts. ❖ Select and use appropriate tools like screwdrivers, tweezers, and testers correctly. ❖ Maintain a clean, dry, and well-lit workspace free from conductive materials.

			<ul style="list-style-type: none"> ❖ Avoid touching circuit traces or connectors with bare hands; handle by edges.
27	<p>identify the systematic steps in troubleshooting: Visual inspection, Layman checks, measurement of voltage levels, Beep sounds, Error codes and Use of Advanced Diagnostic tools</p>	<p>To understand the step-by-step process of hardware troubleshooting.</p>	<ul style="list-style-type: none"> ❖ Identify burnt components, loose wires, broken connectors, or dust accumulation. ❖ Perform basic checks like verifying power supply, monitor connection, and cable tightness. ❖ Use a multimeter to measure voltage levels from the SMPS to motherboard and components (e.g., +12V, +5V, +3.3V lines). ❖ Interpret BIOS beep codes to identify faults in RAM, CPU, GPU, or motherboard ❖ Read and understand on-screen or LED error codes shown during POST. ❖ Use hardware diagnostic software (like Hiren's Boot CD, MemTest86, etc.) and built-in Windows tools for checking hardware health.
28	<p>Trouble shooting Keyboard, Printer problems</p>	<p>To identify and diagnose common hardware and connectivity issues in keyboards and printers.</p>	<ul style="list-style-type: none"> ❖ Recognize issues like non-responsive keys, stuck keys, or full keyboard failure. ❖ Verify USB/PS2 port connection, wireless keyboard pairing, and power supply (for wireless). ❖ Access and update keyboard drivers using Device Manager or Control Panel. ❖ Replace with a known working keyboard to verify device-level failure. ❖ Verify cables, network/Wi-Fi connectivity, and power status of the printer. ❖ Clear print queue, restart the print spooler, and reinstall printer software. ❖ Install or update appropriate printer drivers. ❖ Detect and resolve issues like paper jams, low ink/toner, or incorrect paper tray selection. ❖ Check printer settings in Control Panel or Settings and configure defaults properly.

			<ul style="list-style-type: none"> ❖ Use printer self-test or built-in diagnostic tools for hardware faults.
29	Trouble shooting no display on monitor	To understand the possible causes behind a blank or no-display monitor issue.	<ul style="list-style-type: none"> ❖ Detect loose cables, damaged connectors, or physically broken monitor parts. ❖ Check VGA/HDMI/DisplayPort/DVI cables, power supply, and monitor input source selection. ❖ Confirm monitor power using power LED indicators or multimeter readings. ❖ Interpret beep codes indicating RAM or graphics card issues. ❖ Remove and re-seat RAM and GPU; test with alternate RAM/monitor where possible. ❖ Connect the system to a different monitor to isolate the issue (monitor vs. system).
30	Troubleshooting RAM Issues	To understand the symptoms and causes of RAM-related problems in a computer system.	<ul style="list-style-type: none"> ❖ Identify RAM issues through signs like continuous beeping, blue screen errors, system freezing, or failure to boot. ❖ Detect physical damage, dust, or improper installation of RAM modules. ❖ Use BIOS/UEFI beep codes to identify RAM-related errors during POST (Power-On Self-Test). ❖ Safely remove, clean, and re-insert RAM sticks into the motherboard slots. ❖ Use tools like MemTest86, Windows Memory Diagnostic, or other bootable utilities to check RAM health. ❖ Test each RAM stick in different slots to identify faulty RAM or slot.

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I, II & III**

Unit Test	Learning outcomes to be covered
Unit test-I	From 1 to 10
Unit test-II	From 11 to 20
Unit test-III	From 20 to 30

PHYSICS LAB

Course code	Course Title	No. Of periods/ week	Total No. of Periods/Y ear	FA Marks	SA Marks	Credits
26CM109L	PHYSICS LAB	3	90	20	30	1.5

Note: For the Physics laboratory, half of the first-year students of each programme will attend, while the remaining half will attend the Chemistry laboratory. Thus, both laboratories will be engaged simultaneously during the 3-hour lab session.

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	COs
1.	Vernier calipers	03 + 03	CO1
2.	Micrometer (Screw gauge)	03 + 03	
3.	Verification of Lami's theorem using concurrent forces	03 + 03	
	Revision	03 + 03	
4.	Determination of 'g' using simple pendulum	03 + 03	CO2
5.	Focal length and focal power of convex lens by distant object method and U-V method	03 + 03	
6.	Verification of Boyle's law using Quill tube	03 + 03	
	Revision	03 + 03	
7.	Drawing of magnetic lines of force	03 + 03	CO3
8.	Resonance apparatus–Determination of velocity of sound in air	03 + 03	
9.	Refractive index of a solid using travelling microscope	03 + 03	
	Revision	03 + 03	
	Experiments for demonstration		
10.	Meter bridge–Determination of resistance and specific resistance of material of given wire	03 + 03	CO4
11.	Projectile motion- study the range of a projectile for different launch angles	03 + 03	
12.	Generation of Beats using water columns	03 + 03	
	Total	45+ 45	

COURSE OBJECTIVES

Upon completion of the course the student shall be able to

(i)	Apply practical physics principles to operate, troubleshoot, and optimize engineering devices.
(ii)	Develop scientific skills through designing, conducting, and evaluating industry-relevant experiments to enhance technical proficiency.

COURSE OUTCOMES

CO1	CM109.1	Apply measurement techniques to improve accuracy; Explain forces maintaining equilibrium in physical systems.
CO2	CM109.2	Determine acceleration due to gravity experimentally; Investigate refraction of light at curved surfaces; Relate the gas pressure to volume variations at constant temperature.
CO3	CM109.3	Analyze the combined effect of magnetic fields (Earth and artificial magnet); Determine velocity of sound in air using resonance; Demonstrate U-V method to understand the refraction of light at curved surfaces.
CO4	CM109.4	Apply Kirchhoff's laws to compute the resistivity of a wire; Examine the projectile motion parameters; Observe and Interpret beat generation phenomenon.

LEARNING OUTCOMES

1. Apply measurement techniques using Vernier Calipers to determine the volumes of a cylinder and a sphere.
2. Use a screw gauge to measure and determine the thickness of a glass plate and the cross-sectional area of a wire.
3. Verify Lami's Theorem by analysing a system of concurrent forces.
4. Conduct simple pendulum experiment to calculate the acceleration due to gravity (g) and interpret the result through an $L-T^2$ graph.
5. Determine the focal length and power of a convex lens using distant object method and U-V method, and compare the results.
6. Verify Boyle's Law using a Quill tube by noting pressure (P) and length of air column(L).
7. Illustrate the behaviour of lines of magnetic field around a bar magnet using magnetic compass.
8. Determine the velocity of sound in air at room temperature and at 0°C using resonance apparatus.

9. Determine the refractive index of a solid by using the measurements taken with a travelling microscope.
10. Demonstrate the use of a meter bridge to determine the resistance and specific resistance of a given wire.
11. Simulate projectile motion and observe the range of the projectile for different launch angles using appropriate experimental setup.
12. Demonstrate the phenomenon of beats by creating beat patterns using water columns.

CO-PO MAPPING

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3	1	1	1	1	1	1
CO2	3	1	1	1	1	1	1
CO3	3	1	1	1	1	-	1
CO4	3	1	1	2	1	-	1
Average	3	1	1	1.25	1	1	1

3 = strongly mapped, 2 = moderately mapped, 1 = slightly mapped

Note: The gaps in CO and PO mapping will be achieved by one or more appropriate activities from the following.

- (i) Seminars
- (ii) Viva-voce
- (iii) Assignments
- (iv) Quiz competitions
- (v) Industrial visits
- (vi) Techfest
- (vii) Mini project
- (viii) Group discussions
- (ix) Virtual labs
- (x) Library visit for e-books, etc.

COURSE CONTENT

Name of the Experiment	Competencies (Revised Bloom's Taxonomy)	Key Competencies (Revised Bloom's Taxonomy)
1. Practice on Vernier Calipers	<ul style="list-style-type: none"> • Determine the least count • Place the object in accurate position. • Interpret scale readings • Calculate volume of cylinder and sphere 	<ul style="list-style-type: none"> • Interpret Vernier readings • Compute volume using appropriate formulae • Apply measurement data to calculate physical quantities
2. Practice on Screw Gauge	<ul style="list-style-type: none"> • Determine the least count and zero error • Place the object in accurate position. 	<ul style="list-style-type: none"> • Analyze scale readings for zero error • Compute thickness and area from

	<ul style="list-style-type: none"> • Interpret scale readings • Calculate thickness and cross-sectional area 	<ul style="list-style-type: none"> • measurements • Apply micrometer data to solve practical problems
3. Verification of Lami's Theorem	<ul style="list-style-type: none"> • Setup experimental arrangement • Apply appropriate weights • Measure angles between forces • Analyze data to verify theorem 	<ul style="list-style-type: none"> • Interpret directions and angles of forces • Evaluate force relationships • Validate Lami's Theorem using experimental data
4. Simple Pendulum	<ul style="list-style-type: none"> • Arrange the pendulum properly • Measure the time taken for 20 oscillations • Compute time period and acceleration due to gravity • Plot $L-T^2$ graph 	<ul style="list-style-type: none"> • Measure oscillation intervals accurately • Calculate g using experimental data • Interpret $L-T^2$ graph to confirm relationship
5. Focal Length and Power of Convex Lens	<ul style="list-style-type: none"> • Place the object and convex lens in proper positions. • Measure image distance • Compute focal length and power 	<ul style="list-style-type: none"> • Determine focal length using both methods • Validate optical formulae using experiment
6. Boyle's Law Verification	<ul style="list-style-type: none"> • Record atmospheric pressure • Measure air column length and calculate the enclosed pressure • Analyze data for $P \times L$ consistency 	<ul style="list-style-type: none"> • Setup quill tube in different positions for multiple readings • Interpret pressure-length data
7. Drawing of Magnetic Lines of force	<ul style="list-style-type: none"> • Draw meridian and set magnet orientation • Sketch the lines of magnetic field using compass. 	<ul style="list-style-type: none"> • Visualize field pattern accurately • Analyze field symmetry
8. Velocity of Sound – Resonance Method	<ul style="list-style-type: none"> • Assemble apparatus and adjust reservoir • Identify resonating lengths • Calculate velocity of sound at room temperature and at 0°C. 	<ul style="list-style-type: none"> • Detect resonance points • Compute velocity using resonance data • Extrapolate to standard temperature
9. Refractive Index of a solid using Traveling Microscope	<ul style="list-style-type: none"> • Determine least count • Measure real and apparent thickness • Calculate refractive index 	<ul style="list-style-type: none"> • Analyze scale readings • Apply refraction formula • Interpret refractive index of a solid.

10. Meter Bridge	<ul style="list-style-type: none"> • Connect circuit properly • Measure balancing length, radius of given wire • Compute resistance and specific resistance 	<ul style="list-style-type: none"> • Analyze circuit behavior • Calculate unknown resistance • Interpret experimental values for resistivity
11. Projectile motion- study the range of a projectile for different launch angles	<ul style="list-style-type: none"> • Setup and align launcher • Adjust launch angles • Measure range 	<ul style="list-style-type: none"> • Observe the variations in horizontal range for different angles of projection. • Evaluate trajectory data
12. Generation of Beats using water columns	<ul style="list-style-type: none"> • Setup beat source using glasses or online tone generator • Generate close frequencies • Detect and analyze beat pattern 	<ul style="list-style-type: none"> • Observe frequency interference • Interpret beat frequency data • Analyze patterns using mobile sensors/ software

COURSE OBJECTIVES

Upon completion of the course the students shall be able

(i)	To Perform fundamental analytical chemistry techniques, identify chemical substances using sensory cues and accurately prepare standard solutions.
(ii)	To Evaluate and judge the neutralization point in acid base titration.
(iii)	To Evaluate the endpoint of reduction and oxidation reaction.
(iv)	To Judge the stable end point of complex formation, stable precipitation.
(v)	To Determine the pH of compounds, demonstrate copper deposition using electrolysis, and the working of a galvanic cell.

COURSE OUTCOMES

CO1	CM110.1	Perform fundamental analytical chemistry techniques, identify chemical substances using sensory cues and accurately prepare standard solutions.
CO2	CM110.2	Evaluate and judge the neutralization point in acid base titration.
CO3	CM110.3	Evaluate the endpoint of reduction and oxidation reaction.
CO4	CM110.4	Judge the stable end point of complex formation, stable precipitation.
CO5	CM110.5	Determine the pH of compounds, demonstrate copper deposition using electrolysis, demonstrate the working of a galvanic cell.

LEARNING OUTCOMES

- 1.0 Practice volumetric measurements (using pipettes, measuring jars, volumetric flask, burettes) and gravimetric measurements (using different types of balances), making dilutions, etc.
- 2.0 Identify the chemical compounds and solutions by senses.
- 3.0 Practice making standard Na_2CO_3 solutions.
- 4.0 Conduct titrations adopting standard procedures and using standard NaOH solution for estimation of HCl.
- 5.0 Conduct titrations adopting standard procedures to determine the alkalinity of given samples of water (one ground water and one surface / tap water) using standard H_2SO_4 solution.
- 6.0 Conduct titrations adopting standard procedures and using standard KMnO_4 solution for estimation of Mohr's Salt.

- 7.0** Conduct titrations adopting standard procedures to determine the total hardness of given samples of water (one ground water and one surface / tap water) using standard EDTA solution.
- 8.0** Conduct titrations adopting standard procedures to determine the chlorides present in the given samples of water (one ground water and one surface / tap water) and waste water by using standard AgNO₃ solution.
- 9.0** Conduct the test on given samples of water / solutions (like soft drinks, sewage etc.) to determine their pH using pH paper, Universal indicator, digital pH meter.
- 10.0** Demonstrate the electrolysis process of Copper deposited on an object.
- 11.0** Understand the construction and working principle of a Galvanic cell and identify how chemical energy is converted into electrical energy through redox reactions.
- 12.0** Collect water sample from nearby water body and test for any two parameters. [Parameters – Alkalinity, Hardness, Chloride and pH]
- 13.0** Collect water sample from nearby sewage/industrial effluent and test for any two parameters. [Parameters – Alkalinity, Hardness, Chloride and pH]

CO – PO/PSO MAPPING

26CM111L	COMPUTER & DIGITAL SKILLS LAB	3	90	40	60	3

TIME SCHEDULE

S.No.	Chapter / Unit Title	No. of Periods	COs Mapped
1.	Computer hardware and Software Basics	3	CO1
2.	Windows Operating System	3	CO1
3.	MS Word	18	CO2
4.	MS Excel	21	CO3
5.	MS PowerPoint	18	CO4
6.	AI, ML & Quantum computing Tools	27	CO5
Total		90	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To familiarize with basics of Computer Hardware and Software.
(ii)	To familiarize with operating systems.
(iii)	To familiarize with Microsoft word.
(iv)	To familiarize with Microsoft Excel.
(v)	To familiarize with Microsoft PowerPoint.
(vi)	To familiarize with AI, ML, Quantum Computing Tools.

COURSE OUTCOMES

CO1	CM111.1	Identify hardware and software components
CO2	CM111.2	Prepare documents with given specifications using wordprocessing software.
CO3	CM111.3	Use Spread sheet software to make calculations and to draw various graphs / charts.

CO4	CM111.4	Use Power point software to develop effective presentation for a given theme or topic.
CO5	CM111.5	To use basic AI, ML & Quantum Computing Tools.

LEARNING OUTCOMES

I. Computer Hardware and Software Basics

1.
 - a). To get familiarized with Computer system and hardware connections.
 - b). To start and Shut down Computer correctly.
 - c). To explore Windows Desktop.
2. To check the software details of the computer.
3. To check the hardware present in your computer.

II. Windows's operating system

4. To work with Files and Folders.
5. To use Windows Accessories: Calculator – Notepad – WordPad – MS Paint.

III. MS-WORD

6. To get familiarized with Ribbon layout of MS Word.
7. To perform basic word processing.
8. To use basic formatting techniques.
9. To insert a table of required number of rows and columns.
10. To insert Objects, Clipart and Hyperlinks.
11. To use Mail Merge feature of MS Word.
12. To use Equations and symbols features.

IV. MS-EXCEL

13. To get familiarized with MS-EXCEL ribbon layout.
14. To access and enter data in the cells.
15. To edit a spread sheet- Copy, Cut, Paste, and selecting Cells.
16. To use built in functions and Data Formatting.
17. To create Excel Functions, use autofill feature.
18. To enter a Formula for automatic calculations.
19. To sort and filter data in sheet.
20. To present data using Excel Graphs and Charts.
21. To format a Worksheet in Excel for printing using Page layout.
22. To develop lab report formats of respective discipline.

V. Practice with MS-POWERPOINT

23. To get familiarized with Ribbon layout features of PowerPoint.
24. To create a simple PowerPoint Presentation.
25. To set up a Master Slide in PowerPoint.
26. To insert Text and Objects.
27. To insert Flow Charts.
28. To insert Tables.
29. To insert Charts/Graphs.
30. To insert video, audio & hyperlinks.
31. To animate text, objects and slides.

32. To Review Presentations.

VI. AI, ML & Quantum Computing Tools

- 33. To get familiarized with AI Tools.
- 34. To get familiarized with working of ChatGPT.
- 35. Identify Objects using AI Tools based on CNN, YOLO, SSD, R-CNN.
- 36. To paraphrase text using AI Tools (PEGASUS, GPT, T5).
- 37. To use text-to-Image Generation AI Tools (DALL-E, MIDJOURNEY).
- 38. To use voice command simulation AI Tools (SPEECH-TO-TEXT).
- 39. To get familiarized with ML Tools.
- 40. To get familiarized with Quantum Computing Tools.
- 41. To familiarize with quantum bits (qubits) using Dirac notation.
- 42. To familiarize the behaviour of single and multiple qubit gates.
- 43. To familiarize with Qubit as a Coin / Spin Analogy.

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	1	2	1	1	2	1	2	3	1	1
CO2	2	2	3	3	2	2	2	3	2	1

3=Strongly mapped, 2=moderately mapped, 1=slightly mapped

Key competencies

Exp/ Task/ Ex No.	Name of Experiment /Task /Exercise	Objectives	Key competencies
1(a).	To get familiarized with Computer system and hardware connections	a. Connect cables to external hardware and operate the computer	a. Identify the parts of a computer system: i). CPU ii). Mother Board iii) Monitor iv) CD/DVD Drive v) Power Switch vi) Start Button vii) Reset Button viii) RAM ix) SSD /HDD. b. Identify and connect various peripherals. c. Identify and connect the cables used with computer system. d. Identify various ports on CPU cabinet and connect Keyboard, Mouse and peripherals.
1(b).	Start and Shut down Computer correctly	a. Login and logout as per the standard procedure b. Operate mouse & Key Board	a. Log in using the password b. Start and shut down the computer c. Use Mouse and Key Board

1(c).	Explore Windows Desktop	<ul style="list-style-type: none"> a. Access application programs using Start menu b. Use taskbar and Task manager 	<ul style="list-style-type: none"> a. Familiarity with Start Menu, Taskbar, Icons and Shortcuts b. Access application programs using Start menu, Task manager c. Use Help support
2.	Check the software details of the computer System	<ul style="list-style-type: none"> a. Access the properties of computer and to find the details 	<ul style="list-style-type: none"> a. Finding the details of operating system being used b. Finding the details of edition/version Service Pack installed
3.	Check the hardware present in your computer	<ul style="list-style-type: none"> a. Access device manager and to find the details b. Type /Navigate the correct path and Select icon related to the details required 	<ul style="list-style-type: none"> a. Finding the CPU name and clock speed b. Finding the details of RAM and hard disk present c. Accessing Device manager using Control Panel and check the status of devices like mouse and key board d. Using My Computer to check the details of Hard drives and partitions
4.	Working with Files and Folders	<ul style="list-style-type: none"> a. Create files and folders b. Rename, arrange and search for the required folder/file c. Restore deleted files from Recycle bin 	<ul style="list-style-type: none"> a. Create folders and organize files in different folders b. Use cut, copy and paste commands to organize files and folders c. Arrange icons by name, size, type and Modified d. Search for a file or folder and find its path e. Create shortcut to files and folders (in other folders) on Desktop f. Familiarity with the use of My Documents g. Familiarity with the use of Recycle Bin
5.	Use Windows Accessories like Calculator – Notepad – WordPad – MS Paint	<ul style="list-style-type: none"> a. Use windows accessories and select correct text editor based on the situation. b. Use MS paint to create /Edit pictures and save in the required format 	<ul style="list-style-type: none"> a. Access Calculator using Run command b. Familiarity with the use of Calculator c. Create Text Files using Notepad, WordPad and observe the difference in file sizes. d. Use MS paint to create .jpeg, .bmp files
6.	Get familiarized with Ribbon layout of MS word.	<ul style="list-style-type: none"> a. Create a Document and name appropriately and save it b. Set paper size and print options 	<ul style="list-style-type: none"> a. Create/Open a document b. Use Save and Save as features c. Work on two Word documents simultaneously d. Choose correct Paper size

			and Printing options
7.	Perform basic Word Processing	<ul style="list-style-type: none"> a. Use key board and mouse to enter/edit text in the document. b. Use shortcuts c. use Spell / Grammar Check features for auto corrections 	<ul style="list-style-type: none"> a. Typing text b. Keyboard usage c. Mouse Usage (Left click / Right click / Scroll) d. Using Keyboard shortcuts e. Using Find and Replace features in MS- word f. Use Undo and Redo Features g. Use spell check to correct Spellings and Grammar
8.	Use basic formatting techniques	<ul style="list-style-type: none"> a. Format Text and paragraphs and using various text styles. b. Use bullets and numbers to create lists. c. Use Templates /Themes d. Insert page numbers, date, headers and footers 	<ul style="list-style-type: none"> a. Formatting Text b. Formatting Paragraphs c. Setting Tabs d. Formatting Pages e. Use various Font Styles f. Insert bullets and numbers g. Using Themes and Templates h. Insert page numbers, header and footer
9.	Insert a table of required number of rows and columns	<ul style="list-style-type: none"> a. Insert table in the word document and edit b. Use sort option for arranging data. 	<ul style="list-style-type: none"> a. Editing the table by adding the fields, deleting rows and columns, inserting sub table, marking borders. Merging and splitting of cells in a Table b. Changing the background color of the table c. Using table design tools d. Using auto fit – fixed row/ column height/length – Even distribution of rows / columns feature e. Converting Text to table and Table to Text f. Use Sort feature of the Table to arrange data in ascending/ descending order
10.	Insert objects, clipart and Hyperlinks	<ul style="list-style-type: none"> a. Insert hyperlinks & Bookmarks b. Create organization charts/flow charts 	<ul style="list-style-type: none"> a. Creating a 2-page document and Insert hyperlinks and Bookmarks. b. Creating an organization chart c. Preparing an Examination schedule notice with a hyperlink to Exam schedule table.
11.	Use Mail merge feature of MS Word	Using Mail merge feature	<ul style="list-style-type: none"> a. Using mail merge to prepare individually addressed letters b. Using mail merge to print envelopes.

12.	Use Equations and symbols features.	Enter Mathematical symbols and Equations in the word document	<ul style="list-style-type: none"> a. Exploring various symbols available b. Inserting a symbol in the text c. Inserting mathematical equations in the document
13.	Get familiarized with MS Excel Ribbon layout	<ul style="list-style-type: none"> a. Get familiarized with excel layout b. Use various features available in toolbar 	<ul style="list-style-type: none"> a. Open /create an MS Excel spread sheet and familiarity with MS Excel layout b. Use Quick Access Toolbar, Title Bar, Worksheets, Formula Bar, Status Bar
14.	Access and Enter data in the cells	<ul style="list-style-type: none"> a. Access and select the required cells by various addressing methods b. Enter and edit data 	<ul style="list-style-type: none"> a. Moving around a Worksheets using Quick access toolbar b. Selecting Cells, Entering Data-Editing a Cell, Wrapping of Text-Deleting a Cell Entry, Saving a File, Closing Excel
15.	Edit spread sheet select, Copy, Cut, Paste	Format the excel sheet	<ul style="list-style-type: none"> a. Inserting and Deleting Columns and Rows b. Creating Borders c. Merging and aligning center d. Adding background Color Changing the Font, Font Size, and Font Color e. Formatting text with Bold, Italicize, and Underline f. Working with Long Text, Change a Column's Width
16.	Use built in functions and Format Data	Use built in functions in Excel	<ul style="list-style-type: none"> a. Performing Mathematical Calculations b. Verification AutoSum c. Perform Automatic Calculations d. Aligning Cell Entries
17.	Create Excel Functions, Fill Cells	<ul style="list-style-type: none"> a. To Create Excel sheets involving cross references and equations b. Using the advanced functions for conditional calculations 	<ul style="list-style-type: none"> a. Using Reference Operators b. Working with sum, Sum if, Count and CountIf Functions c. Filling Cells Automatically
18.	Enter a Formula for automatic calculations	Enter formula for automatic calculations	<ul style="list-style-type: none"> a. Entering formulae b. Using Cell References in Formulae c. Using Automatic updating function of Excel Formulae d. Using Mathematical Operators in Formulae e. Using Excel Error Message and Help
19.	Sort and filter data in sheet.	<ul style="list-style-type: none"> a. Refine the data in a worksheet and keep it organized. b. Narrow a worksheet by 	<ul style="list-style-type: none"> a. Sorting data in multiple columns b. Sorting data in a row c. Sorting data using Custom order Filter data in work sheet

		selecting specific choice	
20.	Practice Excel Graphs and Charts	a. Use data in Excel sheet to Create technical charts and graphs b. Prepare various graphs from data.	a. Using data in sheets for getting charts. b. Producing various charts.
21.	Format a Worksheet in Excel, use page setup and print features	Format Excel sheet, Insert headers & footers and print	a. Shading alternate rows of data b. Adding currency and percentage symbols c. Changing height of a row and width of a column d. Changing data alignment e. Inserting Headers and Footers f. Set Print Options and Printing.
22.	Develop lab report formats of respective discipline	Use Headers/Footers/Page Numbers for preparing reports	Creating Lab reports using MS Excel
23.	Get familiarized with Ribbon layout & features of PowerPoint.	Access required options in the tool bar	Explore and use various options in PowerPoint a. Home b. Insert c. Design d. Animation e. Slideshow f. View g. Review
24.	Create a simple PowerPoint Presentation	a. Create simple PowerPoint presentation with photographs/ClipArt and text boxes b. Use bullets option	a. Inserting a New Slide into PowerPoint b. Changing the Title of a PowerPoint Slide c. Using Bullets in PowerPoint d. Adding an Image to a PowerPoint Slide e. Adding a Textbox to a PowerPoint slide
25.	Set up a Master Slide in PowerPoint and add notes	a. Setup Master slide and format b. Add notes to master slide.	a. Creating a PowerPoint Design Template b. Modifying themes c. Switching between Slide master view and Normal view d. Formatting a Design Template for Master Slide e. Adding a Title Slide to a Design Template f. Using the Slide Show g. Adding Notes to a

			PowerPoint Presentation slide
26.	Insert Text and Objects	a. Insert Text and Objects. b. Use 3d features	a. Inserting Text and objects b. Setting Indents and line spacing c. Inserting pictures/ clipart d. Formatting pictures e. Inserting shapes and word art f. Using 3d features to Arrange objects
27.	Create Flow Charts / Organizational Charts	Create organizational charts and flow charts using smart art	a. Creating a Flow Chart in PowerPoint b. Grouping and Ungrouping Shapes c. Use smart art
28.	Insert Tables	Insert tables and format	a. Using Tables in PowerPoint b. Formatting the Table Data c. Changing Table Background
29.	Insert Charts/Graphs	Create charts and Bar graphs, Pie Charts and format.	a. Creating 3D Bar Graphs in PowerPoint b. Working with the PowerPoint Datasheet c. Formatting a PowerPoint Chart Axis d. Formatting the Bars of a Chart e. Creating PowerPoint Pie Charts f. Using Pie Chart Segments g. Creating 2D Bar Charts in PowerPoint h. Formatting the 2D Chart i. Formatting a Chart Background
30.	Insert audio & video, Hyperlinks in a slide and Add narration to the slide	a. Insert Sounds and Video in appropriate format. b. Add narration to the slide. c. Use hyperlinks to switch to different slides and files	a. Inserting sounds in the slide and hide the audio symbol b. Adjusting the volume in the settings c. Inserting video file in the format supported by PowerPoint in a slide d. Using automatic and on click options e. Adding narration to the slide Insert Hyperlinks
31.	Create Animation effects	Add animation effects	a. Applying transitions to slides b. Using special animation effects like Entrance, Emphasis, Motion Paths & Exit as per requirement.

32.	Reviewing presentation	<ul style="list-style-type: none"> a. Use Spell and Grammar check feature b. Setup slide show c. Add timing to the slides d. Setup automatic slide show 	<ul style="list-style-type: none"> a. Checking spelling and grammar b. Previewing presentation c. Setting up slide show d. Setting up resolution e. Using Rehearse Timing feature in PowerPoint f. Using PowerPoint Pen Tool during slide show g. Saving h. Printing presentation Slides as Hand- out
33	Familiarizing with AI Tools	<p>Introductions of AI tools and their applications.</p> <p>Understand the basic use cases and functionality of AI tools (like ChatGPT, Google Gemini, Teachable Machine, etc.).</p>	<ul style="list-style-type: none"> a) Grasping the concept of Artificial Intelligence and how tools mimic human thinking or behavior. b) Identifying and interacting with AI tools such as: <ul style="list-style-type: none"> ChatGPT (natural language processing), Google Teachable Machine (image/audio classification), DALL·E / Bing Image Creator (AI art), Grammarly / Quillbot (AI-based writing assistants).
34	Usage of ChatGPT	<ul style="list-style-type: none"> a) Introduction to ChatGPT, an AI-powered conversational assistant. b) To explore ChatGPT's capabilities in answering questions, generating content, and solving problems. 	<ul style="list-style-type: none"> a) Operating the ChatGPT interface (web or app), input prompts, and interpret outputs. b) Using ChatGPT to generate summaries, ideas, code snippets, explanations, emails, etc. c) Evaluating the relevance and accuracy of ChatGPT's responses.
35	Object identification using AI Tools based on CNN, YOLO, SSD, R-CNN	<ul style="list-style-type: none"> a. Get awareness about object detection techniques using AI. b. To explore how AI tools based on CNN, YOLO, SSD, and R-CNN detect and classify objects in images/videos. 	<ul style="list-style-type: none"> a) Differentiating object detection from image classification. b) Using web-based AI tools or platforms that demonstrate object detection (e.g., Teachable Machine, Roboflow, Edge Impulse, Hugging Face Demos).

			c) Observing and comparing the speed, accuracy, and bounding box behavior of different models.
36	Paraphrase text using AI Tools(PEGASUS,GPT, T5)	<p>a. Get awareness about AI-powered text paraphrasing techniques.</p> <p>b. To explore the usage and functioning of transformer-based models like PEGASUS, GPT, and T5</p>	<p>a) Recognizing of Natural Language Processing (NLP) tasks and how transformer models like PEGASUS, GPT, and T5 can be used.</p> <p>b) Using AI tools to generate reworded versions of sentences or paragraphs while retaining the original meaning.</p> <p>c) Interacting with user-friendly interfaces like:</p> <ul style="list-style-type: none"> • Hugging Face demos • ChatGPT • Quillbot • Parrot.ai
37	Text-to-Image Generation using AI Tools (DALL-E, MIDJOURNEY)	<p>a) Get awareness about text-to-image generation using advanced AI models.</p> <p>b) To explore the usage of tools like DALL·E and Mid journey convert text prompts into realistic or artistic images.</p>	<p>a. Learning usage of how AI models generate visual content from natural language prompts.</p> <p>b. Formulating effective, clear, and creative text prompts to generate meaningful images.</p> <p>c. Enhancing creative thinking by translating ideas into visual representations using AI.</p> <p>d. Analyzing and comparing output quality, style, and relevance between DALL·E and Midjourney.</p>
38	Voice Command Simulation using AI Tools (SPEECH-TO-TEXT)	Get awareness about Speech-to-Text (STT) technology and its role in AI-powered voice recognition systems.	<p>a. Using AI tools to generate text from speech.</p> <p>b. Reading prompts and commands to analyze how accurately the tool transcribes voice.</p> <p>c. Using voice to simulate commands such as opening files, dictating emails, or interacting with virtual assistants.</p>

39	Usage of ML Tools	<p>a) To use ML tools for suitable real-world applications</p> <p>b) To use popular ML tools and platforms through simple, hands-on demonstrations.</p>	<p>a. Understanding key ML terms like dataset, training, testing, classification, prediction, and accuracy.</p> <p>b. Learning to use beginner-friendly ML tools such as:</p> <ul style="list-style-type: none"> • Teachable Machine by Google (image/audio recognition) • Microsoft Lobe (no-code image classification) • Weka (GUI-based ML toolkit) • IBM Watson Studio (visual data workflows)
40	Usage of Quantum Computing Tools	To explore and interact with quantum computing simulation tools and platforms.	<p>a. Understanding key terms: Qubit, Superposition, Entanglement, Quantum Gate, Quantum Circuit.</p> <p>b. Navigate and use beginner-friendly quantum computing tools:</p> <ul style="list-style-type: none"> • IBM Quantum Experience (IBM Q / Qiskit) • Microsoft Quantum Development Kit • Quirk (online quantum circuit simulator) • Quantum Playground by Google
41	To familiarize with quantum bits (qubits) using Dirac notation	<p>a) To introduce the concept of a qubit as the fundamental unit of quantum information.</p> <p>b) To understand the representation of qubits using Dirac (bra-ket) notation.</p>	<ul style="list-style-type: none"> • Identify and interpret the basic qubit states: <ul style="list-style-type: none"> • $0\rangle = \begin{bmatrix} 1 \\ 0 \end{bmatrix}$ • $1\rangle = \begin{bmatrix} 0 \\ 1 \end{bmatrix}$ • Understand that a qubit can exist in a superposition: <ul style="list-style-type: none"> • $\psi\rangle = \alpha 0\rangle + \beta 1\rangle$, where α and β are complex numbers and $\alpha ^2 + \beta ^2 = 1$ <p>a) Learn how to write and read quantum states using the ket (\rangle) and bra (\langle) notations.</p> <p>b) Understand the purpose of $\langle \psi$ and how it represents a dual vector in quantum mechanics.</p>
42	To familiarize the behavior of single and multiple qubit gates.	To understand the concept of quantum gates and their role in quantum circuits.	<p>a) Recognize the function and MAPPING representation of:</p> <ul style="list-style-type: none"> • Single-qubit gates: <ul style="list-style-type: none"> ○ Pauli-X (NOT): flips $0\rangle \leftrightarrow 1\rangle$ ○ Hadamard (H): creates superposition ○ Pauli-Z: applies a phase flip

			<ul style="list-style-type: none"> • Multi-qubit gates: <ul style="list-style-type: none"> ○ CNOT: flips target qubit based on control ○ Toffoli (CCNOT): controlled-controlled NOT ○ SWAP: exchanges the states of two qubits
43	To familiarize with Qubit as a Coin / Spin Analogy	<p>a) To introduce the concept of a qubit using intuitive physical analogies.</p> <p>b) To help students understand quantum superposition through the coin toss or spin-$\frac{1}{2}$ particle analogy.</p>	<p>a. Relate a qubit in superposition to a coin spinning in the air:</p> <ul style="list-style-type: none"> • Classical coin: heads (0) or tails (1) • Spinning coin: both until observed ($0\rangle$ and $1\rangle$ at once) <p>b. Use spin analogy: a particle with spin "up" ($0\rangle$) or "down" ($1\rangle$), or in between (superposition)</p>

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Introduction to Object Oriented Programming (OOP)	15	14	2	1	CO1
2.	Introduction to Data Structures	20	22	2	2	CO2
3.	Linear Data structure-Linked lists	20	25	3	2	CO3
4.	Linear Data structure –Stacks	15	14	2	1	CO4
5.	Queues and Trees	20	25	3	2	CO5
Total		90	100	12	8	

COURSE OBJECTIVES

At the end of the course students will be able

(i)	To know the fundamentals of OOP.
(ii)	To know the various types of Data Structures.
(iii)	To familiarize with the representation of Data Structures.
(iv)	To use various Data structures in organizing data.
(v)	To reinforce theoretical concepts by writing relevant programs

COURSE OUTCOME

CO1	CM301.1	Know about Object oriented programming concepts.
CO2	CM301.2	Illustrate various techniques of sorting and searching.
CO3	CM301.3	Explain the operations on Various Linked Lists.
CO4	CM301.4	Apply the operations of Stack.
CO5	CM301.5	Explain the operations of Queues and Apply Binary tree traversal techniques.

LEARNING OUTCOMES

1. Introduction to Object Oriented Programming (OOP)

- 1.1 Define OOP.
- 1.2 Differentiate between Procedural Oriented Programming (POP) and Object-Oriented Programming (OOP).
- 1.3 List and Explain the core principles of OOP.
- 1.4 State the importance of Data Abstraction and Encapsulation.
- 1.5 Describe Inheritance and Polymorphism.
- 1.6 Define Class and Object in Python.
- 1.7 Know the creation of classes in Python.
- 1.8 Know the creation of objects (instances) in Python.
- 1.9 State the importance of `__init__` method (constructor) and `self`.
- 1.10 Explain Method Overloading.
- 1.11 Explain Method Overriding.
- 1.12 Explain various types of inheritance.

2. Introduction to Data Structures

- 2.1 Define Data structure.
- 2.2 List various types of Data Structures.
- 2.3 Explain Linear Data Structures.
- 2.4 Explain Non-Linear Data Structures.
- 2.5 Know about Time and Space complexities.
- 2.6 List and Explain Abstract Data Types.
- 2.7 List and Explain Built-in data structures.
- 2.8 Various Sorting Techniques.
 - 2.8.1 Define Sorting.
 - 2.8.2 List the methods of Sorting.
 - 2.8.3 Explain Bubble Sort.
 - 2.8.4 Explain Selection Sort.
 - 2.8.5 Explain Insertion Sort.
 - 2.8.6 Explain Quick Sort.
 - 2.8.7 Explain Merge Sort.
- 2.9 Various Searching Techniques.
 - 2.9.1 Define Searching.
 - 2.9.2 List types of Searching Techniques.
 - 2.9.3 Explain Linear Search with Recursion and without Recursion.
 - 2.9.4 Explain Binary Search with Recursion and without Recursion.

3. Linear Data structure: Linked lists

- 3.1 Explain arrays in Python.
- 3.2 Explain the following for Singly Linked List.
 - 3.2.1 Creation.
 - 3.2.2 Perform insertion, deletion and traverse operations.
 - 3.2.3 Perform search and replace an element.
- 3.3 Explain the following for Doubly Linked List.
 - 3.3.1 Creation.
 - 3.3.2 Perform insertion, deletion, and traverse operations.
 - 3.3.3 Perform search and replace an element.
- 3.4 Explain the following for Singly Circular List.
 - 3.4.1 Creation.

- 3.4.2 Perform insertion, deletion, and traverse operations.
- 3.4.3 Perform search and replace an element.
- 3.5 Explain the following for Doubly Circular List.
 - 3.5.1 Creation.
 - 3.5.2 Perform insertion, deletion and traverse operations.
 - 3.5.3 Perform search and replace an element.
- 3.6 Differentiate between arrays and linked lists.

4. Linear Data Structures-Stacks

- 4.1 Define Stack.
- 4.2 Explain the push, pop and display operations of a Stack.
 - 4.2.1 Explain implementation of a Stack using built-in functions in python.
 - 4.2.2 Explain implementation of a Stack without using built-in functions.
- 4.3 Explain Linked List implementation of a Stack with various operations.
- 4.4 List the applications of Stacks.
- 4.5 Convert Infix expression to Postfix expression.
- 4.6 Explain the steps for Conversion of Infix expression to Postfix expression with program.
- 4.7 Explain the steps for Evaluating Postfix expression with program.
- 4.8 Evaluate Postfix expression.

5. Queues and Trees

- 5.1 Define Queue.
- 5.2 Explain the insertion, deletion and display operations on Queues.
- 5.3 Explain the implementation of a Queue using built-in functions in python.
- 5.4 Explain the implementation of a Queue without using built-in functions.
- 5.5 Explain Linked List implementation of a Queue with various operations.
- 5.6 Explain the implementation of a Circular Queue.
- 5.7 List the application of Queues.
- 5.8 Non-Linear Data Structures-Trees:
 - 5.8.1 Define a Tree.
 - 5.8.2 Know about Root, Edge, Parent, Child, Siblings, Leaf, Internal nodes, Degree, Level, Height, Depth, Path, Sub tree, Forest.
 - 5.8.3 Define Binary Tree.
 - 5.8.4 Differentiate between General Tree and Binary Tree.
 - 5.8.5 Define Binary Search Tree.
 - 5.8.6 Perform various traversals on Binary Search Trees.
 - 5.8.7 Construct a Binary Tree using In-order and Preorder Traversals.
 - 5.8.8 Construct a Binary Tree using In-order and Post-order Traversals.
 - 5.8.9 Perform insertion, deletion, search and various traversal operations on a Binary Search Tree.

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	2	1	2	2	1	1	2	1	3

CO2	2	2	1	2	2			2	2	2

CO4	2	2	1	1	1			2	3	1
CO5	2	2	1	2	2	1	1	2	2	3
Average	2.2	2.2	1	2	2	1	1	2	2	2

3=Strongly mapped, 2=moderately mapped, 1=slightly mapped

COURSE CONTENT

1. Concepts of Object-Oriented Programming: Introduction to OOP – difference between procedural oriented programming (POP) and object-oriented programming (OOP) – core principles of OOP – Abstraction and Encapsulation – inheritance and Polymorphism – class and object in Python – creation of classes in Python – creation of objects in Python – `__init__` method (constructor) and `self` – Method Overloading – Method Overriding – various types of inheritance.

2. Introduction to Data Structures: Data structure – types of Data Structures – Time and Space complexities – Data Types and Abstract Data Types – Built-in data structures such as Lists, Tuples, Dictionaries, Sets – sorting techniques – Bubble sort, Selection sort, Insertion sort, Quick sort, Merge sort – Searching Techniques: linear and Binary.

3. Linear Data Structures – Linked Lists: Linked Lists – Types – Singly Linked Lists – Create, insert, delete, sort, search and replace an element in a linked list – Doubly Linked Lists – Create, insert, delete, sort, search and replace an element in a linked list – Define terms singly circular and doubly circular linked lists.

4. Linear Data Structures – Stacks: Stacks – Implementation of stacks – application of stacks – converting infix to postfix expression and postfix expression evaluation.

5. Queues and Trees: Queues – Implementation of queues – Application of queues – know about Circular queues and Priority queue. Trees – Trees Terminology – Binary trees – Representation – Binary Search Tree – various operations – Tree traversals.

TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED FOR UNIT TESTS I, II & III

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 to 3.3
Unit test-II	From 3.4 to 5.8.8

DATA BASE MANAGEMENT SYSTEMS

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM302T	DATA BASE MANAGEMENT SYSTEMS	6	90	30	70	4

TIME SCHEDULE

S.No.	Chapter/Unit Title	No.of Periods	Weightage of Marks	No.of Short Questions	No.of Essay Questions	COs Mapped
1.	Concepts of DBMS & RDBMS	20	22	2	2	CO1
2.	Concepts of SQL	20	25	3	2	CO2
3.	Basics of PL/ SQL	20	25	3	2	CO3
4.	Advance PL/SQL	15	14	2	1	CO4
5.	Concepts of NoSQL & MongoDB.	15	14	2	1	CO5
Total Periods		90	100	12	08	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To know the fundamentals of DBMS.
(ii)	To familiarize insert, retrieve, update, delete data in database.
(iii)	To familiarize programming skills for insert, retrieve, update, delete data in database.

COURSE OUTCOMES

CO1	CM302.1	Describe fundamentals, types and Overall structure of DBMS
CO2	CM302.2	Apply SQL commands to create, retrieve, update, delete data from the Relational data bases.
CO3	CM302.3	Describe PL/SQL programming constructs, control statements and sub programs.
CO4	CM302.4	Apply cursors, triggers and Exception handling concepts.
CO5	CM302.5	Use NOSQL database concepts and MongoDB data base concepts in designing database Schema.

LEARNING OUTCOMES

1.0 Concepts of DBMS & RDBMS

- 1.1 Define Database Management System (DBMS).
- 1.2 List the advantages of DBMS.
- 1.3 Explain Database Abstraction, Data Independence.
- 1.4 Define Instance and Schema.
- 1.5 Explain Data Models.
- 1.6 Define Database languages DDL, DML, TCL.
- 1.7 Explain Database Administrator, Users and Database System Architecture with diagram.
- 1.8 Define Entity, Entity sets, Relationship, Relationship sets, Super Key, Candidate Key and Primary Key, Foreign Key.
- 1.9 Explain Mapping Cardinalities.
- 1.10 List the symbols used in ER model.
- 1.11 Know The Entity-Relationship Model.
- 1.12 Reduce the ER-diagrams to tables.
- 1.13 Explain Generalization, Specialization & Aggregation.
- 1.14 Explain Functional Dependencies, Normalizations– 1 NF, 2 NF and 3NF.

2.0 Concepts of SQL

- 2.1 Explain SQL and benefits of SQL.
- 2.2 Explain literals & different data types like character, number, long, date, raw and long raw etc.
- 2.3 Illustrate the comments within SQL Statement.
- 2.4 Explain SQL Operators.
- 2.5 Describe Data Definition Language commands CREATE, ALTER and DROP.
- 2.6 Explain integrity constraints through creating a table and altering table.
- 2.7 Describe Data Manipulation Language commands INSERT, UPDATE and DELETE.
- 2.8 Explain SELECT statement with WHERE, ORDER BY, GROUP BY and HAVING clauses with examples.
- 2.9 List and explain single row (Number, character, date and conversion) functions.
- 2.10 List and Explain group functions.
- 2.11 Explain Transaction Control Commands COMMIT, SAVEPOINT, ROLLBACK, GRANT, and REVOKE.
- 2.12 Explain Subqueries with examples.
- 2.13 Explain Joins (Equi Join, Non-Equi Joins, Inner Join, Outer Join, cross join and Self join) with syntax and examples.

3.0 PL/SQL

- 3.1 Explain PL/SQL Block structure.
- 3.2 List the features of PL/SQL.
- 3.3 Explain the data types of PL/SQL.
- 3.4 Declaration of variables.
- 3.5 Explain PL/SQL tables and user defined records.
- 3.6 Explain Input/Output statements.
- 3.7 Explain decision making statements and illustrate.
- 3.8 Explain looping statements and illustrate.

- 3.9 Define procedure and function.
- 3.10 Describe the advantages of subprograms.
- 3.11 Explain handling procedures and functions with example programs.
- 3.12 Explain the parameter modes in PL/SQL with examples (in, out and in out).

4.0 Advanced PL/SQL and Exception Handling

- 4.1 Define cursor.
- 4.2 Classify cursors.
- 4.3 Explain implicit cursor with example.
- 4.4 Explain explicit cursors with example.
- 4.5 Define trigger.
- 4.6 List Advantages of triggers.
- 4.7 Explain database triggers.
- 4.8 Define the term Exception handling.
- 4.9 List the advantages of Exception handling.
- 4.10 List various types of Exception handling.
- 4.11 Illustrate built-in Exceptions.
- 4.12 Illustrate User defined Exceptions.

5.0 Concepts of NoSQL & MongoDB.

- 5.1 No SQL.
 - 5.1.1 List features of NOSQL.
 - 5.1.2 Compare RDBMS and NoSQL.
 - 5.1.3 List the Advantages and Disadvantages of NoSQL.
 - 5.1.4 Know about the ACID and BASE system.
 - 5.1.5 Compare ACID and BASE properties.
 - 5.1.6 NoSQL types.
 - 5.1.6.1 Key-value stores,
 - 5.1.6.2 Column-oriented,
 - 5.1.6.3 Graph oriented Databases.
 - 5.1.6.4 Document oriented Databases.
- 5.2 MongoDB.
 - 5.2.1 What is MongoDB.
 - 5.2.2 List the advantages of MongoDB.
 - 5.2.3 Explain the Creation, Dropping of Collection in MongoDB.
 - 5.2.4 Explain the creation and Dropping of Database in MongoDB.
 - 5.2.5 Explain the Datatypes of MongoDB.
 - 5.2.6 Explain Inserting Document, Query Document, Update Document, Deleting Document & Sorting Document.

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	2	2	2	2	3	2	2	3	1
CO2	2	3	3	3	3	3	3	2	1	2

CO5	3	1	3	1	3	3	2	2	2	3
Average	2.4	2.2	2.6	2	2.2	3	2.8	2	2	2

3=Strongly mapped , 2=moderately mapped, 1=slightly mapped

COURSE CONTENT

1. Concepts of DBMS & RDBMS

Define DBMS – Advantages of DBMS - Data Abstraction – Data Models – Instance and Schema – Data Independence – Data Definition Language - Data Manipulation Language – Database Administrator - Database Users – Database system Structure.

Entities – Relationships and Relationship sets – Mapping constraints – Entity – Relationship Diagram – Super key, Candidate key and Primary key - Reducing E- R Diagrams to tables – Generalization and Specialization – Aggregation – Functional Dependencies - Normal forms 1NF, 2 NF, 3 NF.

2. Concepts of SQL

Benefits of SQL Literals – Text –Integer – Number – Data types – Character data types – Number data type – Long data type –Raw and Long Raw data types – comments within SQL statements

SQL Operators –DDL Commands – Integrity Constraints – DML Commands - functions – single row functions – numeric functions – character functions – date functions – conversion functions – other functions- Group functions. Transaction control commands-Sub queries - Joins.

3. Basics of PL/SQL

SQL features –SQL Block architecture – Data types – Declaration - PL/SQL tables – user defined records.

Conditional control- IF statement --Loop Statements sub programs- Advantages of sub programs – procedures – Functions RETURN statement – parameter modes

4. Advanced PL/SQL

Cursors – Implicit cursor – Explicit cursor – Triggers – Advantages - creating trigger – raising trigger – Data base triggers

5. NoSQL& Basics of MongoDB

Introduction to NoSQL - Features – Comparison of RDBMS and NoSQL- Advantages and Disadvantages of NoSQL - BASE system – ACID System – Comparison of ACID and BASE properties – Classification of NoSQL as Key-value stores, Column-oriented, Graph and Document oriented Databases- Introduction to MongoDB - advantages of MongoDB - MongoDB - Installation of MongoDB - Creation of Database - Dropping of Database - Creation of Collection - Dropping of Collection - Data types of MongoDB -- Inserting Document - Query Document - Updating Document – Deleting Documents - Sorting Documents

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I & II**

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 to 3.5
Unit test-II	From 3.6 to 5.2.5

OPERATING SYSTEMS

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM303T	Operating Systems	6	90	30	70	4

TIME SCHEDULE

S.No.	Chapter/Unit Title	No.of Periods	Weightage Allocated	No. of Short Questions	No. of Essay Questions	COs Mapped
1	Introduction to Operating system	15	14	2	1	CO1
2	Process management	20	22	2	2	CO2
3	Synchronization & Deadlocks	20	25	3	2	CO3
4	Memory management	20	25	3	2	CO4
5	Disk scheduling and File management	15	14	2	1	CO5
Total		90	100	12	8	

COURSE OBJECTIVES

Upon completion of the course the student shall be able

(i)	To know about the basics of Operating Systems.
(ii)	To familiarize with process management and Scheduling algorithms.
(iii)	To familiarize with Synchronization and deadlock techniques.
(iv)	To understand various Memory management techniques.
(v)	To familiarize with File management.

COURSE OUTCOMES

CO1	CM303.1	Explain basic concepts of Operating System.
CO2	CM303.2	Explain process scheduling algorithm.
CO3	CM303.3	Describe Semaphores, solving problems using semaphores, synchronization and Deadlock handling techniques.
CO4	CM303.4	Use memory management techniques and page replacement algorithms.

CO5	CM303.5	Use Disk scheduling algorithms and File allocation methods with respect to different operating systems.
-----	---------	---

LEARNING OUTCOMES

1.0 Introduction to operating systems

- 1.1 Define an operating system.
- 1.2 Discuss history of operating system.
- 1.3 Distinguish spooling and buffering.
- 1.4 Explain the concepts.
 - 1.4.1 Multiprogramming.
 - 1.4.2 Timesharing Systems.
 - 1.4.3 Distributed Systems.
 - 1.4.4 Real time systems.
- 1.5 Differentiate between distributed and real time systems.
- 1.6 Describe multiprocessor systems.
- 1.7 Describe the operating system components.
- 1.8 Discuss operating system services.
- 1.9 Define system call with an example.
- 1.10 List and explain different types of system calls.
- 1.11 Define single user, multi user operating system structure.

2.0 Process management

- 2.1 Define process and process control block.
- 2.2 Explain process state diagram.
- 2.3 Describe process creation and termination.
- 2.4 Discuss the relation between processes.
- 2.5 Define Thread and describe multithreading.
- 2.6 Explain scheduling concepts.
- 2.7 Describe scheduling queues and schedulers.
- 2.8 Explain CPU scheduling and scheduling criteria.
- 2.9 Explain various scheduling algorithms.
 - 2.9.1 FCFS
 - 2.9.2 SJF
 - 2.9.3 Round Robin
 - 2.9.4 Priority

2.9.5 Multilevel Scheduling

3.0 Synchronization & Deadlocks

- 3.1 Describe semaphores.
- 3.2 Explain semaphores to solve Producer consumer problem.
- 3.3 Explain semaphores to solve Readers Writers Problem.
- 3.4 Explain inter process communication.
- 3.5 Define Deadlock.
- 3.6 State the necessary conditions for arising deadlocks.
- 3.7 State various techniques for deadlock prevention.
- 3.8 Discuss Deadlock Detection and Avoidance strategies.
- 3.9 Describe the process of recovering from deadlock.
- 3.10 Explain Dining philosopher's problem.

4.0 Memory management

- 4.1 Describe briefly address binding, dynamic loading, dynamic linking.
- 4.2 Define overlays.
- 4.3 Describe swapping.
- 4.4 Explain single partition allocation.
- 4.5 Explain multiple partition allocation.
- 4.6 Explain the concept of fragmentation.
- 4.7 Explain paging concept.
- 4.8 Explain how logical address is translated into physical address.
- 4.9 Explain segmentation and segmentation with paging.
- 4.10 Define virtual memory techniques.
- 4.11 Explain demand paging.
- 4.12 Describe page replacement.
- 4.13 Discuss page replacement algorithms.
 - 4.13.1 FIFO
 - 4.13.2 LRU
 - 4.13.3 Optimal
- 4.14 Describe the concept of thrashing.
- 4.15 Explain working set model and page fault frequency.

5.0 Disk scheduling and File management

- 5.1 List and explain various disk performance parameters.

- 5.2 Disk scheduling policies.
 - 5.2.1 FCFS
 - 5.2.2 SSTF
 - 5.2.3 SCAN
- 5.3 Define file management
- 5.4 List and explain various file operations
- 5.5 List and explain various access methods
- 5.6 List and explain various allocation methods
- 5.6 List and explain directory structure
- 5.7 Explain disk organization and structure

CO-PO/PSO MAPPING

CO NO.	PO 1	PO 2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO 3
CO1	3	2	2	2	3	3	3	3	2	2
CO2	3	3	3	2	2	3	3	2	2	2
CO3	3	3	3	2	3	3	3	3	2	3
CO4	3	3	3	3	3	3	3	3	3	3
CO5	3	3	2	2	2	3	3	3	3	3
Average	3	3	2.5	2	2.5	3	3	3	2.5	2.5

3=Strongly mapped , 2=moderately mapped, 1=slightly mapped

COURSE CONTENT

1. Introduction to operating systems

Operating System –Evolution of operating system-Types of Operating Systems - Multi Programming and Time Sharing - Distributed and Real time Systems - spooling and buffering - Multi processor systems-Components of Operating Systems - operating System Services - system Calls - single User and Multi user operating System Structure.

2. Process management

Processes - Sequential Processes - Process State Diagram - Process Control Block - Process Creation and Termination - Relations between Processes - Threads and Multi-Threading - Scheduling Concepts - Schedulers - CPU scheduling and Scheduling criteria - scheduling algorithms.

3. Synchronization & Deadlocks

Semaphores –Application of semaphores-Producer Consumer problem- Readers-writers problem – Inter Process Communications - monitors- Deadlocks –

Necessary conditions of deadlock - deadlock prevention - deadlock detection - deadlock avoidance-Deadlock Recovery-Dining philosopher problem.

4. Memory management

Address binding -Dynamic Loading- dynamic linking-overlays-swapping-memory allocation-fragmentation-paging-segmentation- Address Translation-segmentation with paging-Benefits of virtual memory - virtual memory techniques - demand paging - page replacements - page replacement algorithms – thrashing.

5. Disk scheduling and File management

Disk performance parameters - Disk scheduling policies – Introduction to file systems - File Management - File Operations - Access methods - Directory structure organization - File Protection.

5	Introduction to Differential Equations	4	6	2	0	CO2
6	Solution of first order differential equations	6	14	2	1	CO2
7	Solution of second order homogeneous and non-homogeneous linear differential equations	5	14	2	1	CO2
Unit – III: Probability and Statistics						
8	Probability	5	14	2	1	CO3
9	Measures of Dispersion	6	14	2	1	CO3
10	Correlation	4	8	0	1	CO3
	Total	45	100	12	8	
			Marks	36	64	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To apply integral techniques to solve various engineering problems.
(ii)	To solve first-order and first-degree differential equations and second-order homogeneous and non-homogeneous linear differential equations.
(iii)	To analyse data using the concepts of probability and statistical techniques.

COURSE OUTCOMES

CO1	CM304.1	Apply definite integrals in engineering applications.
CO2	CM304.2	Solve first-order and first-degree differential equations and second-order homogeneous and non-homogeneous linear differential equations.
CO3	CM304.3	Apply various probability and statistical techniques for data analysis.

LEARNING OUTCOMES

C.O.1 Apply definite integrals in engineering applications.

L.O.1.1 Find the area bounded by a curve and axes.

- 1.2 Determine the volumes of solids of revolution along the x-axis.
- 1.3 Obtain the Mean and R.M.S values of simple functions.
- 1.4 Solve the problems of areas using Numerical Integration.

C.O.2 Solve first-order and first- degree differential equations and second-order homogeneous and non-homogeneous linear differential equations.

L.O.2.1 Define a Differential equation, its order and degree.

2.2 Find order and degree of a given differential equation.

2.3 Form a differential equation by eliminating arbitrary constants.

2.4 Solve the first order and first degree differential equations by variables separable method.

2.5 Solve linear differential equation of the form $\frac{dy}{dx} + Py = Q$, where P and Q are functions of x only or constants.

2.6 Solve Differential equations of the type $(aD^2 + bD + c)y = 0$, where $a \neq 0, b$ and c are real numbers.

2.7 Define complementary function, particular integral and general solution of a non-homogeneous linear differential equation of second order with constant coefficients.

2.8 Describe the method of solving $f(D)y = e^{ax}$, where $f(D)$ is a polynomial of second order.

C.O. 3 Apply various probability and statistical techniques for data analysis.

L.O.3.1 Recall the basic probability principles.

3.2 State addition theorem of probability for two mutually exclusive and exhaustive events.

3.3 Solve simple problems on addition theorem.

3.4 Explain conditional event and conditional probability.

3.5 Solve simple problems on conditional probability.

3.6 Explain dependent, independent events and state multiplication theorem.

3.7 Solve simple problems on multiplication theorem.

3.8 Recall the measures of central tendency.

- 3.9 Explain the significance of measures of dispersion to determine the degree of heterogeneity of the data.
- 3.10 Find the measures of dispersion, Range, Mean Deviation and Standard Deviation for ungrouped data.
- 3.11 Explain the merits and demerits of these measures of dispersion.
- 3.12 Explain bivariate data.
- 3.13 Explain the concept of covariance and correlation between two variables.
- 3.14 Find Spearman's rank correlation coefficient.

CO/PO – MAPPING

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	3	3	3				3	3	1
CO2	3	1	1	1				3	1	1
CO3	3	3	3	3				3	3	3
Avg.	3	2.33	2.33	2.33				3	2.33	1.66

Note: The gaps in CO/PO mapping can be met with appropriate activities as follows:

For PO5: Appropriate quiz programmes may be conducted at intervals and duration as decided by concerned faculty.

For PO6: Seminars on applications of mathematics in various engineering disciplines are to be planned and conducted

For PO7: Plan activities in such a way that students can visit the Library to refer standard books on Mathematics and access the latest updates in reputed national and international journals. Additionally, encourage them to attend seminars and learn mathematical software tools.

COURSE CONTENT

1. Applications of Definite Integrals:

Area bounded by a curve and axes. Volume of Solids of Revolutions. Mean and RMS values of a function on a given interval. Numerical Integration.

2. Differential Equations:

Definition of a differential equation, Order and degree of a differential equation, Formation of differential equations. Solutions of differential equations of first order and first degree using variables separable method and linear differential equation of the type $\frac{dy}{dx} + Py = Q$. Solutions of homogenous and non-homogeneous linear differential equations of second order with constant coefficients.

3. Probability & Statistics:

Addition theorem of probability, conditional probability, dependent and independent events with multiplication theorem. Measures of dispersion, range, mean deviation and standard deviation of ungrouped data, merits and demerits. Bivariate data, correlation, Spearman's rank correlation coefficient.

.

TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED FOR UNIT TESTS I & II

Unit Test	Learning Outcomes to be Covered
Unit Test-I	From L.O 1.1 to L.O 2.5
Unit Test-II	From L.O 2.6 to L.O 3.14

Digital Electronics

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM305E	Digital Electronics	3	45	30	70	2

TIME SCHEDULE

S. No.	Chapter/Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Number systems	10	14	2	1	CO1
2.	Logic Gates, Boolean Algebra and Basic Combinational circuits	10	22	2	2	CO2
3.	Flip-Flops	10	25	3	2	CO3
4.	Counters and registers	10	25	3	2	CO4
5.	Additional Combinational circuits	5	14	2	1	CO5
	Total	45	100	12	8	

COURSE OBJECTIVES

Upon completion of the course the student shall be able

(i)	To acquire the basic knowledge of digital logic levels and apply of knowledge to understand digital logic circuits.
(ii)	To prepare students to perform the analysis and design of various digital electronic circuits.

COURSE OUTCOMES

CO1	CM305.1	Explain the structure of various number systems.
CO2	CM305.2	Describe fundamental concepts and techniques used in digital electronics, the switching algebra theorems and logic gates and apply them to design logic circuits using K-Maps.
CO3	CM305.3	Explain operation of flip flops.
CO4	CM305.4	Design the counting circuits, Registers using flipflop operations.
CO5	CM305.5	Explain design and implement various sequential circuits, combinational circuits.

LEARNING OUTCOMES

1.0 Number systems

- 1.1.1 List the various number systems used in digital Computer.
- 1.1.2 Explain Decimal number system.
- 1.1.3 Explain Binary number system.
- 1.1.4 Explain octal number system.
- 1.1.5 Explain Hexadecimal number system.
- 1.1.6 Convert decimal number to other base conversion.
 - 1.1.6.1 Decimal to Binary.
 - 1.1.6.2 Decimal to Octal.
 - 1.1.6.3 Decimal to Hexadecimal.
- 1.1.7 Convert binary number to other base conversion.
 - 1.1.7.1 Binary to Decimal.
 - 1.1.7.2 Binary to octal.
 - 1.1.7.3 Binary to Hexadecimal.
- 1.1.8 Convert octal number to other base conversion.
 - 1.1.8.1 Octal to Decimal.
 - 1.1.8.2 Octal to Binary.
 - 1.1.8.3 Octal to Hexadecimal.
- 1.1.9 Convert hexadecimal other base conversion.
 - 1.1.9.1 Hexadecimal to Decimal.
 - 1.1.9.2 Hexadecimal to Binary.
 - 1.1.9.3 Hexadecimal to Octal.
- 1.1.10 Binary numbers representation.
 - 1.1.10.1 Define Binary numbers representation.
 - 1.1.10.2 List the types of Binary numbers representation.
 - 1.1.10.3 Explain Unsigned binary number representation.
 - 1.1.10.4 Explain Signed binary number representation.
- 1.1.11 Binary arithmetic.
 - 1.1.11.1 Illustrate addition of two signed binary numbers.
 - 1.1.11.2 Illustrate subtraction of two signed binary numbers.
 - 1.1.11.3 Illustrate binary multiplication.
 - 1.1.11.4 Illustrate Binary division.
- 1.1.12 Binary coded decimal (BCD) coding scheme.
 - 1.1.12.1 Define Binary coded decimal (BCD) coding scheme.
 - 1.1.12.2 List the types of Binary coded decimal (BCD)
 - 1.1.12.3 Draw and explain 8421 code.
 - 1.1.12.4 Draw and explain 2421 code.
 - 1.1.12.5 Draw and explain 8 4-2-1 code.
- 1.1.13 Character representation.
 - 1.1.13.1 List character representation codes.
 - 1.1.13.2 Explain the ASCII coding scheme.
 - 1.1.13.3 Explain the EBCDIC coding scheme.

2.0 Boolean algebra , Logic gates and Basic Combinational Circuits

- 2.1 Boolean algebra.
 - 2.1.1 Define Boolean algebra.
 - 2.1.2 Explain AND, OR, NOT operations with truth tables.
 - 2.1.3 Explain the working of EX-OR and EX-NOR operations with truth tables.
 - 2.1.4 List the different postulates in Boolean algebra.

- 2.1.5 State De-Morgan's theorems.
- 2.1.6 Prove De-Morgan's theorems using truth tables.
- 2.1.7 Apply De-Morgan's theorems and other postulates of Boolean algebra to simplify the given Boolean expression.
- 2.1.8 Generate Boolean expression for given truth table.
 - 2.1.8.1 Using Sum-Of-Products(SOP) method.
 - 2.1.8.2 Using Product-Of-Sums(POS)method.
- 2.1.9 Use K – map to simplify Boolean expression (up to 4 variables).
 - 2.1.9.1 Using Two variable K-Map.
 - 2.1.9.2 Using Three variable K-Map.
 - 2.1.9.3 Using Four variable K-Map.
- 2.2 Logic Gates.
 - 2.2.1 Define Logic gate.
 - 2.2.2 List basic gates.
 - 2.2.3 Define OR gate.
 - 2.2.4 Explain OR gate with logic symbol and truth table.
 - 2.2.5 Define AND gate.
 - 2.2.6 Explain AND gate with logic symbol and truth table.
 - 2.2.7 Define NOT gate.
 - 2.2.8 Explain NOT gate with logic symbol and truth table.
 - 2.2.9 What is universal gate? List universal gates.
 - 2.2.10 Define NOR gate.
 - 2.2.11 Explain NOR gate with logic symbol and truth table.
 - 2.2.12 Define NAND gate.
 - 2.2.13 Explain NAND gate with logic symbol and truth table.
 - 2.2.14 Define EX-OR and EX-NOR gates.
 - 2.2.15 Explain the working of EX-OR and EX-NOR gates with truth tables.
 - 2.2.16 Implement AND, OR and NOT gates using NAND gates only.
 - 2.2.17 Implement AND, OR and NOT gates using NOR gate only.
- 2.3 Basic Combinational Circuits.
 - 2.3.1 Define the Half Adder.
 - 2.3.2 Explain the function of Half Adder.
 - 2.3.3 Draw Half-Adder circuit using an EX- OR and an AND gate.
 - 2.3.4 Define the Full Adder.
 - 2.3.5 Explain the function of Full Adder.
 - 2.3.6 Construct Full Adder using two Half-Adder and an OR gate
 - 2.3.7 Define the parallel Adder
 - 2.3.8 Explain the function of parallel Adder using logic symbol.
 - 2.3.9 Draw and explain 4-bit parallel adder using full adders.
 - 2.3.10 Explain the working of a serial adder with a block diagram.
 - 2.3.11 List the advantage and disadvantages of a serial adder
 - 2.3.12 List the advantage and disadvantages of a parallel adder.
 - 2.3.13 Distinguish between serial adder and parallel adder.
 - 2.3.14 Explain the operation of a digital comparator circuit for two 4-bit words.

3.0 Flip-Flops

- 3.1 List the details of different logic families.
- 3.2 Define positive and negative logic levels.
- 3.3 Define Flip flop.
- 3.4 Draw and explain the basic principle of operation of a Flip-flop.
- 3.5 Define Latch.
- 3.6 Explain the working of NAND latch circuit with truth table and Timing

- diagram.
- 3.7 Explain the working of a NOR latch circuit with truth table and Timing diagram
 - 3.8 Explain with block diagram, waveforms and truth tables the working of RS Flip-flop.
 - 3.9 Explain with block diagram, waveforms and truth tables the working of D Flip-flop.
 - 3.10 Explain with block diagram, waveforms and truth tables the working of JK Flip-Flop.
 - 3.11 Distinguish between synchronous and asynchronous inputs of a flip-flop
 - 3.12 State the need for a Master-Slave Flip-Flop.
 - 3.13 Explain the working of a Master-Slave flip-flop using suitable circuit diagram and truth table.

4.0 Counters and Registers

4.1 Counters

- 4.1.1 Define Counter
- 4.1.2 List the types of counters.
- 4.1.3 Define the terms Synchronous counter, Asynchronous counter
- 4.1.4 Distinguish between asynchronous and synchronous counters.
- 4.1.5 Draw and explain module-8 ripple counter circuit diagram with waveforms and truth tables
- 4.1.6 Draw and explain module-10 (decade) Asynchronous counter circuit diagram with waveforms and truth tables
- 4.1.7 Draw and explain module-8 synchronous counter circuit diagram with waveforms and truth tables
- 4.1.8 List the draw backs of ripple counters.
- 4.1.9 Draw and explain the operation of a 4-bit ring counter.
- 4.1.10 List the applications of counter.

4.2 Register

- 4.2.1 Define Register
- 4.2.2 State the need of Register.
- 4.2.3 List the methods of data transfer in register.
- 4.2.4 List the types of Registers
- 4.2.5 Define Serial in – Serial out register, Serial in – Parallel out register, Parallel in – Serial out register, Parallel in – Parallel out register
- 4.2.6 Explain the working of serial in – serial out register with circuit diagram.
- 4.2.7 Explain the working principle of serial in – parallel out register with circuit diagram.
- 4.2.8 Explain the working principle of shift left Register with circuit diagram.
- 4.2.9 Explain the working of shift right registers with circuit diagram.

5.0 Additional Combinational Circuits

- 5.1 Define the terms Multiplexer and Demultiplexer
- 5.2 Draw and explain the operation of a 4X1 multiplexer circuit diagram with truth table.
- 5.3 Draw and explain the operation of 1X4 Demultiplexer circuit diagram with truth table.
- 5.4 List the applications of Multiplexers, Demultiplexers.
- 5.5 Define the terms Encoder and Decoder.
- 5.6 Draw and explain the operation of a 4-to-10-line decoder circuit diagram with truth table.
- 5.7 Draw and explain the operation of a 8 to 3 encoder circuit diagram with

truth table.

5.8 List applications of Decoders, Encoders.

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	3	3		2			3	2	3
CO2	3	3	3	2	1	1		3	2	2
CO3	2	1	1	1			1	1	1	3
CO4	2	2	3	1		2	1	2	2	1
CO5	2	2	3	1	1	1	2	3		1
Average	2.4	2.2	2.6	2.25	1.3	1.3	1.3	2.4	1.75	2

3=Strongly mapped, 2=moderately mapped, 1=slightly mapped

COURSE CONTENT

1. Number Systems: Number Systems, Decimal, Binary, Hexadecimal and Octal codes – Conversion from one number system to another number system – Binary numbers representation – Binary arithmetic – Binary coded decimal (BCD) coding scheme – Character representation codes.

2. Boolean Algebra and Logical Gates: Boolean Algebra – AND, OR, NOT, EX-OR and EX-NOR operations – postulates in Boolean algebra – Boolean theorems, Boolean simplifications of Boolean expressions – Using De-Morgan's theorems – Simplify the given Boolean expression – Generate Boolean expression for given truth table – Using K-map to simplify Boolean expression – LOGIC GATES – AND, OR, NOT, EX-OR, EX-NOR, NAND and NOR gates – Implement AND, OR, NOT gates using NAND gates only and NOR gates only – Basic Combinational Circuits – Half adder – Draw Half-Adder circuit using an exclusive OR and an AND gate – Full Adder – Full Adder using two Half-Adder and an OR gate – Parallel Adder – 4-bit parallel adder using full adders – Serial Adder – Advantages and disadvantages of Parallel adder – Differences between serial adder and parallel adder – digital comparator circuit for two 4-bit words.

3. FLIP FLOP: Different logic families – positive and negative logic levels – Basic principles of Flip Flop operation – Explanation of NAND Latch, NOR Latch, RS, D, JK and Master Slave JK flip flops with block diagram, truth table and wave forms.

4. Counters: Basics of Asynchronous, Synchronous counters – Explanation of Asynchronous MOD-8 and MOD-10 counters with diagrams and wave forms – Explanation of Synchronous MOD-8 counter with diagrams and wave forms – 4-bit ripple counter and listing its applications. **Registers:** Basics of registers – definition, need and types of registers – definition of SISO, SIPO, PISO and PIPO registers – Explanation of SISO and SIPO registers with diagram – Shift Left and Shift Right registers.

5. Additional Combinational Circuits: Definitions of Multiplexer, De-Multiplexers – Explanation of 4X1 Multiplexer – Explanation of 1X4 Demultiplexer – Applications of Multiplexers, Demultiplexers – Definitions of Encoder, Decoder – Explanation of 4-to-10-line decoder – Explanation of 8 to 3 encoder – Applications of Encoder, Decoders.

TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED FOR UNIT TESTS I & II

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 to 3.7
Unit test-II	From 3.8 to 5.8

Computer Organization

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM306E	Computer Organization	3	45	30	70	2

TIME SCHEDULE

S.No.	Chapter/Unit Title	No.of Periods	Weightage of marks	NO of short Questions	NO of Essay Questions	COs Mapped
1.	CPU Organization	10	17	3	1	CO1
2.	Information representation and Arithmetic Operations	15	33	3	3	CO2
3.	Memory Organization	10	25	3	2	CO3
4.	I/O Organization	10	25	3	2	CO4
Total		45	100	12	8	

COURSE OBJECTIVES

Upon completion of the course the student shall be able

(i)	To know about Processor organization.
(ii)	To familiarize information Representation and arithmetic operations.
(iii)	To understand how memory and i/o is organized in an effective way.

COURSE OUTCOMES

CO1	CM306.1	Explain the Basic computer organization techniques.
CO2	CM306.2	Explain various information representations, algorithms of arithmetic operations.
CO3	CM306.3	Explain the memory organization.
CO4	CM306.4	Explain the peripheral organization.

LEARNING OUTCOMES

1.0 CPU ORGANIZATION

- 1.1 Draw the functional block diagram of Digital computer and explain the function of each unit.
- 1.2 Define Register.
- 1.3 State the purpose of
 - 1.3.1 Accumulator
 - 1.3.2 Program counter
 - 1.3.3 Instruction Register
 - 1.3.4 Memory Buffer Register
 - 1.3.5 Memory Address Register
- 1.4 Draw the block diagram of simple accumulator-based CPU.
- 1.5 Explain the function of each unit.
- 1.6 Define the terms micro-operation, macro-operation.
- 1.7 Define instruction cycle, fetch cycle and execution cycle.
- 1.8 What is stored program concept.
- 1.9 Explain sequential execution of a program stored in memory by the CPU.

2.0 Information representation and Arithmetic Operation

- 2.1 List and Explain basic types of information representation in a computer.
- 2.2 Define floating point representation and fixed-point representation of numbers.
- 2.3 Illustrate the floating point and fixed point representations with example.
- 2.4 Distinguish between Fixed point and Floating point representations.
- 2.5 What is Instruction format.
- 2.6 Define terms Opcode, Operand and address.
- 2.7 Instruction formats with examples.
 - 2.7.1 Zero address instructions
 - 2.7.2 One address instruction
 - 2.7.3 Two address instructions
 - 2.7.4 Three address instructions
- 2.8 Define addressing mode.
- 2.9 List and explain various addressing modes.
- 2.10 Explain the fixed point addition and subtraction operations with flowchart.
- 2.11 Explain the Fixed point multiplication operation with flowchart.
- 2.12 Explain the Fixed point division operation with flowchart.
- 2.13 Explain floating point addition, subtraction operations with flowchart
- 2.14 Explain floating point multiplication operation with flowchart
- 2.15 Explain floating division operation with flowchart.

3.0 Memory Organization

- 3.1 List and state the importance of various types of memories
- 3.2 Distinguish between main and auxiliary memory.
- 3.3 State the need for memory hierarchy in a computer.
- 3.4 Explain memory hierarchy in a computer in detail
- 3.5 State the significance of various memory device characteristics: access time, access rate, alterability, permanence of storage, cycle time.
- 3.6 Differentiate between RAM and CAM
- 3.7 Explain Associative Memory
- 3.8 Explain the principle of virtual memory organization in a computer system

- 3.9 Explain virtual address and physical address organization.
- 3.10 State the principle of locality of reference
- 3.11 Explain Cache memory organization.
- 3.12 Explain principle of memory interleaving in a computer.

4.0 I/O Organization

- 4.1 List peripheral devices that can be connected to a computer.
- 4.2 State the need for an interface.
- 4.3 State the importance of bus system.
- 4.4 List modes of data transfer.
- 4.5 Explain synchronous and asynchronous data transfer.
- 4.6 Differentiate between synchronous and asynchronous data transfer.
- 4.7 Explain hand shaking procedure of data transfer.
- 4.8 Explain programmed I/O method of data transfer.
- 4.9 Explain interrupted initiated I/O.
- 4.10 Explain priority interrupt : polling and daisy chaining priority
- 4.11 Explain DMA controlled transfer.

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	1	2	1	1	2	1	2	1	1
CO2	3	3	3	2		1		3	2	3
CO3	3	3	3	2		1		3	2	3
CO4	3	2	2	1	2	2	2	2	1	2
Average	3	2.3	2.5	1.5	1.5	1.5	1.5	2.5	1.5	2.3

3=Strongly mapped , 2=moderately mapped, 1=slightly mapped

COURSE CONTENT

- 1.** Processor Organization–Functional block diagram of Digital computer - Definition of Registers – purpose of accumulator, Program counter instruction register, Memory buffer registers, Memory address register - Simple accumulator based CPU and function of each unit. -Stored program concept - Sequential execution of a program stored in memory by the CPU
- 2.** Information representation and Arithmetic Operation- Basic types of information representation - floating point representation and fixed-point representation of numbers, Operand, Opcode and address - Zero address, One address, Two address and Three address instructions - Different addressing modes. -Fixed point addition and subtraction, FixedPoint multiplication and Fixed division operations with flow charts - floating point addition, subtraction, multiplication and division operations with flowcharts.
- 3.** Memory Organization – Listing of Various types of memories and their importance - Memory hierarchy in a computer -Various memory devices characteristics - Differentiate between RAM and CAM - Associative Memory-Virtual

memory organization in a computer system - Virtual address and physical address organization-Principle of Locality - Cache memory organization – Memory interleaving.

4. I/O Organization - Peripheral devices - Need for an interface - Bus systems - Modes of data transfer - Synchronous and asynchronous data transfer -Hand shaking procedure of data transfer -Programmed I/O method of data transfer- Interrupted initiated I/O- Priority interrupt: polling and daisy chaining priority- DMA controlled transfer.

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I & II**

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 TO 2.15
Unit test-II	From 3.1 to 4.11

Multimedia

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM307A	Multimedia	2	30	-	-	-

TIME SCHEDULE

S.NO	Chapter/ Unit Title	No.of Periods	CO's Mapped
1	MS Access - create Database, create table with and without constraints, Insert, delete, update records, implement queries, create relationship between two tables	6	CO1
2	PageMaker - Creation of publication using tools, text, shapes, etc, Custom template, colors, text block, Objects, Styles, Page elements, Printing the documents	12	CO2
3	Photoshop – Different tools, Working with Layers, Working with painting tools, Colors, Brushes	12	CO3
TOTAL		30	

COURSE OBJECTIVES

Upon completion of the course the student shall be able to

(i)	Familiarize with the features of MS Access.
(ii)	Familiarize with the features of Adobe PageMaker
(iii)	Familiarize with the features of Adobe Photoshop

COURSE OUTCOMES

CO1	CM307.1	Working with databases, tables, manipulating records, queries and establishing relationship among tables.
CO2	CM307.2	Create and print publication files such as Textbooks, Visiting Cards, Invitation Cards, etc. using Adobe Pagemaker
CO3	CM307.3	Design and enhance the quality of all types of picture files using Adobe Photoshop

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3

Average	2.3	2.3	3	1.6	2	2.3	2.3	2	1.6	2

3=Strongly mapped , 2=moderately mapped, 1=slightly mapped

LEARNING OUTCOMES

S.No	Main Learning Outcome	Explanation (Using PPTS, Videos)	Practical
1.	Learn and Practice MS-Access	Explain the concept of databases, tables, operations on tables, constraints, retrieving the data from tables, relating the tables.	1. To create Database To Create table with and without constraints To Insert, delete, update records 2. To implement queries To create relationship between two table
2.	Learn and Practice Adobe Page Maker	Explain various page formatting tools, their usage and various options related to page formatting, Color codes using Adobe page maker	3. Exercise on Installation, invoking and familiarizing Adobe Page Maker. 4. Exercise on Page Maker Tools. 5. Exercise on creating visiting card 6. Exercise on creating book cover page 7. Exercise on creating hotel menu card 8. Exercise on creating invitation card 9. Exercise on creating brochure
3.	Learn and Practice Adobe Photoshop	Explain various image editing tools, various operations on images, layers, colors, by using photoshop.	10.Exercise on Installation, invoking and familiarizing Adobe Photoshop 11.Exercise on selection, Resizing & Cropping Images 12.Exercise on Layers 13.Exercise on Photo Retouching 14.Exercise on CREATING SPECIAL EFFECTS 15.Exercise on Exporting Your Work 16.Exercise on Logo Creation

KEY COMPETENCIES

Exp No	Name of the Experiment	Objectives	Key Competencies
1	To create database and create tables with key constraints and insert/delete/update records in a table	<ol style="list-style-type: none"> a. Open MS Access b. Create database c. save d. create table e. Use primary key f. Insert/delete/update records 	<ul style="list-style-type: none"> ❖ Database creation ❖ Table creation ❖ Able to insert/update/delete and delete records in the table
2	To implement queries to extract data from tables Create relationships between tables	<ol style="list-style-type: none"> a. Open MS Access b. Create database c. Create table d. Use Select command e. Create one more tables f. Insert records g. Use relationship option 	<ul style="list-style-type: none"> ❖ Able to display contents of the table based on the user requirement ❖ Able to link tables
3	Exercise on Installation, invoking and familiarizing Adobe Page Maker.	Installation, invoking and familiarizing Adobe Page Maker.	<ul style="list-style-type: none"> ❖ Installing page maker ❖ Explain PageMaker environment
4	Exercise on Page Maker Tools.	Page Maker Tools.	<ul style="list-style-type: none"> ❖ Explain usage of Tool box, zero position, pointer tool, text tool, rotate tool, crop tool, oblique line tool, constrained line tool, box tool, rectangle frame, circle tool, circular frame, polygon tool, polygon frame, hand tool and zoom tool.
5	Exercise on creating visiting card	creating visiting card	<ul style="list-style-type: none"> ❖ Create visiting card with text and graphics on both sides with proper formatting.
6	Exercise on creating book cover page	creating book cover page	<ul style="list-style-type: none"> ❖ Create front and back cover page of a book with text and graphics with proper formatting.
7	Exercise on creating hotel menu card	creating hotel menu card	<ul style="list-style-type: none"> ❖ Create a hotel menu card with text and graphics with proper formatting.
8	Exercise on creating invitation card	creating invitation card	<ul style="list-style-type: none"> ❖ Create a invitation card with text and graphics with proper formatting for required no. of pages.

9	Exercise on creating brochure	creating brochure	❖ Create a brochure for the firms like real estate companies, hospitals, educational institutions etc.,
10	Exercise on Installation, invoking and familiarizing Adobe Photoshop	Installation, invoking and familiarizing Adobe Photoshop7.0	❖ Exploring the Toolbox ❖ Exploring Panels & Menus ❖ Creating & Viewing a New Document ❖ Customizing the Interface ❖ Setting Preferences
11	Exercise on Selection, Resizing and Cropping of images	Selection , Resizing and Cropping of images	❖ Understanding various selection methods. ❖ Interpolation Options ❖ Resizing for Print & Web ❖ Cropping & Straightening an Image Adjusting Canvas Size & Canvas Rotation
12	Exercise on LAYERS	Working on Layers	❖ Understanding the Background Layer ❖ Creating, Selecting, Linking & Deleting Layers ❖ Locking & Merging Layers ❖ Copying Layers, Using Perspective & Layer Styles ❖ Filling & Grouping Layers ❖ Introduction to Blending Modes ❖ Blending Modes, Opacity & Fill Creating & Modifying Text
13	Exercise on PHOTO RETOUCHING	PHOTO RETOUCHING	❖ Using The Red Eye Tool ❖ The Clone Stamp Tool ❖ The Patch Tool & the Healing Brush Tool ❖ The Spot Healing Brush Tool ❖ The Color Replacement Tool ❖ The Toning & Focus Tools Painting with History
14	Exercise on CREATING SPECIAL EFFECTS	CREATING SPECIAL EFFECTS	❖ Getting Started with Photoshop Filters ❖ Smart Filters ❖ Creating Text Effects Applying Gradients to Text
15	Exercise on Photo Shop Credits	EXPORTING YOUR WORK	❖ Saving with Different File Formats ❖ Saving for Web & Devices ❖ Printing Options ❖ Photo shop Credits

16	Exercise on Logo Creation	Logo Creation	<ul style="list-style-type: none">❖ To apply all the tools❖ Prepare college logo❖ Prepare logo for industry
----	---------------------------	---------------	---

Data Structures USING Python Lab

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM308L	Data Structures using Python Lab	6	90	40	60	2

TIME SCHEDULE

S.No.	Chapter/Unit Title	No. Of Periods	COs Mapped
1.	Introduction to object-oriented concepts and implementation of OOP features, Sequential data structure Array-operations on arrays, built in data structures like lists, Tuple, dictionary and sets	21	CO1
2.	Searching and sorting techniques, Linked Storage Representation-Linked Lists	30	CO2
3.	Linear Data Structures-Stacks	18	CO3
4.	Linear Data Structures-Queues	9	CO4
5.	Non-Linear Data Structures-Trees	12	CO5
Total		90	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To Know the object-oriented concepts of python.
(ii)	To Know the various types of Data Structures.
(iii)	To familiarize with the representation of Data Structures.
(iv)	To use various Data structures in organizing data.
(v)	To reinforce theoretical concepts by writing relevant programs.

COURSE OUTCOMES

CO1	CM308.1	Develop Python programs on object-oriented concepts, inbuilt data structures and array operations
-----	---------	---

CO2	CM308.2	Develop Python programs on searching, sorting and various Linked Lists and Linked List operations.
CO3	CM308.3	Develop Python programs on the operations of Stack data structure and its applications
CO4	CM308.4	Develop Python programs on the operations of Queue data structure
CO5	CM308.5	Develop Python programs on the operations of Binary Trees

LEARNING OUTCOMES

1. Exercise on Class and Object in Python.
2. Exercise on Overloading concept.
3. Exercise on Overriding concept.
4. Exercise on Inheritance techniques.
5. Exercise on Array operations using Numpy package.
6. Exercise on Lists, Tuples, Dictionaries and Sets in Python.
7. Exercise on BUBBLE SORT using Functions.
8. Exercise on SELECTION SORT using Functions.
9. Exercise on INSERTION SORT using Functions.
10. Exercise on QUICK SORT using Functions.
11. Exercise on LINEAR SEARCH using Functions.
12. Exercise on BINARY SEARCH without RECURSION.
13. Exercise on BINARY SEARCH with RECURSION.
14. Exercise on SINGLY LINKED LIST with insert, delete and display operations.
15. Exercise on DOUBLY LINKED LIST with insert, delete and display operations.
16. Exercise on STACK with push, pop and display operations using built in functions.
17. Exercise on STACK with push, pop and display operations without using built in functions.
18. Exercise on Conversion of In-fix expression to post-fix expression using STACKS.
19. Exercise on Evaluation of post-fix expression using STACKS.
20. Exercise on QUEUE with enqueue, dequeue and display operations using arrays.
21. Exercise on QUEUE with enqueue, dequeue and display operations using inbuilt operations.
22. Exercise on BINARY SEARCH TREE with insertion, deletion of nodes.

23. Exercise on BINARY SEARCH TREE with various tree traversal operations.

CO-PO/PSO MAPPING

DATA STRUCTURES THROUGH PYTHON LAB OBJECTIVES AND KEY COMPETENCIES			
Sl.No	Name of the Experiment	Objectives	Key Competencies
1	Exercise on Class and Object in Python	Write a Python program for i. Implementing Class ii. Creating an object iii. Accessing data members and member functions	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Observe whether Class and object are properly implemented ❖ Check data members and member functions are properly accessed
2	Exercise on Overloading concepts	Write a Python program for Implementing overloading of functions	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Observe whether overloading of functions is done with different signatures
3.	Exercise on Overriding concepts	Write a Python program for Implementing overriding of functions	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether the overriding of functions is done properly
4.	Exercise on Inheritance techniques	Write a Python program for Implementing various inheritance techniques	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Observe whether all inheritance types are properly implemented ❖ Check whether the characteristics of each inheritance are achieved or not.

5.	Implement Array operations using Numpy package	<p>Write a Python program for</p> <ol style="list-style-type: none"> i. Implementing Arrays using Numpy ii. Array addition iii. Array multiplication 	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether Numpy package is properly installed ❖ Observe whether Array addition is properly implemented ❖ Check whether Array Multiplication is performed
6.	Exercise on List, Tuple, Dictionary and set data structures in Python.	<p>Write a Python program for</p> <ol style="list-style-type: none"> i. Creating a List, Adding elements to list, Accessing elements to list ii. To implement Tuple and get the specified position element from beginning and ending of the Tuple iii. To create a dictionary and perform the search operation for a specific Element. iv. To create a Set and perform set operations like Union, Intersection and Set Difference. 	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Observe whether List is properly implemented ❖ Check whether the tuple is created and specified position element is accessed ❖ Check whether the Dictionary is created and search operation is performed ❖ Check whether the Set is created and Set operations are properly performed.
7.	Exercises on BUBBLE SORTING using Functions	<p>Write a Python program for</p> <ol style="list-style-type: none"> i. Implementing Bubble Sort ii. Print the proper result for sorting the elements 	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether Bubble sort algorithm is properly implemented ❖ Observe the result for sorting the elements using Bubble sort technique.
8.	Exercise on SELECTION SORT using Functions	<p>Write a Python program for</p> <ol style="list-style-type: none"> i. Implementing Selection Sort ii. Print the proper result for sorting the elements. 	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether Selection sort algorithm is properly implemented ❖ Observe the correctness of result for sorting the elements using selection sort

9.	Exercise on SELECTION SORT using Functions	Write a Python program for I. Implementing Insertion Sort II. Print the proper result for sorting the elements.	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether Insertion sort algorithm is properly implemented ❖ Observe the correctness of result for sorting the elements using insertion sort
10.	Exercise on Quick SORT using Functions	Write a Python program for I. Implementing Quick Sort II. Print the proper result for sorting the elements	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether Quick sort algorithm is properly implemented ❖ Observe the correctness of result for sorting the elements using Quick sort
11.	Exercise on Linear search using functions	Write a Python program for I. Implementing Linear Search II. Print the proper result for successful and unsuccessful Linear search	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether Linear Search algorithm is properly implemented ❖ Observe the Base Condition ❖ Observe the result for the search element is present in the list ❖ Observe the result for the search element is not present in the list
12.	Exercise on binary search without Recursion	Write a Python program for I. Implementing Binary Search II. Print the proper result for successful and unsuccessful Binary search	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether Binary Search algorithm is properly implemented ❖ Observe the Base Condition ❖ Observe the result for the search element is present in the list ❖ Observe the result for the search element is not present in the list
13.	Exercise on binary search with Recursion	Write a Python program for I. Implementing Binary Search II. Print the proper result for successful and	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors

		unsuccessful Binary search	<ul style="list-style-type: none"> ❖ Check whether Binary Search algorithm is properly implemented ❖ Observe the Base Condition ❖ Observe the result for the search element is present in the list ❖ Observe the result for the search element is not present in the list
14.	Exercises on creation, insertion, deletion, display of elements in a single linked lists	<p>Write a Python program for</p> <ol style="list-style-type: none"> i. Creation of linked list ii. Inserting an element in Linked list iii. Check for deletion of a node if no element is present and print error message iv. Delete an element from the Linked list v. Display all the elements from the linked list 	<ul style="list-style-type: none"> ❖ Rectify syntactical errors ❖ Debug logical errors ❖ Study node structure ❖ Validate whether the memory allocation is done for the node ❖ Confirm whether the addition of node is done at the end ❖ Correct if deletion of an element in an empty list ❖ Confirm whether deletion of required node is done ❖ Observe whether all the elements of the linked list are displayed in proper order
15.	Exercises on creation, insertion, deletion, display of elements in Double linked lists	<p>Write a Python program for</p> <ol style="list-style-type: none"> I. Creation of doubly linked list II. Inserting an element in Doubly Linked list III. Check for deletion of a node if no element is present and print error message IV. Delete an element from the Linked list V. Display all the elements from the linked list 	<ul style="list-style-type: none"> ❖ Rectify syntactical errors ❖ Debug logical errors ❖ Study node structure ❖ Validate whether the memory allocation is done for the node ❖ Confirm whether the addition of node is done at the end ❖ Correct if deletion of an element in an empty list ❖ Confirm whether deletion of required node is done ❖ Observe whether all the elements of the linked list are displayed in proper order
16.	Write a program to implement a stack	Write a Python program for	<ul style="list-style-type: none"> ❖ Correct syntactical errors

	using built-in functions	<ul style="list-style-type: none"> i. Creation of Stack consisting of elements using built in functions ii. Insertion of new element is done by () function call iii. Deletion of last element is done by pop() function call iv. Print error message for 'empty stack' if no elements are present for pop() function call v. Print error message for 'stack full' if number of elements exceed size of Stack array 	<ul style="list-style-type: none"> ❖ Debug logical errors ❖ Observe declaration of stack using built-in functions ❖ Validate whether a new element is inserted at the top by push() function call ❖ Check whether only the top element is deleted by using negative indexing. ❖ Verify for empty stack condition in pop()
17.	Write a program to implement stack using Arrays	<p>Write a Python program for</p> <ul style="list-style-type: none"> i. Creation of Stack consisting of elements using arrays ii. Insertion of new element is done by push() function call iii. Deletion of last element is done by pop() function call iv. Print error message for 'empty stack' if no elements are present for pop() function call 	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study node structure ❖ Observe declaration of stack using arrays ❖ Validate whether a new element is inserted at the top by push() function call ❖ Check whether only the top element is deleted by pop() function call ❖ Verify for empty stack condition in pop()
18.	Write a program for conversion of infix arithmetic expression into postfix expression	<p>Write a Python program for</p> <ul style="list-style-type: none"> I. Conversion of infix expression into postfix expression using stacks concept II. Printing the postfix expression 	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether the final expression is postfix expression or not.
19.	Write a program for Evaluation of post-fix expression using STACKS.	<p>Write a Python program for</p> <ul style="list-style-type: none"> i. Evaluation of post-fix expression using STACKS ii. Printing the evaluated result 	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Check whether the result is correctly evaluated or not.
20.	Write a program to implement a queue using Arrays.	<p>Write a Python program for</p> <ul style="list-style-type: none"> i. Creation of Queue consisting of elements using arrays ii. Insertion of new element is done by add_Queue() iii. Print error message for 'empty queue' if no 	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Observe declaration of Queue using arrays ❖ Validate whether a new element is inserted at

		<p>elements are present for deletion of an empty queue.</p> <p>iv. Print error message for 'queue full' if number of elements exceed size of Queue array upon insertion of new element.</p> <p>v. Deletion of first element is done by delete_Queue()</p>	<p>the end of the array by add_Queue()</p> <ul style="list-style-type: none"> ❖ Verify for empty Queue condition for deletion of an element ❖ Verify for Queue full condition upon insertion of a new element ❖ Check whether only the first element is deleted by delete_Queue()
21.	Write a program to implement a queue using built in functions	<p>Write a Python program for</p> <p>i. Creation of Queue consisting of elements using inbuilt functions in Python</p> <p>ii. Insertion of new element is done by put() method</p> <p>iii. Print error message for 'empty queue' if no elements are present for deletion of an empty queue.</p> <p>iv. Deletion of first element is done by get() method</p>	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study node structure ❖ Validate whether a new element is inserted at the end of the Queue by put() ❖ Verify for empty Queue condition for deletion of an element using empty() method ❖ Check whether only the first element is deleted by get()
22.	Write a program to implement BINARY SEARCH TREE with insertion, deletion of nodes	<p>Write a Python program for</p> <p>i. Creation of Binary Trees</p> <p>ii. Insertion of a node</p> <p>iii. Deletion of a node</p>	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Observe proper definition of elements in a Binary Search Tree ❖ Check whether the node is properly inserted in the Binary Tree ❖ Check whether the node is properly deleted in the Binary Tree ❖ Observe the root node after deleting root node element

23.	Write a program to implement BINARY SEARCH TREE with various tree traversal techniques.	Write a Python program for I. 1. Creation of Binary Trees II. 2. Perform In-order Traversal of the binary tree III. 3. Perform Pre-order Traversal of the binary tree IV. 4. Perform Post-order Traversal of the binary tree	❖ Correct syntactical errors ❖ Debug logical errors ❖ Validate whether the Tree in-order traversal is properly done ❖ Validate whether the Tree pre-order traversal is properly done ❖ Validate whether the Tree post-order traversal is properly done
-----	---	--	--

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I & II**

Unit Test	Learning outcomes to be covered
UNIT TEST -I	From Learning Outcomes 1 To 11
UNIT TEST -II	From Learning Outcomes 12 To 23

Data Base Management Systems Lab

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM309L	Data Base Management Systems Lab	6	90	40	60	2

TIME SCHEDULE

S. No	CHAPTER/UNIT TITLE	NO. OF PERIODS	COS
1	Concepts of DBMS & RDBMS	12	CO1
2	Concepts of SQL	24	CO2
3	Basics of PL/ SQL	24	CO3
4	Advance PL/SQL	18	CO4
5	Concepts of NoSQL & Mongo DB.	12	CO5
	TOTAL	90	

COURSE OBJECTIVES

Upon completion of the course the student shall able to

(i)	Insert, update, delete and select data into/from Relation Database.
(ii)	Develop PL/SQL programs.
(iii)	Insert, update, delete and select data from Mongo DB.

COURSE OUTCOMES

CO1	CM309.1	Develop SQL Queries to Create, modify and drop tables and Queries to Insert, update and delete data from tables.
CO2	CM309.2	Execute SQL Queries to display data on different conditions from different tables.
CO3	CM309.3	Execute PL/SQL Programs.
CO4	CM309.4	Demonstrate the usage of cursors and triggers.
CO5	CM309.5	Execute commands to Insert, update, delete and select data in NOSQL and Mongo DB databases.

LEARNING OUTCOMES

- 1 Know installation of Oracle
- 2 Exercise on creating tables.
- 3 Exercise on inserting records
- 4 Exercise on updating records

- 5 Exercise on modifying the structure of the table
- 6 Exercise on Select command
- 7 Exercise on querying the table using clauses like WHERE, ORDER BY, IN, AND, OR, NOT, IS NULL
- 8 Exercise on GROUP BY, HAVING
- 9 Exercise on Number functions, character functions, conversion functions and date functions, group functions
- 10 Exercise on set operators
- 11 Exercise on sub queries
- 12 Exercise on Joins
- 13 Exercise on various date and number format models
- 14 Exercise on creating tables with integrity constraints
- 15 Write programs using PL/SQL control statements
- 16 Exercise on Procedures
- 17 Exercise on Functions
- 18 Exercise on pre-defined exception
- 19 Exercise on user-defined exception
- 20 Exercise on Cursors
- 21 Exercise on Triggers
- 22 Exercise on Installation of Mongo DB
- 23 Exercise on Creation and Dropping of Database
- 24 Exercise on Creation and Dropping of Collections.
- 25 Exercise on Commands of Mongo DB- Insert, update, find, delete and sorting of Documents.

Mini Project: Student has to develop a Mini project applying the skills acquired from the learning outcomes of this course.

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3

3=strongly mapped, 2=moderately mapped, 1=slightly mapped

KEY COMPETENCIES

S.No	Name of the Experiment	Objectives	Key Competencies
1	Know installation of Oracle	Perform the following: i. To identify the version of Oracle being installed ii. To understand the RAM and HDD requirements for Oracle installation iii. To comprehend the installation steps correctly iv. Setting up of Oracle Administrative Password v. Configuring the Oracle database after post-installation steps of Oracle viz configuring administrative rights for performing vi. To login to Oracle as administrator account and Oracle user account	<ul style="list-style-type: none"> ❖ Observe Oracle version being installed ❖ Observe the RAM & HDD requirements ❖ Rectify for any Oracle installation errors ❖ Able to login as Administrator and as Oracle user account
2	Exercise on creating tables	Perform the following: i. To login with Oracle user account ii. To give correct syntax for table creation iii. To give correct data type for the required fields with appropriate size iv. To display the structure of the table	<ul style="list-style-type: none"> ❖ Correct Table creation syntax errors ❖ Correct the wrong data types and inappropriate sizes for the respective fields ❖ Check for displaying the structure of the table
3	Exercise on inserting records	Perform the following: i. Check for the required table present already ii. To insert the records correctly iii. To display the records correctly	<ul style="list-style-type: none"> ❖ Correct syntax errors for Insertion of record ❖ Check for insertion of proper values for the required fields ❖ Verify the correct values pertaining to the record are inserted in the required table ❖ Check for displaying of the records correctly

4	Exercise on updating records	<p>Perform the following:</p> <ol style="list-style-type: none"> i. Check for the required table present already ii. To update the records correctly iii. To display the updated records 	<ul style="list-style-type: none"> ❖ Correct syntax errors for update of record ❖ Check for update of proper values for the required fields ❖ Check for displaying of the updated records correctly
5	Exercise on modifying the structure of the table	<p>Perform the following</p> <ol style="list-style-type: none"> i. To identify the required table present in the system already ii. To add new column iii. To display the records correctly 	<ul style="list-style-type: none"> ❖ Correct syntax errors in modifying the structure of the table ❖ Check whether required field is newly added to the existing table ❖ Check for displaying of the modified table correctly
6	Exercise on SELECT command	<p>Perform the following</p> <ol style="list-style-type: none"> i. To identify the required table present already ii. To display the records in the required table 	<ul style="list-style-type: none"> ❖ Check for syntax error in usage of Select command ❖ Check whether Select command is given correctly to display all the records
7	Exercise on querying the table using clauses like WHERE, ORDER, IN,AND, OR,NOT, IS NULL	<p>Perform the following:</p> <ol style="list-style-type: none"> i. To use the Select command ii. To use the clauses WHERE, ORDER, IN,AND, OR, NOT, IS NULL along with Select command on the given records in the table 	<ul style="list-style-type: none"> ❖ Check for syntax error in usage of Select command with appropriate clauses ❖ Check whether Select command along with appropriate clause is given correctly for the required condition ❖ Check the usage of clauses WHERE, ORDER, IN, AND, OR, NOT along with Select command appropriately

8	Exercise on GROUP BY, HAVING	Perform the following: i. To use the Select command To use the clauses GROUP BY, HAVING along with Select command on the given records in the table	<ul style="list-style-type: none"> ❖ Check for syntax error in the usage GROUP BY, HAVING ❖ Check for usage of GROUP BY, HAVING ❖ Verify output values based on certain condition on few records
9	Exercise on Number functions, character functions, conversion functions and date functions, group functions	Perform the following i. To use functions ii. To use set command along with WHERE condition, GROUP BY, HAVING	<ul style="list-style-type: none"> ❖ Check for syntax error of various functions ❖ Check for usage of various functions ❖ Verify output values based on certain condition on few records
10	Exercise on SET operators	Perform the following iii. To use set command iv. To use set command along with WHERE condition	<ul style="list-style-type: none"> ❖ Check for syntax error in the usage of SET command ❖ Check for usage of SET command for updating values based on certain condition on few records
11	Exercise on sub queries	Perform the following i. To use Select command ii. To use appropriate Operators IN	<ul style="list-style-type: none"> ❖ Check for the syntax error in usage of sub queries ❖ Check for the correctness of the usage of appropriate operators used
12	Exercise on Joins	Perform the following i. To create two tables ii. To use the common field if two tables are used iii. To know different types of Join	<ul style="list-style-type: none"> ❖ Check for the correctness of the syntax used for joining ❖ Check if the join is created between two tables ❖ Check if self join is created
13	Exercise on various date and number format models	Perform the following: i. To use date formats correctly ii. To use number formats correctly	<ul style="list-style-type: none"> ❖ Check for the syntax of the date formats ❖ Check for the syntax of the number formats

14	Exercise on creating tables with integrity constraints	Perform the following i. Create Primary key ii. Create Foreign key or referential integrity constraint iii. Create NOT NULL constraint iv. Create UNIQUE Key constraint v. Create CHECK constraint	❖ Check for the syntax errors in usage of all types of Integrity constraints ❖ Check whether different types of Integrity constraints are used
15	Write programs using PL/SQL control statements	Perform the following i. To use IF .. ELSE statements ii. To use iterative statements – Simple loop, While Loop, For Loop	❖ Check for the syntax of IF.. ELSE statements ❖ Check for the syntax of all iterative statements
16	Exercise on Procedures	Perform the following i. To know the concept of stored procedures ii. To declare procedures iii. The type of parameters IN, INOUT, OUT iv. To call procedures from other procedures	❖ Check for proper declaration of procedures ❖ Check for syntax of parameters and its type ❖ Check for proper calling of procedures
17	Exercise on Functions	Perform the following i. To know the concept of stored functions ii. To declare function with return data iii. To call functions from other functions	❖ Check for proper declaration of function ❖ Check for syntax of parameters and its data type ❖ Check for proper return data type from the functions ❖ Check for variable assignment to get the returned value from the function
18	Exercise on pre defined exception	Perform the following i. To know the concept of pre defined exception ii. To write programs with exception section	❖ Check for proper declaration Exception section ❖ Check for syntax of Exception section

19	Exercise on user defined exception	Perform the following i. To know the concept of user defined exception ii. To write programs with exception section	<ul style="list-style-type: none"> ❖ Check for proper declaration Exception section ❖ Check for syntax of Exception section
20	Exercise on Cursors	Perform the following i. To know the concept cursors ii. To know the fetch data from database	<ul style="list-style-type: none"> ❖ Check for the syntax of cursor ❖ Check for open cursor, fetch data, close cursor ❖ Check for the result
21	Exercise on Triggers	Perform the following i. To know the concept of triggers ii. Validation before and after insert, before and after update, before and after delete data	<ul style="list-style-type: none"> ❖ Check for the syntax of trigger ❖ Write a trigger which raises before insert data ❖ Raise trigger ❖ Repeat the procedure for remaining ❖ Check for the result
22	Exercise on Installation of Mongo DB	Perform the following i. To download and install Mongo DB	<ul style="list-style-type: none"> ❖ Observe Mongo DB version being installed ❖ Observe the RAM & HDD requirements ❖ Rectify for any MongoDB installation errors <p>Able to login as Administrator</p>
23	Exercise on Creation and Dropping of Database	Perform the following i. Create the Database ii. Drop the Database	<ul style="list-style-type: none"> ❖ Know the use of create Database() and dropDatabase() ❖ Correct Database creation syntax errors ❖ Check for displaying the database name

24	Exercise on Creation and Dropping of Collections	Perform the following i. Create the Collection ii. Drop the Collection	<ul style="list-style-type: none"> ❖ Know the use of create Collection() and drop() ❖ Correct Database creation syntax errors ❖ Check for collection name ❖ Check for the collection dropped
25	Exercises on commands of Mongo DB	Execute the following commands of Mongo DB i. Insert the Document ii. update the Document iii. find the Document iv. Delete the Document v. sort the Documents	<ul style="list-style-type: none"> ❖ Know the syntax of insert(), update(), find(), remove(), sort() functions. ❖ Correct syntax errors. ❖ Check out for different input values.

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I & II**

Unit Test	Learning outcomes to be covered
UNIT TEST-I	From Learning Outcomes 1 To 12
UNIT TEST -II	From Learning Outcomes 13 To 25

Linux Practicals (Practicum-Practical)

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM310L	Linux practicals	4	60	40	60	1.5

TIME SCHEDULE

S.No.	Chapter/Unit Title	No. of Periods	COs Mapped
1	Linux Installation and user management	8	CO1
2	LINUX commands	24	CO2
3	LINUX editors	4	CO3
4	LINUX Shell Programs	24	CO4
TOTAL		60	

COURSE OBJECTIVES

Upon completion of the course the student shall be able

(i)	To know the basics of linux installation and user management.
(ii)	To use and execute linux commands.
(iii)	To know the usage of different Linux editors.
(iv)	To know about the shell programming and execute shell programs.

COURSE OUTCOMES

CO1	CM310.1	Demonstrate Linux installation and user management
CO2	CM310.2	Demonstrate Linux commands and Linux Editors
CO3	CM310.3	Execute shell programs using expressions, operators
CO4	CM310.4	Execute shell programs on control statements and conditional statements, Files, Functions and string manipulations.

THEORY

1.Linux Basics

1.1 History of Linux

1.2 Know about multiprogramming, multi-tasking and open source softwares

1.3 Fundamental principles

1.3.1 What is file?

1.3.2 know about hierarchical file system

1.3.3 know about piping and redirection

1.3.4 Distributions in Linux

2.Core Components

2.1 know about kernel

2.2 know about shell

2.3 List the GNU utilities in LINUX

2.4 List system utilities in Linux

2.5 Know about GUI in Linux.

3.Editors

3.1 Understand the concept of editor

3.2 List different types of editors

3.3 Know about the editors (nano, vim(vi), emacs)

3.4 List graphical interface editors

3.5 know about Gedit, kate, visual studio code, atom, sublime text

LEARNING OUTCOMES

S.No	LEARNING OUTCOMES	THEORY (explained using PPT,useful videos from youtube etc.)	PRACTICAL (Key competencies table enclosed)
1	Installation of Linux	Explanation of Linux installation like ubuntu,kali,centos	Demonstration of Installation of various Linux distributions like Ubuntu, kali,Centos etc.,
2	Creating and managing user accounts in LINUX	Explanation of Creating and managing user accounts in LINUX	Demonstration of Creating and managing user accounts in LINUX
3	Exercise on Basic Commands	Listing and explaining basic Linux Commands	Demonstration on Basic Linux commands

4	Exercise on Linux File Directory Management commands	Listing and explaining of Linux File Directory Management commands	Demonstration of Linux File Directory Management commands
5	Exercise on Linux Permissions and Ownership commands	Listing and explaining of Linux Permissions and Ownership commands	Demonstration of Linux Permissions and Ownership commands
6	Exercise on Linux Archiving and Compression commands	Listing and explaining of Linux Archiving and Compression commands	Demonstration of Linux Archiving and Compression commands
7	Exercise on Linux System Monitoring and Management commands	Listing and explaining of Linux System Monitoring and Management commands	Demonstration of Linux System Monitoring and Management commands
8	Exercise on Linux Miscellaneous and Utility Commands	Listing and explaining of Linux Miscellaneous and Utility commands	Demonstration of Linux Miscellaneous and Utility commands
9	Exercise on Linux Disk and Memory Management commands	Listing and explaining of Linux Disk and Memory Management commands	Demonstration of Linux Disk and Memory Management commands
10	Exercise on Linux filters commands	Listing and explaining of on Linux filters	Demonstration of on Linux filters commands

		commands commands	
11	Exercise on Linux Text editors	Explanation of Linux editors like vi,vim etc.,	Demonstration of Linux editors like vi,vim
12	Exercise on shell script using expressions, operators	NA	Execution of shell script
13	Exercise on Shell Script on control statements.	NA	Execution of shell script
14	Exercise on Shell script on conditional statements.	NA	Execution of shell script
15	Exercise on Shell script on LOOP statements	NA	Execution of shell script
16	Exercise on shell script on string manipulations.	NA	Execution of shell script
17	Exercise on Shell script on FUNCTIONS	NA	Execution of shell script
18	Exercise on Shell script on FILES	NA	Execution of shell script

KEY COMPETENCIES

Sl.No	Name of the Experiment	Objectives	Key Competencies
1	Installation of Linux	Installation on Linux distributions like Ubuntu, kali,Centos etc.,	<ol style="list-style-type: none"> 1. Choose method to install 2. Choose a Linux distribution 3. Check for the syntax errors and clear the errors 4. Follow install method instructions
2	Creating and managing user accounts in LINUX	Creating and managing user accounts in Linux	<ol style="list-style-type: none"> 1. Create user account 2. Modify user accounts 3. Delete user accounts 4. Remove user accounts
3	Exercise on Basic Commands	To Run Linux shell basic commands	<ol style="list-style-type: none"> 1. Open Linux OS 2. Open shell 3. Run basic shell commands 4. Observe output of command
4	Exercise on Linux File Directory Management commands	To Run Linux File Directory Management commands	<ol style="list-style-type: none"> 1. Open Linux OS 2. Open shell 3. Run various File directory and management commands in the shell 4. Observe output of command
5	Exercise on Linux Permissions and Ownership commands	To Run Linux Permissions and Ownership commands	<ol style="list-style-type: none"> 1. Open Linux OS 2. Open shell 3. Run various Permissions and Ownership command in the shell 4. Observe output of command
6	Exercise on Linux Archiving and Compression commands	To Run Linux Archiving and Compression commands	<ol style="list-style-type: none"> 1. Open Linux OS 2. Open shell 3.Run various Archiving and Compression command in the shell 4.Observe output of command
7	Exercise on Linux System Monitoring and Management commands	To Run System Monitoring and Management commands	<ol style="list-style-type: none"> 1. Open Linux OS 2. Open shell 3. Run various System Monitoring and Management commands in the shell 4. Observe output of command

8	Exercise on Linux Miscellaneous and Utility Commands	To Run Miscellaneous and Utility Commands	<ol style="list-style-type: none"> 1. Open Linux OS 2. Open shell 3. Run various Miscellaneous and Utility Commands in the shell 4. Observe output of command
9	Exercise on Linux Disk and Memory Management commands	To Run Disk and Memory Management commands	<ol style="list-style-type: none"> 1. Open Linux OS 2. Open shell 3. Run various Disk and Memory Management Commands in the shell 4. Observe output of command
10	Exercise on Linux filters commands	To Run Linux filters commands	<ol style="list-style-type: none"> 1. Open Linux OS 2. Open shell 3. Run various Filtering Commands in the shell 4. Observe output of command
11	Exercise on Linux Text editors	Working on Linux text editors like vi	<ol style="list-style-type: none"> 1. Opening/Creating a File 2. Editing Modes (for modal editors like Vim) 3. Text Input and Manipulation 4. Saving Changes 5. Exiting editor
12	Exercise on shell script using expressions, operators	Write a shell script program on expressions and operators to demonstrate various operators and expression in Linux shell script	<ol style="list-style-type: none"> 1. Create the Shell Script File with operators and expressions 2. Add the Shebang Line 3. Implement the expressions and operators 4. Check for the correctness of output for the given input 5. Save script 6. Make the Script Executable by granting execute permissions 7. Run the Script 8. Verify and Debug
13	Exercise on Shell Script on control statements.	Write a shell script program on control statements to demonstrate various control statements in Linux shell script	<ol style="list-style-type: none"> 1. Create the Shell Script File with control statements 2. Add the Shebang Line 3. Implement the expressions and operators 4. Check for the correctness of output for the given input 5. Save script 6. Make the Script Executable by granting execute permissions 7. Run the Script 8. Verify and Debug

14	Exercise on Shell script on conditional statements.	Write a shell script program on conditional statements to demonstrate various conditional statements in Linux shell script	<ol style="list-style-type: none"> 1. Create the Shell Script File with conditional statements 2. Add the Shebang Line 3. Implement the expressions and operators 4. Check for the correctness of output for the given input 5. Save script 6. Make the Script Executable by granting execute permissions 7. Run the Script 8. Verify and Debug file
15	Exercise on Shell script on LOOP statements	Write a shell script program on Loop statements to demonstrate various loop statements in Linux shell script	<ol style="list-style-type: none"> 1. Create the Shell Script File with loop statements 2. Add the Shebang Line 3. Implement the expressions and operators 4. Check for the correctness of output for the given input 5. Save script 6. Make the Script Executable by granting execute permissions 7. Run the Script 8. Verify and Debug file
16	Exercise on shell script on string manipulations.	Write a shell script program on string manipulation commands to demonstrate string manipulation commands in Linux shell script	<ol style="list-style-type: none"> 1. Create the Shell Script File with string commands 2. Add the Shebang Line 3. Implement the expressions and operators 4. Check for the correctness of output for the given input 5. Save script 6. Make the Script Executable by granting execute permissions 7. Run the Script 8. Verify and Debug file
17	Exercise on Shell script on FUNCTIONS	Write a shell script program on functions to demonstrate functions in Linux shell script	<ol style="list-style-type: none"> 1. Create the Shell Script File with functions 2. Add the Shebang Line 3. Implement the expressions and operators 4. Check for the correctness of output for the given input 5. Save script 6. Make the Script Executable by granting execute permissions 7. Run the Script 8. Verify and Debug file

18	Exercise on Shell script on FILES	Write a shell script program on files to demonstrate files in Linux shell script	<ol style="list-style-type: none"> 1. Create the Shell Script File 2. Add the Shebang Line 3. Implement the expressions and operators 4. Check for the correctness of output for the given input 5. Save script 6. Make the Script Executable by granting execute permissions 7. Run the Script 8. Verify and Debug file

<p>Note 1: 0.5 credit will be awarded for student centric activities based on the participation in the extra Curricular activities like NSS/NCC/Clean and Green or Sports/Games.</p> <p>Note 2: 26CM408L is common laboratory to all programmes. 26CM401T,407L are common with CCB/AIML/CAI. 26CM402T,409L are common with CIOT/CCN. 26CM403T is common with CCN/CAI. 26CM404E is common with CCB. 26CM405E is common with CCN. 26CM406A is common with CCB/CIOT/CAI/AIML.</p>										

WEB TECHNOLOGIES

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM401T	WEB TECHNOLOGIES	6	90	30	70	3.5

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Introduction to Web Design and HTML	18	22	2	2	CO1
2.	CSS (Cascading Style Sheets) and XML	18	18	2	1.5	CO1, CO2
3.	JavaScript	16	14	2	1	CO2
4.	Angular JS & JQuery	18	21	3	1.5	CO3
5.	Web Servers and PHP — Server-side Scripting	20	25	3	2	CO4
Total		90	100	12	8	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	Understand the basic elements of web page.
(ii)	Know the working with HTML, CSS.
(iii)	To familiarize the various Technologies like Java Script, J Query, PHP.
(iv)	To understand Database connectivity Using PHP.

COURSE OUTCOMES

CO1	CM401.1	Implement interactive web page(s) using HTML and CSS
CO2	CM401.2	Know how to format and validate Web page elements using JavaScript and describe data in a web page using XML.
CO3	CM401.3	Understand and apply jQuery to enhance interactivity, handle events, apply visual effects, and extend functionality using plugins
CO4	CM401.4	Build Dynamic web site using server side PHP Programming and database connectivity using PHP.

LEARNING OUTCOMES

1. Introduction to Web Design and HTML

1.1 Understand Principles of Effective Web Design

- 1.1.1 Basic web Terminology.
- 1.1.2 Describe Anatomy of web page.
- 1.1.3 Understand different Web page elements.
- 1.1.4 Navigate through web pages
- 1.1.5 Narrate steps in building web site
- 1.1.6 Narrate steps in launching
- 1.1.7 Narrate maintaining web site.

1.2 HTML Introduction

- 1.2.1 Introduction and Overview of HTML
- 1.2.2 Discuss the rules for designing a HTML document.
- 1.2.3 Explain the structure of HTML document.
- 1.2.4 Define HTML element and Attribute.
- 1.2.5 Study the basic tags in HTML <html>, <head>, <title>, <body>.
- 1.2.6 Study the header tags <h1> to <h6>
- 1.2.7 Discuss the Physical formatting tags , <i>, <u>, <strike>, <sub>, <sup>, <big>, <small>
- 1.2.8 Discuss the Logical formatting tags <q>, , <cite>, <<ins>, ,
- 1.2.9 Discuss the <marquee> with attributes.
- 1.2.10 List Character entities.
- 1.2.11 Explain the List tags like , , , <dl>, <menu> with attributes.

1.3 Describe the setting of tables.

- 1.3.1 Describe the tags <table>, <tr>, <td>, <th>, <tbody>, <thead>, <tfoot>, <colspan>, <rowspan>

1.4 Connecting to hyperlinks and Imaging

- 1.4.1 Explain the link and imaging tags <a>, with attributes.

1.5 Forms: Input Types, Elements, and Attributes

- 1.5.1 Build web forms using various <form>, <input>, <button>, <label>, <select>, <options>, <textarea>, <legend> <fieldset> with attributes.
- 1.5.2 Utilize form attributes (name, id, value, required, etc.) for data collection and usability.

1.6 Basic Form Validation Techniques

- 1.6.1 Implement basic HTML form validation using built-in attributes (required, pattern, minlength)
- 1.6.2 Identify common input errors and ensure user-friendly feedback is provided.
- 1.6.3 Explain the importance of validation for both user experience and data integrity.

1.7 Understand the difference between <div> and tags

- 1.7.1 Recognize that <div> is a block-level element used for grouping large sections.
- 1.7.2 Organize web page components (header, footer, sidebar, main content) using <div> tags.
- 1.7.3 Use for inline formatting:
- 1.7.4 Highlight or style specific words or phrases inside larger text blocks.

2. CSS (Cascading Style Sheets) and XML

2.1 Illustrate about cascading style sheets

- 2.1.1 Understand the level of styles inline, internal and external style sheets.
- 2.1.2 Explain ID and Class selectors in CSS
- 2.1.3 Explain about Color and background properties
- 2.1.4 Explain about Box properties like Border, position, margin, padding of elements.
- 2.1.5 Understand the use of different CSS display properties to control how elements appear on a webpage.
- 2.1.6 Apply CSS positioning methods to place elements precisely on a webpage.
- 2.1.7 Use the float property to align elements (like images or boxes) to the left or right within a container
- 2.1.8 Create flexible and responsive layouts using the Flexbox model to align and distribute space among items in a container.
- 2.1.9 Design complex webpage layouts using the CSS Grid system to create rows and columns easily.
- 2.1.10 Apply CSS styles to improve the appearance and usability of HTML forms and
- 2.1.11 Tables.
- 2.1.12 Enhance user experience by adding smooth visual effects using CSS transitions and basic animations.

2.2 Understand XML

- 2.2.1 Explain the Purpose of XML
- 2.2.2 Describe how to organize data in the form of XML
- 2.2.3 Explain the rules for designing XML document.
- 2.2.4 Understand the significance of Namespace.
- 2.2.5 List the various applications of XML.

3. JavaScript

- 3.1 Types of scripting-JavaScript
- 3.2 Differentiate between Client-side and Server-side scripting.
- 3.3 List Client side and server side scripting languages.
- 3.4 Describe the features of Java Script.
- 3.5 Placing JavaScript code in HTML.
- 3.6 Understand functions
 - 3.6.1 Know how to define and call a function.
 - 3.6.2 Know how to pass parameters.
 - 3.6.3 Understand the purpose of getElementById and getElementByName method
 - 3.6.4 Describe the global functions provided by JavaScript.
- 3.7 Form Handling in Java Script
- 3.8 Illustrate Arrays
 - 3.8.1 Understand single and multi-dimensional arrays.
 - 3.8.2 Design small programs using arrays.
- 3.9 Various Objects provided by JavaScript.
 - 3.9.1 Math object.
 - 3.9.2 String object.
 - 3.9.3 Date object.
 - 3.9.4 Boolean and Number object.
- 3.10 Describe events in java script.

4. Angular JS and JQuery

4.1 Angular JS

- 4.1.1** What is AngularJS? Architecture, Advantages & Features.
- 4.1.2** List and Explain Angular JS Directives like ng-app, ng-init, ng-model, ng-repeat
- 4.1.3** Explain AngularJS Expressions like number, string, object, and array.
- 4.1.4** Explain AngularJS Filters like lowercase, uppercase, filter, orderby, currency.

4.2 Define JQuery

4.3 List the features of JQuery

4.4 List JQuery plug ins

4.5 Explain the steps to include JQuery in Web Pages

4.6 Explain JQuery Syntax with example program

4.7 Describe the JQuery Selectors

4.8 Accessing HTML elements by using Element Selectors, ID, Class Selectors

4.9 Explain the JQuery Document Ready Event

4.10 Describe the JQuery Event handling methods

- 4.10.1** Events
- 4.10.2** Keyboard Events
- 4.10.3** Form Mouse Events
- 4.10.4** Document/Window events

4.11 Explain effects of JQuery like hide, show, fade In, fadeout, fade Toggle, fade To, SlideDown, SlideUp, Slide Toggle

4.12 Perform DOM manipulation using jQuery methods .html(), .text(),. val(), .append()

4.13 Implement event handling click, hover, and submit to create interactive web pages.

4.14 Integrate and utilize jQuery plugins to extend web functionality.

5 Web servers and PHP - Server-side scripting.

5.1 Web servers:

- 5.1.1** Understand the architecture of a Web server.
- 5.1.2** List various web servers.
- 5.1.3** Illustrate the various HTTP request types and their difference.
- 5.1.4** Compare the properties of IIS and Apache.

5.2 Fundamentals of PHP

- 5.2.1** State the importance of PHP
- 5.2.2** Explain how to combine HTML and PHP.
- 5.2.3** Explain how to access HTML, PHP documents from web servers.

5.3 Data types, Variables and Constants

- 5.3.1** List Data types
- 5.3.2** Explain Data types with examples
- 5.3.3** Explain how to declare Variables and Constants.

5.4 List and explain string manipulation functions.

5.5 Understand Arrays

- 5.5.1** Explain types of arrays.
- 5.5.2** Design small programs using arrays.

5.6 Explain form handling in PHP

- 5.6.1** Access elements of form using \$_GET,\$_POST

5.7 Know how to access My SQL Database

- 5.7.1** List and explain My SQL database functions in PHP.
- 5.7.2** Explain the steps of connecting to a Database.

- 5.7.3 Know about retrieving data from a table.
- 5.7.4 Know about inserting data into a table.
- 5.7.5 Know about updating the data in a table.
- 5.7.6 Know about deleting data from a table.
- 5.7.7 Design some simple programs to insert, delete, update and retrieve data from database
- 5.8 Cookies
 - 5.8.1 Define Cookie.
 - 5.8.2 Know how to create and delete a cookie.
 - 5.8.3 Know the purpose of cookie.
- 5.9 Sessions
 - 5.9.1 Define Session
 - 5.9.2 Understand how to create a session.
 - 5.9.3 Know how to destroy a session.
 - 5.9.4 Know the purpose of session.
 - 5.9.5 Differentiate Sessions and Cookies.
- 5.10 Passing data from one web page to other webpage using query string.

CO-PO MAPPING

POs	Mapped with CO No.	CO Periods Addressing PO in column 1		Level (1,2,3)	Remarks
		No	%		
PO1	CO1	25	30	2	>40% Level3 Highly addressed 25% to 40% Level 2 Moderately Addressed 5% to 25% Level1 Low addressed <5% Not addressed
PO2	CO2,CO3,CO4	60	70	3	
PO3	CO1,CO2,CO3,CO4	60	70	3	
PO4					
PO5	CO1,CO2,CO3,CO4	50	60	3	
PO6					
PO7	CO2,CO3,CO4	60	70	3	

COURSE CONTENT

1. Introduction to Web Design and HTML (Hyper Text Markup Language):

Principles of effective web design, Anatomy of a web page: structure, layout, and basic navigation, HTML, Introduction to HTML, Format of Web page, Tags and Attributes, Formatting text, Adding images, Positioning, Lists, Colors, Tables, Connecting to hyperlinks and Imaging, Forms: input types, elements, and attributes, Basic form validation techniques, Basic Page Layout using <div> and .

2. CSS (Cascading Style Sheets) and XML:

Introduction, inline, internal, and external styles, CSS selectors, Text and font styling, colors, backgrounds, Box model, Layout techniques: display, position, float, flexbox, grid, Responsive design, Styling forms and tables, Transitions and simple animations. XML: Purpose of XML, Structure and syntax of XML documents, Data organization, XML Namespaces, Simple XML use cases.

3. JavaScript: Introduction to Scripting, JavaScript features, Functions – Function definitions, Use of getElementById, getElementByName, Global functions, Form handling, Arrays – Declaring and allocating arrays, passing arrays to functions, sorting and Searching arrays, Objects – Math object, String object, Date object, Boolean and Number object, Events in JavaScript.

4. Angular JS & jQuery: Angular JS, Introduction to Angular JS, Features, Advantages, Angular JS architecture, Directives, Expressions, Filters, Sample programs. jQuery, Role of jQuery, Features of jQuery, steps to include jQuery in Web Page, Syntax, including document ready function, Selectors: element, class, ID, DOM manipulation with jQuery, jQuery event handling, jQuery effects, working with plugins.

5. Web Servers and PHP – Server-side Scripting: Web server, Overview of HTTP protocol and request types, Client-side vs. server-side scripting, Types of web servers, hosting websites and accessed, Requesting and serving HTML, PHP documents. PHP, Introduction to PHP and embedding in HTML, Syntax, variables, datatypes, String Functions, arrays, Form Handling with PHP, Sessions and cookies, Connecting to a database, Simple CRUD operations, Passing data between web pages.

TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED FOR UNIT TESTS I & II

Unit Test	Learning outcomes to be covered
Unit test-I	FROM 1.1 to 3.5
Unit test-II	FROM 3.6 to 5.10

OOP THROUGH JAVA

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM402T	OOP THROUGH JAVA	6	90	30	70	3.5

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Object Oriented Programming concepts and Basics of java, Overloading	17	14	2	1	CO1, CO2
2.	Concepts of Inheritance, Overriding, Interfaces, Packages and I/O streams.	17	22	3	2	CO2
3.	Collection Classes and Exception Handling	16	18	2	1.5	CO3
4.	Multi-threaded Programming. Fundamentals of AWT	18	21	2	1.5	CO4
5.	Event Handling and Swings	22	25	3	2	CO5
Total		90	100	12	8	

COURSE OBJECTIVES

Upon completion of the course the student shall be able to

(i)	know applying object-oriented programming paradigm in problem solving.
(ii)	Able to design multi-tasking application with the knowledge of multi-threading.
(iii)	Able to design data structures concepts in java with collection classes.
(iv)	Familiarized to develop graphical user interface with event handling mechanism using Swings.

COURSE OUTCOMES

CO1	CM402.1	Know the object-oriented programming concepts in problem solving. Use syntax and semantics of object-oriented paradigm.
CO2	CM402.2	Design optimized definition for an application with re-usability features and packages in project development.
CO3	CM402.3	Knows the usage of utilities in real time data structures.
CO4	CM402.4	Demonstrate multi-threading concepts to implement multitasking and multi programming applications.
CO5	CM402.5	Demonstrate to design effective dynamic user interface for any front-end applications using Swings and events.

LEARNING OUTCOMES

1.0 Object Oriented Programming Concepts and Basics of Java and Overloading

- 1.1 Know about object-oriented programming
- 1.2 Compare procedure-oriented programming and object-oriented programming
- 1.3 List and explain features of object-oriented programming
- 1.4 Importance of Java in Internet programming
- 1.5 Explain features of Java; define Byte codes of Java and JVM
- 1.6 Explain data types, scope and lifetime of variables, comment statements in Java
- 1.7 Describe conversion and casting features
- 1.8 Apply one-dimensional and two-dimensional arrays (with example programs)
- 1.9 Illustrate usage of conditional and iteration statements of Java with example programs
- 1.10 Describe usage of jump statements, break, and continue statements
- 1.11 Describe how to create classes and objects
- 1.12 Demonstrate usage of new operator and methods
- 1.13 Explain usage of constructors with example programs
- 1.14 Apply method overloading and constructor overloading in applications
- 1.15 Describe usage of this pointer with examples
- 1.16 Usage of command-line arguments

2.0 Concepts of Inheritance, Overriding, Interfaces, Packages, and I/O Streams

- 2.1 Explain about String class with methods
- 2.2 Explain implementation of inheritance with example program
- 2.3 Illustrate how to implement multilevel inheritance with example program
- 2.4 Explain method overriding and usage of super keyword
- 2.5 Describe concept of Interfaces
- 2.6 Define an Interface; Differences between abstract classes and interface
- 2.7 Explain how to implement interfaces with sample program
- 2.8 Define a package; Explain the concept of class path
- 2.9 Describe concept of Access protection
- 2.10 Illustrate the mechanism of importing packages
- 2.11 Give simple application to design packages with sample programs
- 2.12 List different types of I/O streams

- 2.13 Explain how to read and write data through console input and output streams
- 2.14 Explain DataInputStream and DataOutputStreams with examples
- 2.15 Explain various file access operations by using File streams
- 2.16 Explain sample programs on above streams

3.0 Collection Classes and Exception Handling

- 3.1 What is Collection Framework and Hierarchy of Collection Framework
- 3.2 List Collection Interfaces and explain the following with examples:
 - 3.2.1 List
 - 3.2.2 Set
 - 3.2.3 Queue
- 3.3 List Collection Classes and explain the following with examples:
 - 3.3.1 ArrayList
 - 3.3.2 LinkedList
 - 3.3.3 HashSet
- 3.4 How to access a Collection via an Iterator?
- 3.5 Describe sources of errors; Types of exceptions: Checked & Unchecked
- 3.6 Apply following keywords to handle exceptions through sample programs:
 - 3.6.1 Try
 - 3.6.2 Catch
 - 3.6.3 Finally
- 3.7 Explain concept of multi-catch statements with example
- 3.8 Explain how to write nested try in exception handling with example

4.0 Multi-threaded Programming and Fundamentals of AWT

- 4.1 Describe multi-threading
- 4.2 Explain Thread life cycle and states
- 4.3 Explain how to create a single thread with example program
- 4.4 Explain how to create multiple threads with example program
- 4.5 Illustrate thread priorities in multiple threads with example
- 4.6 Describe the concept of synchronization with example program
- 4.7 Describe AWT classes and Component class methods
- 4.8 Working with Color and Font classes

5.0 Event Handling and Swings

- 5.1 Describe Types of Events and demonstrate event handling mechanism
- 5.2 List and explain different event classes
- 5.3 List and explain event listener interfaces
- 5.4 Demonstrate handling mouse events with sample program
- 5.5 Demonstrate handling keyboard events with sample program
- 5.6 Swing Hierarchy
- 5.7 MVC (Model-View-Controller) pattern in Swing
- 5.8 Explain following Containers in Swing with example programs:
 - JFrame, JPanel, JDialog
- 5.9 Explain following Controls with example programs:
 - JButton, JLabel, JTextField, JPasswordField, JCheckBox, JRadioButton, JComboBox, JList
- 5.10 Design simple application programs using multiple controls

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	2	1	1	2	2	2	1	2	2	2
CO2	1	3	3	3	1	3	1	1	3	1
CO3	3	2	3	2	2	3	1	1	3	3
CO4	1	1	3	2	2	3	2	2	3	2
CO5	3	3	3	3	2	3	2	2	3	3
Average	2	2	2.5	2.4	1.6	3	1.5	1.6	3	2.2

3=Strongly mapped, 2=moderately mapped, 1=slightly mapped

- Method is to relate the level of PO with the number of hours devoted to the COs which address the given PO.
- If > 40% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 3.
- If 25 to 40% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 2.
- If 5 to 25% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 1.
- If < 5% of classroom sessions addressing a particular PO, it is considered that PO is not addressed.

COURSE CONTENT

1. Basics of java and overloading: object-oriented programming -Importance of Java to Internet – Byte codes. Features of Java: OOPS concepts –Data types –type conversions – casting – Arrays. Usage of classes – objects – new – methods – constructors – method overloading, string classes – command line arguments-static members-this pointer

2. Concepts Inheritance Overriding Interfaces and Package: -Usages of Inheritance: inheritance super class, sub classes – Multi level inheritance – super keyword -overriding –Abstract Classes-Interfaces-Packages. - I/O Streams-Accessing data through console input and output

3. Collections, Exception Handling: -Collection Frame work- Collection Interfaces – Collection Classes-Iterator - Exception handling: Source of errors – error handling – Exception handling-Multi catch statements.

4. Multi-threading Fundamentals of AWT: -- Define thread – life cycle of thread - Multi threading –Synchronization- – Thread properties. -AWT Classes-Color Font classes- Working with Graphics-color-fonts-

5.Swings and Event Handling: Event Classes-Listener interfaces- mouse events - Key Event-Swing Hierarchy-MVC (Model-View-Controller) pattern in Swing-Swing Containers- JFrame, JPanel, JDialog-Swing Controls-Like JButton - JTextField – JRadioButton- JComboBox

4.	Session, Presentation & Application Layers Concepts	20	25	3	2	CO4
5.	Network Security and Emerging Concepts	15	14	2	1	CO5
Total		90	100	12	8	

COURSE OBJECTIVES

Upon successful completion of this course, the student will be able to

(i)	Explain fundamental networking concepts, topologies and functions of OSI and TCP/IP layers.
(ii)	Explain the role of physical and data link layers.
(iii)	Gain knowledge of Network IP addresses and transport layer protocols in the network.
(iv)	Describe key protocols and services used in networking.
(v)	Appreciate the importance of network security, and emerging trends in communication systems

COURSE OUTCOMES

CO1	CM403.1	Explain the basic concepts of data communication and networking models
CO2	CM403.2	Describe the roles and functionalities of the Physical and Data Link layers in network communication.
CO3	CM403.3	Apply IP addressing, sub-netting, routing, and transport layer mechanisms
CO4	CM403.4	Illustrate the functions of session, presentation, and protocols of application layers
CO5	CM403.5	Describe network security principles and emerging network technologies.

LEARNING OUTCOMES

Unit 1: Fundamentals of Networking and Data Communication

- 1.1 Basics of Data Communication: Components, Data Representation, Data Flow: Simplex, Half-Duplex and Duplex
- 1.2 Analog and Digital Signals, Periodic and Non-Periodic Signals
- 1.3 Define Sine Wave characteristics: Amplitude, Frequency, Phase, Wavelength
- 1.4 Digital Signal concepts: Bit-rate and Bit-length
- 1.5 Define Transmission Impairment – Attenuation, Distortion and Noise
- 1.6 Define Performance – Bandwidth, Throughput, Latency, Jitter (Basic concepts only)
- 1.7 Identify various Transmission Modes – Parallel and Serial Transmission, Asynchronous and Synchronous Transmission
- 1.8 Overview and classification of networks: LAN, MAN, WAN, PAN
- 1.9 State the need and benefits of Networking
- 1.10 Importance of Network standards and communication models
- 1.11 Explain OSI Model: architecture and functions
- 1.12 Explain TCP/IP Model: architecture and functions
- 1.13 Comparison of OSI and TCP/IP models
- 1.14 Explain various network Topologies: Bus, Ring, Star, Mesh, Hybrid – with advantages/disadvantages
- 1.15 Network Hardware: Repeater, Hub, Switch, Router, NIC, Modem, Gateway
- 1.16 Wireless Technologies: Wi-Fi and Bluetooth

Unit 2: Physical and Data Link Layer

2.1 Physical Layer

- 2.1.1 Importance of Transmission Media: Coaxial Cable, Twisted Pair Cable, Optical Fiber, Bandwidth characteristics and comparisons
- 2.1.2 Purpose of Connectors: Registered Jack (RJ)-45, Straight Tip (ST),

- Subscriber Connector (SC), Lucent Connector (LC)
- 2.1.3 Explain Data Encoding & Multiplexing Techniques
 - 2.1.3.1 Time Division Multiplexing (TDM)
 - 2.1.3.2 Frequency Division Multiplexing (FDM)

- 2.1.4 Explain various Switching Techniques
 - 2.1.4.1 Circuit Switching
 - 2.1.4.2 Packet Switching
 - 2.1.4.3 Message Switching

2.2 Data Link Layer

- 2.2.1 Define the terms: Errors, Types of Errors, Redundancy
- 2.2.2 Explain Coding and Block Coding
- 2.2.3 Error Detection and Correction: Detection versus Correction, Forward Error Correction versus Retransmission, Parity Bits, Cyclic Redundancy Check
- 2.2.4 Explain Medium Access Control (MAC) Protocols: CSMA/CD (used in Ethernet), CSMA/CA (used in Wi-Fi)
- 2.2.5 MAC Addressing: Format and Role in Frame Delivery

Unit 3: Network and Transport Layer Concepts

3.1 Network Layer

- 3.1.1 Introduction to Network Addressing
- 3.1.2 List and describe the Components of IP Address
- 3.1.3 List and explain IP Address Classes
- 3.1.4 Define subnet and describe the necessity of sub-netting
- 3.1.5 Illustrate sub-netting and Subnet mask calculations
- 3.1.6 Explain sub-netting with a simple example
- 3.1.7 List the advantages and disadvantages of sub-netting
- 3.1.8 Describe the Internet Protocol Addressing: IPv4 and IPv6
- 3.1.9 State the need for IPv6
- 3.1.10 Explain about Classful addressing and classless addressing in IPv4
- 3.1.11 Describe Internet Protocol Version-6 (IPv6) addressing
- 3.1.12 Routing: Static vs. Dynamic Routing
- 3.1.13 List the functions of Router

3.2 Transport Layer

- 3.2.1 Transport Layer Services
- 3.2.2 Addressing: Port Numbers
- 3.2.3 Connection establishment (3-way handshake) and connection release
- 3.2.4 Flow Control, Error Control – Sliding window
- 3.2.5 Explain the features of UDP
- 3.2.6 TCP and UDP: differences

Unit 4: Session, Presentation & Application Layers Concepts

4.1 Session Layer

- 4.1.1 Explain the functions of Session Layer
- 4.1.2 Role of Session Layer in the OSI model
- 4.1.3 Session establishment, maintenance, and termination

4.2 Presentation Layer

- 4.2.1 Explain the functions of Presentation Layer
- 4.2.2 Role of Presentation Layer in the OSI model
- 4.2.3 Data formatting, encryption/decryption – Private Key & Public Key
- 4.2.4 Cryptography and compression

4.3 Application Layer Protocols

- 4.3.1 HTTP – Hypertext Transfer Protocol
- 4.3.2 FTP – File Transfer Protocol
- 4.3.3 SMTP – Simple Mail Transfer Protocol
- 4.3.4 DNS – Domain Name System
- 4.3.5 Telnet – Remote login protocol

4.4 Address Resolution & Configuration

- 4.4.1 DHCP – Dynamic Host Configuration Protocol (Dynamic IP assignment)
- 4.4.2 ARP / RARP – Address Resolution Protocol and Reverse ARP (IP-to-MAC and MAC-to-IP mapping)

Unit 5: Network Security and Emerging Concepts

5.1 Network Security

- 5.1.1 Define basic security principles (CIA triad)
- 5.1.2 Firewalls: types, configuration
- 5.1.3 Intrusion Detection Systems (IDS) – basic idea

5.2 Overview of Emerging Concepts

- 5.2.1 Discuss the principles and uses of Virtual Private Networks (VPNs)
- 5.2.2 Explain the key features and applications of Delay Tolerant Networks (DTN)
- 5.2.3 Explore the role of Sensor Networks in intelligent applications
- 5.2.4 Describe Vehicular Networks, and their role in intelligent transport systems
- 5.2.5 Explain the fundamentals and features of 5G Communication Technology.

CO-PO/PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	2	2	1	1	-	2	2	3	-
CO2	3	3	3	-	-	-	2	2	3	-
CO3	3	3	3	1	1	-	2	3	3	2
CO4	2	2	2	2	-	-	2	2	2	2
CO5	2	2	3	1	2	2	3	3	2	3
Average	2.6	2.4	2.6	1	0.8	0.4	2.2	2.4	2.6	1.4

3 = strongly mapped, 2=moderately mapped, 1=slightly mapped

- 5 Method is to relate the level of PO with the number of hours devoted to the COs which address the given PO.
- 6 If > 40% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 3.
- 7 If 25 to 40% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 2.
- 8 If 5 to 25% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 1.
- 9 If < 5% of classroom sessions addressing a particular PO, it is considered that PO is not addressed.

COURSE CONTENT

Unit 1: Fundamentals of Networking and Data communication: Basics of Data Communication: Components– Data representation– Data flow– Analog and Digital Signals–Periodic and Non-Periodic Signals– Sine Wave characteristics– Digital Signal concepts –Transmission Impairment –Transmission Modes – Parallel and Serial Transmission–Asynchronous and Synchronous Transmission

Need for Networking – Purpose and benefits –Types of Networks – LAN, MAN, WAN, PAN –Network Standards and Models – OSI and TCP/IP –OSI Model – Layers and functions –TCP/IP Model – Layers and functions –OSI vs. TCP/IP – Comparison – Network Topologies – Bus, Ring, Star, Mesh, Hybrid (advantages/ disadvantages) – Network Devices – Repeater, Hub, Switch, Router, NIC, Modem, Gateway –Wireless Technologies – Wi-Fi, Bluetooth

Unit 2: Physical and Data Link Layer:

Physical Layer: Transmission Media – Coaxial, Twisted Pair, Optical Fiber – Media Comparison – Bandwidth, speed, interference –Connectors – RJ-45, ST, SC, LC – Multiplexing – TDM, FDM, bandwidth sharing – Switching Methods – Circuit, Packet, Message

Data Link Layer: Error Concepts – Types of errors, redundancy –Coding – Block coding –Error Control – Parity, CRC, FEC vs. retransmission –MAC Protocols – CSMA/CD (Ethernet), CSMA/CA (Wi-Fi) – MAC Addressing – Format and use

Unit 3: Network and Transport Layer Concepts

Network Layer: IP Addressing – Structure, network & host ID –IP Classes – A, B, C, D, E– Subnetting – Concept, benefits, calculations – Internet Protocols – IPv4 and IPv6 –Addressing Methods – Classful, Classless (IPv4), IPv6 format – Routing – Static and Dynamic – Router – Functions.

Transport Layer: Services – Addressing: Port Numbers – Connection establishment (3-way handshake) and connection release- Flow Control, Error Control – Sliding window – Features of UDP– TCP and UDP: differences

Unit 4: Session, Presentation & Application Layers Concepts: Session Layer: Role – Starting, managing, ending sessions – Presentation Layer: Functions – Data format, encryption /decryption– Private & public key –cryptography and compression – Application Layer Protocols: HTTP, FTP, SMTP, DNS, Telnet – Purpose and working – Address Resolution & Configuration: DHCP – Dynamic IP assignment – ARP / RARP – IP-to-MAC and MAC-to-IP mapping

Unit 5: Network Security and Emerging Concepts: Wireless Networks- Network Security-CIA Triad – Firewalls – Intrusion Detection basics – Emerging Network Concepts: Virtual Private Networks – principles and uses – Delay Tolerant Networks – features and applications – Vehicular Networks –role in intelligent transport systems – Sensor Networks – Fundamentals of 5G.

FOR UNIT TESTS I & II**

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 to 3.1
Unit test-II	From 3.2 to 5.2

Cyber Security

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM404E	Cyber Security	3	45	30	70	2

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Introduction to Cyber Security	14	29	3	2.5	CO1
2.	Cyberspace and the law & Cyber forensics	13	29	3	2.5	CO2
3.	Cybercrime in Mobile and Wireless Devices	9	21	3	1.5	CO3
4.	Privacy Issues Basic Data Privacy Concepts	9	21	2	1.5	CO4
Total		45	100	12	8	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To understand fundamental concepts, principles, and terminologies in cyber security.
(ii)	To recognize and analyze various types of cyber threats, and attacks
(iii)	To understand cyber laws, regulatory frameworks, and ethical considerations in cyberspace.
(iv)	To gain knowledge of cyber forensics processes, tools, and techniques.
(v)	To understand security issues in mobile, wireless, and IoT devices.

COURSE OUTCOMES

CO1	CM404.1	To identify fundamental cyber security concepts and explain various types of cyber-attacks and cyber-crimes
CO2	CM404.2	To interpret various cyber laws, regulations, and policies, and explain the role of cyber forensics in investigation.

CO3	CM404.3	To assess threats to mobile, and wireless devices and recommend appropriate security measures.
CO4	CM404.4	To analyze privacy issues in different domains, interpret privacy policies, and recommend protection strategies.

LEARNING OUTCOMES

1.0 Introduction to Cyber Security

- 1.1 Define cyber security and explain its fundamental principles.
- 1.2 List and explain different layers of security.
- 1.3 Classify and list various types of Cyber Attacks
- 1.4 Explain different web-based attacks such as phishing, SQL injection, and cross-site scripting.
- 1.5 Explain system-based attacks such as malware, ransomware, and DoS/DDoS.
- 1.6 Define and differentiate between vulnerability, threat, and harmful acts with examples.
- 1.7 Describe internet Governance – Challenges and Constraints
- 1.8 Define Computer Criminals and CIA Triad (Confidentiality, Integrity, Availability)
- 1.9 Identify the motives of attackers (financial, political, hacktivism, espionage).
- 1.10 Explain types of Attacks.
 - 1.10.1 passive Attacks
 - 1.10.2 Software Attack
 - 1.10.3 Hardware Attacks
- 1.11 What is Security Policy and explain different policies.

2.0 Cyberspace and the law & Cyber forensics

- 2.1 Define cyberspace and explain its characteristics.
- 2.2 Describe global and national cyber security regulations.
- 2.3 Discuss NIST compliance and its relevance to cyber security standards.
- 2.4 Explain National Cyber Security Policy of India – objectives, strategies, and limitations.
- 2.5 Define the term Cyber Forensics and Digital Forensics
- 2.6 Explain the need for computer forensics in cybercrime investigation.

- 2.7 Explain different approaches for analysis of email Forensics
- 2.8 Discuss different tools of email forensics.
- 2.9 Describe life cycle of digital Forensics
- 2.10 List different types of Forensics Investigations
- 2.11 Discuss different challenges faced in computer forensic investigations.

3.0 Cybercrime in Mobile and Wireless Devices

- 3.1 List different Mobile and Wireless devices.
- 3.2 Describe current trends in mobility and connected devices.
- 3.3 Discuss Security Challenges specific to mobile devices, such as OS vulnerabilities and unsecured communication.
- 3.4 Describe Registry and configuration Settings for Mobile Devices
- 3.5 Describe different types of attacks on mobile/cell phones (SIM cloning, malware, network spoofing, SMS phishing).
- 3.6 Describe Organizational mobile security Policies.

4.0 Privacy Issues: Basic Data Privacy Concepts

- 4.1 Explain various types of data privacy attacks such as identity theft and surveillance
- 4.2 Discuss Data linking and profiling with examples.
- 4.3 Explain various Privacy policies and their specifications
- 4.4 Describe privacy policy languages and their applications.
- 4.5 Discuss privacy requirements in various domains such as healthcare, finance, e-commerce, and social media.

CO-PO / PSO MAPPING

CO NO.	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 to 2.5
Unit test-II	From 2.6 to 4.5

CLOUD COMPUTING

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM405E	CLOUD COMPUTING	3	45	30	70	2

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Introduction to Cloud Computing	8	17	3	1	CO1
2.	Parallel and Distributed Computing Concepts	10	25	3	2	CO2
3.	Virtualization and Cloud Architecture Services	14	33	3	3	CO3
4.	Cloud Deployment Models and Cloud Economics	13	25	3	2	CO4
Total		45	100	12	8	

COURSE OBJECTIVES

Upon completion of the course the student shall be able to

(i)	Learn what cloud computing is and the basics of related types like cluster, grid, parallel, and distributed computing.
(ii)	Understand what virtualization means, and describe how cloud services are organized (IaaS, PaaS, SaaS) and what the main parts of cloud systems are.
(iii)	Know about different types of cloud setups (public, private, hybrid, community) and get to know the main companies that offer cloud services
(iv)	Discuss about how using cloud computing affects costs, what problems or benefits it might bring, and what new developments—like better security or easier scaling—are happening in the cloud.

COURSE OUTCOMES

CO1	CM405.1	Describe what cloud computing is and understand key related paradigms such as cluster, grid, parallel, and distributed computing.
CO2	CM405.2	Explain the role of virtualization in cloud computing, and clearly describe the main cloud service models — Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS).
CO3	CM405.3	Recognize different cloud deployment models like public, private, hybrid, and community clouds, and identify major cloud service providers and their offerings.
CO4	CM405.4	Analyse the cost factors, challenges, benefits, and latest developments in cloud computing including security, scalability, and emerging technologies.

LEARNING OUTCOMES

1.0 Introduction to Cloud Computing

- 1.1 Define cloud computing, including basic terminology.
- 1.2 Describe the history and evolution of cloud computing.
- 1.3 List the core features and principles of cloud computing.
- 1.4 Define and distinguish recent computing trends:
 - 1.4.1 Cluster Computing
 - 1.4.2 Grid Computing
 - 1.4.3 Distributed Computing
 - 1.4.4 Utility Computing
- 1.5 Identify the major cloud service providers currently in the market.
- 1.6 Enumerate challenges in cloud computing.
- 1.7 Summarize the advantages and disadvantages of cloud computing.

2.0 Parallel and Distributed Computing Concepts

- 2.1 Trace the main eras of computing leading up to cloud computing.
- 2.2 Explain parallel computing:
 - 2.2.1 Define parallel computing and its key concepts.
 - 2.2.2 Describe hardware architecture for parallel processing.
 - 2.2.3 Explain approaches and levels of parallelism.
- 2.3 Understand distributed computing:
 - 2.3.1 Define distributed computing and its general concepts.
 - 2.3.2 List components and architectural styles (software and system) for distributed systems.
 - 2.3.3 Explain models for inter-process communication.
- 2.4 Identify technologies for distributed computing:
 - 2.4.1 Remote Procedure Call (RPC).

2.4.2 Distributed Object Framework.

2.4.3 Service-Oriented Computing.

3.0 Virtualization and Cloud Architecture

3.1 Define virtualization and explain its importance.

3.2 Enumerate the characteristics of virtualization.

3.3 Classify and explain major virtualization techniques:

3.3.1 Machine Reference Model.

3.3.2 Hardware Level Virtualization and its techniques.

3.3.3 OS Level Virtualization.

3.3.4 Programming Language Level Virtualization.

3.3.5 Application Level Virtualization.

3.4 Discuss the role of virtualization in enabling cloud computing.

3.5 Analyze the pros and cons of virtualization for organizations and users.

3.6 Recognize popular virtualization technologies:

3.6.1 Xen

3.6.2 VMware

3.6.3 Microsoft Hyper-V

3.7 Illustrate the working of cloud computing architectures.

3.8 List and define the main cloud service models:

3.8.1 Infrastructure as a Service (IaaS): Description and characteristics.

3.8.2 Platform as a Service (PaaS): Description and characteristics.

3.8.3 Software as a Service (SaaS): Description and characteristics.

3.9 Compare and contrast IaaS, PaaS, and SaaS based on features and use cases.

4.0 Cloud Deployment Models and Cloud Economics

4.1 List and define types of cloud deployment models

4.2 State the purposes and use cases for each model

4.3 Deep dive into deployment models:

4.3.1 Public Cloud: Definition, working, pros, and cons

4.3.2 Private Cloud: Definition, working, pros, and cons

4.3.3 Hybrid Cloud: Definition, working, pros, and cons

4.3.4 Community Cloud: Definition, working, pros, and cons

4.4 Discuss the economics of cloud computing:

4.4.1 Cost considerations

4.4.2 Operational versus capital expenditure

4.4.3 Scalability and business agility benefits

4.5 Appreciate ongoing and emerging trends impacting cloud computing:

4.5.1 Edge Computing, Serverless Computing

4.5.2 AI and Machine Learning in the Cloud

4.5.3 Cloud Security Innovations

4.5.4 Emerging Service Models (e.g., Function as a Service, Container Services).

CO-PO-PSO MAPPING

Course Outcome	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3	2			1		1
CO2	3	1	2	2	1		
CO3	2	1	2	1	2	1	1
CO4	1	3	1		2	2	2
Average	2.25	1.75	1.67	1.5	1.5	1.5	1.33

COURSE CONTENT

1. Introduction to Cloud Computing

Definition and Evolution, Key Features and Principles, Essential Characteristics Basic principles behind cloud operation, Recent Computing Paradigms, Cluster Computing, Grid Computing, Distributed Computing, Utility Computing, Cloud Ecosystem, Overview of Cloud Service Providers, Challenges in Cloud Computing, Advantages and Disadvantages of Cloud Computing

2. Parallel and Distributed Computing Concepts

Evolution of Computing, Eras of Computing: Mainframe, Client-Server, Internet, Cloud, Parallel Computing, Hardware Architecture for Parallel Processing, Approaches, Pipeline Parallelism, Levels of Parallelism, Distributed Computing, Components of Distributed Systems, Software Architectural Styles: Client-Server, n-tier, Peer-to-peer, System Architectural Styles: Centralized, Decentralized, Hybrid, Inter-process Communication, Distributed Technologies: RPC, Distributed Object Framework, Service Oriented Architecture (SOA)

3. Virtualization and Cloud Architecture Services

Basics of Virtualization, Characteristics of Virtualization, Types of Virtualization, Virtualization in Cloud Computing, Role and Importance in Cloud Infrastructure, Pros and Cons, Examples of Virtualization Technologies, Xen, VMware, Microsoft Hyper-V, Cloud Architecture, Cloud Service Models, Infrastructure as a Service (IaaS)-Features, Providers, Use Cases, Platform as a Service (PaaS)-Features, Providers, Use Cases, Software as a Service (SaaS)-Features, Providers, Use Cases, Comparison of Service Models

4. Cloud Deployment Models and Cloud Economics

Overview of Deployment Models, Public Cloud, Private Cloud, Hybrid Cloud Community Cloud, Selection and Economics, Purposes and Selection Criteria, Introduction to Cloud Economics, Economics of Cloud Computing, Cost Considerations: CapEx vs. OpEx, Return on Investment (ROI), Scalability and Business Agility, Edge Computing, Serverless Computing, AI and Machine Learning in the Cloud, Cloud Security Innovations, Emerging Service Models

TROUBLESHOOTING OF COMPUTER NETWORKS

Course code	Course Title	No. Of periods/ week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM406A	TROUBLESHOOTING OF COMPUTER NETWORKS	2	30	-	-	-

TIME SCHEDULE

S.No.	Unit/Chapter Title	No. of Periods	COs Mapped
Unit 1	Basics of Troubleshooting and Network Faults	10	CO1
Unit 2	Troubleshooting Tools and Commands	10	CO2
Unit 3	Troubleshooting Wired and Wireless Networks	10	CO3
Total		30	

COURSE OBJECTIVES

Upon successful completion of this course, the student will be able to:

(i)	Identify and analyze network-related issues in LAN/WAN environments.
(ii)	Understand error types in hardware and software components of networks.
(iii)	Use diagnostic tools and commands to resolve common network problems.

COURSE OUTCOMES

CO1	CM406.1	Identify common network faults and failures.
CO2	CM406.2	Use hardware and software tools for network troubleshooting.
CO3	CM406.3	Troubleshoot connectivity issues in wired and wireless networks.

CO-PO/PSO MAPPING

Average	3	3	2.67	2.33	1.67	2	2	3	3	2

3=strongly mapped, 2=moderately mapped, 1=slightly mapped

- Method is to relate the level of PO with the number of hours devoted to the COs which address the given PO.

- If > 40% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 3
- If 25 to 40% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 2
- If 5 to 25% of classroom sessions addressing a particular PO, it is considered that PO is addressed at Level 1
- If < 5% of classroom sessions addressing a particular PO, it is considered that PO is not-addressed.

LEARNING OUTCOMES

Unit 1: Basics of Troubleshooting and Network Faults

- 1.1 Fundamentals of troubleshooting.
 - 1.1.1 What is troubleshooting?
 - 1.1.2 Types of Maintenance: Preventive & Corrective Maintenance.
 - 1.1.3 Various approaches to Troubleshooting.
 - 1.1.3.1 Top-Down Approach
 - 1.1.3.2 Bottom-up Approach
 - 1.1.3.3 Divide and Conquer
 - 1.1.3.4 Follow the Path
 - 1.1.3.5 Spot the difference
 - 1.1.4 Key Steps in Network Troubleshooting.
- 1.2 Common network faults: Cable issues, NIC failure, switch/router faults.
- 1.3 Types of errors: Link down, IP conflict, DNS resolution error.
- 1.4 Importance of logs and reporting
- 1.5 Service Desk Process: Basic ticket lifecycle – Ticket creation, classification, assignment, resolution, closure.

Unit 2: Troubleshooting Tools and Commands

- 2.1 OS-level tools: ping, tracert/traceroute, ipconfig/ifconfig, netstat, nslookup, arp, route
- 2.2 Graphical tools: Wireshark, Advanced IP Scanner, Cisco Packet Tracer
- 2.3 Hardware tools: Cable tester, Loopback plug, Crimping tools
- 2.4 Hands-on activities:
 - 2.4.1 Crimp RJ-45 connectors
 - 2.4.2 Test Ethernet cables using LAN cable tester
 - 2.4.3 Observe and interpret LED indicators on switches and routers

Unit 3: Troubleshooting Wired and Wireless Networks

- 3.1 Wired LAN issues:
 - 3.1.1 Bad cables
 - 3.1.2 Loose connectors
 - 3.1.3 Improper crimping
- 3.2 LAN setup:
 - 3.2.1 Assign static/dynamic IPs
 - 3.2.2 Verify subnet mask and gateway

- 3.2.3 Test network connectivity
- 3.2.4 Addressing misconfigurations (e.g., IP conflicts, subnet errors, VLAN issues)
- 3.3 Diagnosing Common Network Faults:
 - 3.3.1 Loss of network connectivity
 - 3.3.2 Slow network performance
 - 3.3.3 Intermittent disconnections
- 3.4 Packet analysis: Use Wireshark to capture and examine packets (e.g., ARP, ICMP, DNS)
- 3.5 Wireless network problems:
 - 3.5.1 Interference from other devices/networks
 - 3.5.2 Weak signal coverage/coverage gaps
 - 3.5.3 Authentication failures (wrong password, encryption type mismatch)
- 3.6 Wireless troubleshooting activities:
 - 3.6.1 Change SSID and security settings
 - 3.6.2 Analyze signal strength
 - 3.6.3 Resolve connection issues by adjusting placement, channel, or Encryption.

LAB ACTIVITIES (SUGGESTIVE)

Unit 1: Basics of Troubleshooting and Network Faults

1. **Exercise 1.1:** Identify Physical Layer Faults
 - **Activities:** Unplug NIC, use faulty cable, disable network interface
 - **Objective:** Detect and isolate hardware faults
 - **Tools:** Ethernet cable, PC NIC settings
2. **Exercise 1.2:** Simulate and Troubleshoot IP Address Conflict
 - **Activities:** Assign same IP to two hosts in a LAN and resolve the conflict
 - **Objective:** Understand IP address management and conflict resolution
 - **Tools:** PCs, LAN Switch
3. **Exercise 1.3:** Diagnose and Resolve DNS Resolution Error
 - **Activities:** Use incorrect DNS entry and troubleshoot using nslookup
 - **Objective:** Understand name resolution
 - **Tools:** Command prompt / Terminal, DNS server or public DNS (e.g., 8.8.8.8)
4. **Exercise 1.4:** Simulate and Troubleshoot Link Down Scenarios
 - **Activities:** Disconnect cable or disable port and restore connectivity
 - **Objective:** Practice identifying and resolving Layer 1/2 link issues and resolution
 - **Tools:** Switch/router, cable
5. **Exercise 1.5:** Apply Structured Troubleshooting and Documentation
 - **Activities:** Document a network issue and follow the ticket lifecycle
Simulate a network issue (e.g., no internet)

Use step by step troubleshooting process

Fill out a troubleshooting report/log

- **Objective:** Use a structured troubleshooting method to diagnose and resolve a simulated issue
- **Tool:** Excel or simulated ticketing software (osTicket), windows/Linux system

6. **Exercise 1.6:** Log File Analysis for Network Issues

- **Activities:** Use Windows Event Viewer or Linux log files to trace network events
- **Objective:** Learn how to interpret logs for fault diagnosis
- **Tools:** Windows/Linux system

Unit 2: Troubleshooting Tools and Commands

7. **Exercise 2.1:** Use Using OS-level Network Commands for Network Testing

- **Activities:** Test IP connectivity using ping, View routing table and ARP cache, Resolve DNS using nslookup
- **Objective:** Understand diagnostic command outputs
- **Tools:** ping, tracert, ipconfig, netstat, nslookup, arp, route

8. **Exercise 2.2:** Capture and Analyze Packets Using Wireshark

- **Activities:** Capture packets during web access or ping, filter DNS/HTTP/ARP
- **Objective:** Observe packet-level communication and identify errors
- **Tools:** Wireshark

9. **Exercise 2.3:** Discover devices and open ports in a subnet Using IP Scanning Tools

- **Activities:** Scan subnet with Advanced IP Scanner; identify live hosts and open ports
- **Objective:** Practice IP Scanning and Host Discovery
- **Tools:** Advanced IP Scanner

10. **Exercise 2.4:** Crimp RJ-45 Cables and Test

- **Activities:** Create straight-through/crossover cables; test using LAN cable tester
- **Objective:** Verify cable quality and pinout
- **Tools:** Crimping tool, cable tester, RJ-45 connectors, Cat5e/Cat6 cables

11. **Exercise 2.5:** Use Loopback Plugs and Cable Testers

- **Activities:** Check NIC functionality and test cable continuity
- **Objective:** Understand use of loopback plugs; Validate hardware and cabling with tools
- **Tools:** Loopback plug, LAN cable tester

Unit 3: Troubleshooting Wired and Wireless Networks

12. **Exercise 3.1:** Configure and Troubleshoot a Wired LAN
- **Activities:** Assign static and dynamic IP addresses
Set subnet mask and gateway
Use ping to test connectivity
 - **Objective:** Perform LAN setup and diagnose IP/subnet/VLAN misconfigurations
 - **Tools:** PCs, Switch, DHCP server/router
13. **Exercise 3.2:** Diagnose Wired Network Performance
- **Activities:** Capture traffic in problematic scenarios (e.g., high latency)
 - **Objective:** Identify retransmissions, delays, and dropped packets
 - **Tools:** Wireshark, Switch, PCs
14. **Exercise 3.3:** Set Up and Troubleshoot Wireless Networks
- **Activities:** Change SSID/security settings
Measure signal strength and adjust channel
Simulate and resolve auth errors
 - **Objective:** Resolve coverage, interference, and auth errors
 - **Tools:** Wireless router, Wi-Fi analyzer app, laptop
15. **Exercise 3.4:** Simulate Network Faults Using Packet Tracer
- **Activities:** Create a small topology in Cisco Packet Tracer or GNS3
Introduce faults (e.g., wrong IP, missing cable, switch off)
Diagnose and resolve
 - **Objective:** Practice fault handling virtually
 - **Tools:** Cisco Packet Tracer

REQUIRED SOFTWARE

Software	Purpose	Platform
Wireshark	Packet capture and analysis	Windows/Linux
Cisco Packet Tracer	Network simulation	Windows/Linux
Advanced IP Scanner	Host discovery & scanning	Windows
Event Viewer	View system and network logs	Windows
Notepad++ / Excel	Logging and ticket simulation	Windows/Linux
Basic ticketing software (e.g., osTicket)	To manage customer support requests	Windows/Linux

REQUIRED HARDWARE AND TOOLS

Hardware / Tools	Purpose
PCs/Laptops (Min 2)	Testing, configuration, and monitoring of network setups
RJ-45 Cables	Provides physical LAN connectivity
Crimping Tool	Used to attach RJ-45 connectors to Ethernet cables
LAN Cable Tester	Tests continuity and pin configuration of Ethernet cables
Loopback Plug / Adapter	Tests NIC and serial port functionality
Network Switch	Facilitates basic wired LAN connectivity between devices
Wi-Fi Router/Access Point	Provides wireless network setup and troubleshooting

Multimeter (optional)	Measures voltage, continuity in electrical components/cables
Cable Stripper	Strips insulation from cables before crimping
Tone Generator	Traces and identifies cables within a bundle or wall
Cables (Cat5e/Cat6)	Used to build or replace Ethernet connections
Labelling Stickers / Tags	For labelling cables and ports for easier identification

Web Technologies Lab

Course code	Course Title	No. Of periods / week	Total No. of Periods/ Semester	FA Marks	SA Marks	Credits
26CM407L	WEB TECHNOLOGIES LAB	6	90	40	60	2.5

TIME SCHEDULE

S.No.	Chapter/Unit Title	No. of Periods	COs Mapped
1.	HTML & Basic Web Design	15	CO1
2.	CSS & XML	18	CO2, CO3
3.	JavaScript & JQuery	21	CO1, CO2
4.	PHP	21	CO3, CO4
5.	Mini – Project	15	CO1, CO2, CO3, CO4, CO5
Total Periods		90	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	Understand the fundamental principles of designing clear, effective, and user-friendly web pages.
(ii)	Learn to structure and style web content using HTML and CSS.
(iii)	Develop the skills to create functional websites that incorporate both client-side and server-side components.
(iv)	Gain familiarity with essential web technologies such as JavaScript, jQuery, and PHP.
(v)	Understand how to connect web applications to a database using PHP for dynamic content management.

COURSE OUTCOMES

CO1	CM407.1	Design and implement interactive web pages using HTML, CSS, and JavaScript.
CO2	CM407.2	Demonstrate the usage and features of jQuery to enhance user interaction and DOM manipulation.
CO3	CM407.3	Develop dynamic web applications using server-side programming with PHP.
CO4	CM407.4	Implement database connectivity using PHP and MySQL to manage and retrieve data.

CO5	CM407.5	Create real-world web applications using a combination of front-end and back-end tools and technologies.

3=strongly mapped, 2=moderately mapped, 1=slightly mapped

- Method is to relate the level of PO with the number of hours devoted to the COs which address the given PO.
- If > 40% of lab sessions addressing a particular PO, it is considered that PO is addressed at Level 3.
- If 25 to 40% of lab sessions addressing a particular PO, it is considered that PO is addressed at Level 2.
- If 5 to 25% of lab sessions addressing a particular PO, it is considered that PO is addressed at Level 1.
- If < 5% of lab sessions addressing a particular PO, it is considered that PO is not addressed.

LIST OF EXERCISES

HTML & Basic Web Design

1. Create a Simple Web Page with Basic Tags using <html>, <head>, <title>, <body>, and text formatting tags.
2. Design a Web Page Using Lists and Character Entities using ordered, unordered, and definition lists along with character entities.
3. Create a Web Page Using Tables by using <table>, <thead>, <tbody>, <tfoot>, <th>, <td>, rowspan, colspan.
4. Build a Web Page with Links and Images using <a> and with various attributes (target, href, src, alt, etc.).
5. Create a Web Form for User Registration using <form>, <input>, <textarea>, <select>, <option>, <fieldset>, <legend>.

CSS

1. Apply Inline, Internal, and External CSS to a Web Page to demonstrate styling using different CSS levels.
2. Use CSS Selectors and Box Model Properties
Style elements using class, ID selectors; apply padding, margin, border.

3. Design a Responsive Layout Using Flexbox and Grid

Use display: flex and display: grid to build two-column layouts.

XML

1. Create a Simple XML Document - Define a custom XML structure (e.g., student list) and ensure it follows rules.

JavaScript & AngularJS

1. Use basic JavaScript validation for required fields and pattern matching.
2. Create a calculator or age calculator using functions and onclick.
3. Display student details using arrays and manipulate them dynamically.
4. Show current date and time using Date, perform calculations using Math.
5. Build simple, interactive web pages using core AngularJS directives.

JQuery

1. Access elements using element, ID, and class selectors. Use .css() to change styles.
2. Demonstrate JQuery Effects using .hide(), .show(), .fadeIn(), .slideToggle() on divs.
3. Manipulate DOM Using JQuery using .html(), .text(), .append() to dynamically update content.
4. Handle Events with JQuery using click, hover, focus, submit events to trigger alert or form validation.

PHP – Basics

1. Install the following on local machine:
 - i. Apache Web server
 - ii. MySQL
 - iii. PHP and configure it to work with Apache Web server and MySQL.
2. Display a welcome message using echo, variables, and constants.
3. Write a program that manipulates strings and arrays (e.g., reverse a string, sort array).
4. Create a PHP Script for Form Handling - Read form data using \$_POST and display it.

PHP & MySQL

1. Connect to MySQL Database and Display Data using mysqli_connect, fetch data from a table, and display using PHP.
2. Insert Form Data into MySQL Database - Create a form, insert submitted data into a MySQL table.

3. Update and Delete Records in MySQL using PHP Create pages to edit and delete records using UPDATE and DELETE.

PHP – Cookies & Sessions

1. Write a script to create a cookie and display its value on another page.
2. Create a Login Page Using Sessions Authenticate user, start session, and display a welcome message on a protected page.

Note: Mini project – Few examples as listed below.

1. Student Registration System

Build a complete student registration form that saves data to a MySQL database.

2. Online Feedback Form with Admin View

Collect feedback from users and display it in an admin panel.

3. Simple Product Catalogue with Search

Display a list of products pulled from a database with a search option.

4. User Login & Profile Page

Implement a basic authentication system with session handling.

5. Online Event Booking Application

Create a system to book seats for events or workshops.

TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED FOR UNIT TESTS I & II

Unit Test	Learning outcomes to be covered
Unit test-I	1 to 17
Unit test-II	18 to 34

COMMUNICATION AND EMPLOYABILITY SKILLS

Course code	Course Title	No. Of periods /week	Total No. of periods / Semester	Marks for FA	Marks for SA	Credits
26CM408L	COMMUNICATION & EMPLOYABILITY SKILLS	4	60	40	60	2

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	COs Mapped
1.	ABC of Communication	6	CO1
2.	Let's Learn to Listen	6	CO2
3.	I am...	4	CO4
4.	Let's Talk About...	4	CO4
5.	JAM	6	CO4
6.	Interpreting Data	6	CO3
7.	Your Perfect Profile	4	CO5
8.	Group Discussion	8	CO4, CO5
9.	Interview Skills	8	CO4, CO5
10.	Making Presentations	8	CO3
	Total	60	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To impart verbal and non-verbal communication skills.
(ii)	To foster employability skills among the students for career building.

COURSE OUTCOMES

CO1	CM408.1	Practice appropriate body language and etiquette
CO2	CM408.2	Listen and comprehend the listening inputs related to different genres effectively
CO3	CM408.3	Interpret data and give oral and written presentations in academic and professional contexts
CO4	CM408.4	Communicate effectively in interpersonal interactions, interviews, and group discussions
CO5	CM408.5	Exhibit employability skills: job hunting, resume writing, and attending interviews

LEARNING OUTCOMES

UNIT 1: ABC of Communication

- 1.1. Understand and practice the process of communication.
- 1.2. Demonstrate appropriate body language traits for better communication.
- 1.3. Apply appropriate strategies to minimize various barriers of communication.
- 1.4. Communicate effectively in a given situation.

UNIT 2: Let's Learn to Listen

- 2.1. Identify and distinguish different phonic sounds in English language.
- 2.2. Practice active listening techniques for better comprehension.
- 2.3. Comprehend diverse listening inputs in academic, professional and everyday situations using appropriate strategies.

UNIT 3: I am...

- 3.1. Prepare an organised self-introduction for formal and informal situations.
- 3.2. Introduce yourself in job interviews effectively.
- 3.3. Demonstrate appropriate body language while introducing yourself.

UNIT 4: Let's Talk About...

- 4.1. Describe objects, places, events and people using appropriate adjectives.
- 4.2. Use appropriate sentences and expressions while describing.
- 4.3. Use suitable adjectives to convey mood or tone.

UNIT 5: JAM

- 5.1. Generate ideas on a given topic.
- 5.2. Organise the ideas sequentially for an effective JAM speech.
- 5.3. Speak spontaneously and fluently on a given topic within the stipulated time.

UNIT 6: Interpreting Data

- 6.1. Understand different forms of graphs, charts, diagrams and tables.
- 6.2. Analyse and interpret data.

6.3. Present the inferences and findings in spoken and written communication.

UNIT 7: Your Perfect Profile

7.1. Draft a customised professional resume.

7.2. Create a professional Applicant Tracking System (ATS) compliant Resume.

7.3. Draft a cover letter to communicate with prospective employers.

UNIT 8: Group Discussion

8.1. Understand the significance of group discussion and differentiate the various stages involved.

8.2. Practice various roles and skills involved in group discussion.

8.3. Demonstrate appropriate body language for effective participation in group discussion.

UNIT 9: Interview Skills

9.1. Practice proper interview demeanour.

9.2. Respond effectively to frequently asked interview questions (FAQs).

9.3. Demonstrate readiness for job opportunities.

UNIT 10: Making Presentations

10.1. Practise the principles of good presentation.

10.2. Use appropriate presentational aids.

10.3. Prepare and give presentations on various topics effectively.

COURSE CONTENT

Sl. No.	Name of the Unit	Contents
1	ABC of Communication	<ul style="list-style-type: none">• Aspects of Communication• Body language: Verbal & Nonverbal Communication• Communication Barriers• Strategies for effective communication
2	Let's Learn to Listen	<ul style="list-style-type: none">• Basics of pronunciation: Vowel & Consonant sounds• Active vs Passive listening• Barriers to listening• Types of listening & Techniques for effective listening• Listening Comprehension Activities: Academic, Professional, Social conversations
3	I am...	<ul style="list-style-type: none">• Significance of self-introduction in formal and informal contexts• Components and structure of self-introduction• Self-introduction in job interviews• Body language while introducing oneself

4	Let's Talk About...	<ul style="list-style-type: none"> Describing objects, people, places and events Using appropriate adjectives for different kinds of descriptions Using right Tense and tone
5	JAM	<ul style="list-style-type: none"> JAM – Structure and organisation Generating and organising ideas for JAM speech Dos and Don'ts of JAM Strategies and techniques for effective JAM speech Planning a perfect one-minute speech
6	Interpreting Data	<ul style="list-style-type: none"> Presentation of data in Graphs, Charts, diagrams, and tables Analysing and interpreting non-verbal data Presenting non-verbal information in verbal form (spoken and written)
7	Your Perfect Profile	<ul style="list-style-type: none"> Significance of a resume in career building Resume, Curriculum Vitae (CV) and Bio-data Applicant Tracking System (ATS) Resume – components and structure Video Resume Drafting a Cover letter
8	Group Discussion	<ul style="list-style-type: none"> Significance of Group Discussion (GD) in job hunting Process of Group Discussion Sub skills of Group Discussion GD Roles and Group dynamics GD body language Techniques for success in GD
9	Interview Skills	<ul style="list-style-type: none"> Significance of Interviews in the Job Selection Process Stages of Interview Preparation: Pre, While, and Post interview Right demeanour and body language for interviews Frequently Asked Questions (FAQs)
10	Making Presentations	<ul style="list-style-type: none"> Principles of good presentation Types of Presentational aids Presentation etiquette Giving effective presentations

CO-PO/PSO MAPPING

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PS01	PS02	PS03
CO1	POs 1 to 5 are not directly applicable to the English course.							Programme Specific Outcomes are branch-specific, with technical aspects that are not directly applicable to the English Language course.		
CO2										
CO3						2	2			
CO4						2	2			
CO5						2	2			
Average						2	2			

3-Strongly Mapped

2- Moderately Mapped

1- Slightly Mapped

Note: The gaps in CO and PO mapping will be met by one or more appropriate activities from the following:

(i) Assignments (ii) Tutorials (iii) Seminars (iv) Guest Lectures (v) Group Discussions (vi) Quizzes (iv) Library Visits etc.,

1.	Basics, overloading, inheritance, overriding	24	CO1, CO2
2.	Streams, Interfaces and Packages and Collections.	18	CO2, CO3
3.	Exceptions and Multi-threaded programming.	18	CO3, CO4
4.	Swings and Event Handling	30	CO5
Total		90	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	Design object-oriented programming paradigm.
(ii)	Able to develop multi-tasking application with the knowledge of multi-threading.
(iii)	Familiarized to develop graphical user interface with event handling mechanism.

COURSE OUTCOMES

CO1	CM409.1	Perform object-oriented programming model application design.
CO2	CM409.2	Design optimized definition for an application with reusability features like inheritance and polymorphism.
CO3	CM409.3	Analyze modular design for real time applications by using packages concept in projects. Able to design data structures used in applications.
CO4	CM409.4	Apply multi-threading concepts to implement multitasking and multi programming applications.
CO5	CM409.5	Develop effective dynamic user interface for any front end applications using Swings and events.

3=strongly mapped, 2=moderately mapped, 1=slightly mapped

- Method is to relate the level of PO with the number of hours devoted to the COs which address the given PO.
- If > 40% of lab sessions addressing a particular PO, it is considered that PO is addressed at Level 3.
- If 25 to 40% of lab sessions addressing a particular PO, it is considered that PO is addressed at Level 2.
- If 5 to 25% of lab sessions addressing a particular PO, it is considered that PO is addressed at Level 1.
- If < 5% of lab sessions addressing a particular PO, it is considered that PO is not addressed.

LEARNING OUTCOMES

1. Exercise programs on conditional statements and loop statements
2. Exercise programs on Strings.
3. Exercise program to create class and objects and adding methods.
4. Exercise programs using constructors and construction over loading.
5. Exercise programs on command line arguments.
 - i) Input as command line arguments and perform operation on that data.
 - ii) Input as command line arguments and update manipulated data in Files.
6. Exercise programs using concept of overloading methods.
7. Exercise programs on inheritance.
8. Write a program using the concept of method overriding.
9. Exercise on packages.
 - i) Creation of packages
 - ii) Design module to importing packages from other packages.
10. Exercise programs on interfaces.
11. Exercise programs on I/O Streams
 - i) Reading data through Keyboard
 - ii) Perform Reading and Writing operations on files using File Streams.
12. Exercise programs on Collections.

- i) Write a java program to search a student mark percentage based on pin number using Array list.
 - ii) Write a java program to create linked list to perform delete, insert, and update data in linked list with any application.
13. Exercise on exception handling.
- i) Programs on try, catch and finally.
 - ii) Programs on multiple catch statements
 - iii) Programs on nested try statements.
14. Exercise on multithreading
- i) Programs on creation of single and multiple threads.
 - ii) Programs on adding priorities to multiple threads.
15. Exercise on applets
- i) Programs on Graphics and colors.
 - ii) Simple animations using threads and graphics.
16. Exercise on AWT controls and Swings
- i) Program to handle mouse events.
 - ii) Program to handle keyboard events.
 - iii) Programs to illustrate JTextField and JButton control.
 - iv) Programs to illustrate JCheckBox and JList control.
 - v) Write an application program to illustrate multiple controls.
 - vi) Programs to illustrate JFrame and JDialog with controls.

KEY COMPETENCIES

Exp. No.	Name of the experiment	Objectives	Key Competencies
1	Exercise programs on conditional statements and loop statements.	(a) Write program using if statement and switch (b) Write program using while, do and for constructs.	(a) Know the usage of IF and switch statements. (b) Compile the program and rectify the errors. (c) Observe the output.
2	Exercise programs on Strings.	(a) Write a programs to manipulate Strings (b) Write a programs to arrange array of strings in ascending order	(a) Create String objects (b) Use string class methods Observe the output.
3	Exercise program to create class and objects and adding methods.	(a) Write a program to create a class and create objects. (b) Write a program to create class adding methods and access class members.	(a) Create class. (b) Declare methods. (c) Create objects. (d) Write main method. (e) Access class members.

4	Exercise programs using constructors and construction over loading.	(a) Write a program using default constructor. (b) Write a program using parameterized constructor.	(a) Declare and define constructor. (b) Call default constructor. (c) Call parameterized constructor. (d) observe constructor overloading.
5	Exercise programs on command line arguments.	(a) Write a program to illustrate usage of command line arguments. (b) Write a program to read data as command line arguments and update it into Files.	(a) Use command line arguments. (b) Run the program. (c) Understand usage of Files. (c) Observe the output.
6	Exercise programs using concept of overloading methods.	(a) Write a program to illustrate method overloading. (b) Write a program to illustrate method overloading using constructors.	(a) Observe method overloading. (b) Overload constructor methods.
7	Exercise on inheritance.	(a) Write a program to illustrate single inheritance. (b) Write a program to illustrate multiple inheritance.	(a) Create base class. (b) Write base class constructor. (c) Create derived class. (d) Use extends keyword. (e) Use super keyword. (f) Write derived class constructor.
8	Write a program using the concept of method overriding.	Write a program using the concept of method overriding.	(a) Use method overriding. (b) Use this keyword. (c) use super keyword
9	Exercise on importing packages.	Write a program to create and importing package.	(a) Create package. (b) Use of access specifiers. (b) Use package. (c) Use import keyword.
10	Exercise on interfaces.	Write a program to illustrate multiple inheritance using interfaces.	(a) Define interface. (b) Use extends keyword. (c) Use implements keyword. (d) Access interface variables.

11	Exercise programs on I/O Streams	<p>(a) Write a program to give values to variables interactively through the keyboard.</p> <p>(b) Write program to read and write primitive data types.</p> <p>(c) Write programs to handle Files.</p>	<p>(a) Use different data types.</p> <p>(b) Use readLine() method.</p> <p>(c) Use println() method.</p> <p>(d) use File Streams</p> <p>Observe the output.</p>
12	Exercise programs on Collections.	<p>(a) Write a java program to search a student mark percentage based on pin number using Array list.</p> <p>(b) Write a java program to create linked list to perform delete, insert, and update data in linked list with any application.</p>	<p>(a) Define collection classes</p> <p>(b) use ArrayList, LinkedList</p> <p>(c) apply List and Iterator Interface</p>
13	Exercise on exception handling	<p>(a) Write a program to illustrate exception handling.</p> <p>(b) Write a program to illustrate exception handling using multiple catch statements.</p> <p>(c) Write a program to illustrate exception handling using nested try.</p>	<p>(a) Use try – catch.</p> <p>(b) Use multiple catch blocks.</p> <p>(c) Use finally statement.</p> <p>(d) use Nested try</p>
14	Exercise on multithreading	<p>(a) Write a program to create single a thread by extending the thread class.</p> <p>(b) Write a program to create a single thread by implementing the runnable interface.</p> <p>(c) Write a program to create multiple threads.</p> <p>(d) Write a program to illustrate thread priorities.</p>	<p>(a) Use extends, new.</p> <p>(b) Use run() and start() methods.</p> <p>(c) Observe thread execution.</p> <p>(d) Use implements runnable interface.</p> <p>(e) Use setPriority() and getPriority() methods.</p> <p>(f) use wait(),notify() methods</p>
15	Exercise on Swings.	<p>Write a program to create simple applet to display different shapes with colors.</p> <p>Write an applet program to design simple animation.</p>	<p>(a) Use <applet>...</applet> tag.</p> <p>(b) Add applet to html file.</p> <p>(c) Run the applet.</p> <p>(d) use graphics methods</p>

			(e) use threads and graphics.
16	Exercise on AWT controls using swings controls	<p>(a) Write an applet program to handle key events.</p> <p>(b) Write an applet program to handle mouse events.</p> <p>(c) Write a swing program to illustrate JTextField and JButton control.</p> <p>(d) Write a swing program to illustrate JCheckbox and JList control.</p> <p>(e) Write swing program to illustrate multiple controls.</p>	<p>(a) Use keyboard event methods</p> <p>(b) Use mouse event methods</p> <p>(c) Use JTextField class methods</p> <p>(d) Use JButton class methods</p> <p>(e) Use JCheckbox and JList class methods</p>

BASICS OF QUANTUM COMPUTING

Course code	Course Title	No. of Periods/ Weeks	Total No of Periods/ Semester	FA Marks	SA Marks	Credits
26CM501T	BASICS OF QUANTUM COMPUTING	6	90	30	70	4

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weight age of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Introduction to Quantum Computing	18	14	2	2	CO1
2.	Qubits and Superposition	18	22	2	2	CO2
3.	Quantum Gates and Circuits	20	25	3	1	CO3
4.	Entanglement and Quantum Teleportation	19	17	3	1	CO3, CO4
5.	Quantum Computing in AI & ML	15	22	2	2	CO3, CO5
Total		90	100	12	8	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able to

(i)	Understand the fundamental differences between classical and quantum computing concepts.
(ii)	Learn the evolution, history, and key terminology of quantum computing.
(iii)	Comprehend the principles of qubits, superposition, and quantum measurement.
(iv)	Gain conceptual knowledge of quantum gates, circuits, and their role in quantum computation.
(v)	Explore the phenomena of quantum entanglement and teleportation and their applications.
(vi)	Recognize how quantum computing can enhance Artificial Intelligence and Machine Learning techniques.
(vii)	Analyze real-world applications, hardware platforms, and current research trends in quantum technology

(viii)	Develop foundational understanding required for further studies or practical work in quantum computing and AI/ML integration.
--------	---

COURSE OUTCOMES

CO1	CM501.1	Describe the basic principles and evolution of quantum computing, distinguishing it from classical computing systems.
CO2	CM501.2	Explain the concept of qubits, superposition, and quantum states, and understand their role in quantum computation.
CO3	CM501.3	Construct and interpret simple quantum circuits using quantum logic gates, and simulate quantum operations using basic tools or visualizations.
CO4	CM501.4	Understand and apply the principles of entanglement and quantum teleportation, and discuss their implications in secure data transmission.
CO5	CM501.5	Identify and explain potential applications of quantum computing in AI and ML, and evaluate how quantum algorithms may accelerate machine learning tasks.

LEARNING OUTCOMES

Chapter 1 – Introduction to Quantum Computing

- 1.1 Introduction to classical vs quantum computing.
- 1.2 History and evolution of quantum computing.
- 1.3 Key differences between bits and qubits (conceptual view).
- 1.4 Limitations of classical computing.
- 1.5 Quantum computing advantages and challenges.
- 1.6 Quantum computing terminology (conceptual glossary).
- 1.7 Real-world applications overview.
- 1.8 Major milestones in quantum computing.
- 1.9 Overview of quantum hardware platforms (IBM, Google, etc.).
- 1.10 Future prospects and trends in quantum technology.

Chapter 2 – Qubits and Superposition

- 2.1 Concept of a qubit.
- 2.2 Physical representation of qubits (photons, electrons, etc.).
- 2.3 Difference between 0/1 bits and qubits.
- 2.4 Superposition explained using analogies.
- 2.5 Measurement and its effect on qubits.
- 2.6 Quantum state examples without equations.
- 2.7 Quantum decoherence (basic understanding).
- 2.7 Examples of superposition in daily life.
- 2.9 Role of superposition in computational speed-up.

Chapter 3 – Quantum Gates and Circuits

- 3.1 Introduction to quantum logic gates.
- 3.2 Single-qubit gates (X, Y, Z, H) – conceptual only.
- 3.3 Multi-qubit gates (CNOT, SWAP) – conceptual only.
- 3.4 Gate operations as transformations without math.
- 3.5 Building a simple quantum circuit (conceptual).
- 3.6 Difference between classical and quantum logic gates.
- 3.7 Quantum parallelism (idea only).
- 3.8 Circuit representation diagrams (without equations).
- 3.9 Practical examples of gate usage.

Chapter 4 – Entanglement and Quantum Teleportation

- 4.1 Concept of quantum entanglement.
- 4.2 Real-world analogies for entanglement.
- 4.3 Applications of entanglement in communication.
- 4.4 Role of entanglement in secure communication.
- 4.5 Quantum key distribution concept.
- 4.6 Entanglement in quantum networks.
- 4.7 Experimental demonstrations of teleportation.
- 4.8 Limitations and challenges of entanglement.

Chapter 5 – Quantum Computing in AI & ML

- 5.1 Introduction to AI & ML.
- 5.2 Why quantum computing can enhance AI & ML.
- 5.3 Examples of quantum-enhanced machine learning.
- 5.4 Concept of quantum data encoding (no math).
- 5.5 Quantum pattern recognition (conceptual).
- 5.6 Quantum clustering – high-level explanation.
- 5.7 Industries using quantum AI.
- 5.8 Case studies of quantum ML applications.
- 5.9 Challenges and future research directions.

CO-PO/PSO MAPPING

3=Strongly mapped , 2=moderately mapped, 1=slightly mapped

COURSE CONTENT

Chapter 1 – Introduction to Quantum Computing:

Introduction to classical vs quantum computing-History and evolution of quantum computing-Key differences between bits and qubits (conceptual view)-Limitations of classical computing-Quantum computing advantages and challenges-Quantum computing terminology (conceptual glossary)-Real-world applications overview-Major milestones in quantum computing- Overview of quantum hardware platforms (IBM, Google, etc.)- Future prospects and trends in quantum technology.

Chapter 2 – Qubits and Superposition:

Concept of a qubit-Physical representation of qubits (photons, electrons, etc.)-Difference between 0/1 bits and qubits-Superposition explained using analogies-Measurement and its effect on qubits-Quantum state examples without equations-Quantum decoherence (basic understanding)-Examples of superposition in daily life-Role of superposition in computational speed-up.

Chapter 3 – Quantum Gates and Circuits:

Introduction to quantum logic gates-Single-qubit gates (X, Y, Z, H) – conceptual only. Multi-qubit gates (CNOT, SWAP) – conceptual only-Gate operations as transformations without math-Building a simple quantum circuit (conceptual)-Difference between classical and quantum logic gates-Quantum parallelism (idea only)-Circuit representation diagrams (without equations)-Practical examples of gate usage

Chapter 4 – Entanglement and Quantum Teleportation

Concept of quantum entanglement-Real-world analogies for entanglement-Applications of entanglement in communication-Role of entanglement in secure communication.

Quantum key distribution concept-Entanglement in quantum networks. Experimental demonstrations of teleportation-Limitations and challenges of entanglement.

Chapter 5 – Quantum Computing in AI & ML

Introduction to AI & ML-Why quantum computing can enhance AI & ML. Examples of quantum-enhanced machine learning-Concept of quantum data encoding (no math)-Quantum pattern recognition (conceptual)-Quantum clustering – high-level explanation-Industries using quantum AI-Case studies of quantum ML applications. Challenges and future research directions.

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I & II**

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 to 3.5
Unit test-II	From 3.6 to 5.9

Software Engineering

Course code	Course Title	No. Of periods / week	Total No of Periods/ Semester	FA Marks	SA Marks	Credits
26CM502T	SOFTWARE ENGINEERING	6	90	30	70	4

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Basics of Software Engineering Designs & Life Cycle Models	13	14	2	1	CO1
2.	Software Project Management	21	25	3	2	CO2
3.	Requirement Analysis & Specifications	13	11	1	1	CO3
4.	Software Design, Coding	23	25	3	2	CO4
5.	Software testing, Debugging, Reliability, Quality Management & Maintenance	20	25		2	CO5
Total		90	100	12	8	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To apply the fundamental concepts of software engineering & software development lifecycle (SDLC) models to real-world development scenarios.
(ii)	To apply basic principles of software project management including planning, scheduling and risk analysis.
(iii)	To design software solutions using software engineering principles and UML diagrams.
(iv)	To apply software testing techniques to evaluate reliability and performance.

COURSE OUTCOMES

CO1	CM502.1	Apply the fundamentals of Software Engineering to differentiate between various software life cycle models.
CO2	CM502.2	Apply Software Project Management principles to plan, estimate, schedule and manage risks
CO3	CM502.3	Develop a SRS document by identifying and organizing functional and non-functional requirements for a given software problem
CO4	CM502.4	Apply software design principles, UML modeling, and coding standards to develop maintainable software.
CO5	CM502.5	Apply software testing techniques and quality metrics to evaluate software reliability and performance.

LEARNING OUTCOMES

1.0 Basics of Software Engineering Designs & Life Cycle Models

- 1.1 Know the Evolution and Impact of the Software Engineering
 - 1.1.1 Know the evolution of software engineering as an Art to an Engineering Discipline
 - 1.1.2 Know how software engineering is a solution to the Software Crisis?
- 1.2 Know the difference between Programs and Software Products
- 1.3 Understand the evolution of Software Engineering Design
 - 1.3.1 Know about Early Computer Programming
 - 1.3.2 Know about High Level Language Programming
 - 1.3.3 What is control Flow-Based design
 - 1.3.4 What is Data Structure oriented design
 - 1.3.5 What is Data Flow-oriented design
 - 1.3.6 What is Object Oriented design
 - 1.3.7 Know about Model Driven Architecture
 - 1.3.8 Know about DevOps based Design
 - 1.3.9 Know about Low-code/No-code Development
- 1.4 Explain the Software Life Cycle Models
 - 1.4.1 Explain Classical Waterfall Model
 - 1.4.2 Explain Iterative Waterfall Model
 - 1.4.3 Explain Prototyping Model
 - 1.4.4 Explain Evolutionary Model
 - 1.4.5 Explain Spiral Model
 - 1.4.6 Know about AGILE Development Model- principles and Life Cycle
 - 1.4.7 Compare different Life Cycle Models
- 1.5 Explain Software Engineering ethics and the responsibilities of software professionals

2.0 Software Project Management

- 2.1 Know about Software Project Manager
 - 2.1.1 List the Job Responsibilities of a Software Project Manager
 - 2.1.2 Identify skills necessary for Software Management
- 2.2 Explain Software Project Planning
- 2.3 Explain the components of SPMP document
- 2.4 Know the Metrics for Project Size Estimation
 - 2.4.1 Describe Lines of Code (LOC)
 - 2.4.2 Describe Function Point Metric
- 2.5 Know about Project Estimation Techniques
 - 2.5.1 What is Empirical Estimation Technique
 - 2.5.2 What is Heuristic Estimation Technique
- 2.6 List Staffing Level Estimates
- 2.7 Understand the Basics of Agile Project Management using SCRUM
- 2.8 Know about Scheduling
 - 2.8.1 Explain Work Break Down Structure
 - 2.8.2 Explain Activity Networks
 - 2.8.3 Explain Gantt Charts
 - 2.8.4 Explain PERT Charts
- 2.9 Explain the process of Staffing in a Software Project Management
- 2.10 List the Attributes of a Successful Software Engineer
- 2.11 Explain the Risk Mangement
 - 2.11.1 What is Risk Identification
 - 2.11.2 Know about Risk Assesment
 - 2.11.3 Know about Risk Containment

3.0 Requirement Analysis and Specifications

- 3.1 Explain Requirements Gathering and Analysis
- 3.2 Explain Software Requirement Specifications
 - 3.2.1 Describe the Purpose and importance of SRS
 - 3.2.2 Summarize IEEE 830 standard
- 3.3 Explain Functional Requirements and Use Cases
 - 3.3.1 Define Functional Requirements
 - 3.3.2 Describe procedure to Identify requirements using scenario-based use cases
 - 3.3.3 Explain how to document functional requirements
- 3.4 Explain requirements Traceability and Construct a Traceability MAPPING
- 3.5 List Characteristics of a Good SRS Document
- 3.6 Give Examples of Poor SRS Document
- 3.7 Explain the typical Organization of the SRS Document
- 3.8 Develop an SRS for an ATM or Library System

4.0 Principles of Software Design, Coding

- 4.1 Know the Software Design Concepts
 - 4.1.1 List the characteristics of good software design
 - 4.1.2 What is Cohesion and Coupling
 - 4.1.2.1 Define Cohesion and Coupling
 - 4.1.2.2 Classify and compare types of Cohesion
 - 4.1.2.3 Classify and compare types of Coupling
- 4.2 Know about Software Design Approaches
 - 4.2.1 Explain Function-Oriented Design
 - 4.2.2 Explain Object-Oriented Design
 - 4.2.3 Compare Function-Oriented and Object-Oriented Design
 - 4.2.4 Describe Service-Oriented Design
- 4.3 Understand User Interface Design
 - 4.3.1 List the Characteristics of a good User Interface
 - 4.3.2 Understand the Basic Concepts of user interface design
 - 4.3.2.1 Describe User Guidance and Online Help
 - 4.3.2.1 Differentiate Mode Based vs Modeless Interface
 - 4.3.2.2 Compare Graphical vs Text-Based User Interface
 - 4.3.3 Know the Types of User Interface
 - 4.3.3.1 Describe Command Language Based Interface
 - 4.3.3.2 Describe Menu Based Interface
 - 4.3.3.3 Describe Direct Manipulation Interfaces
- 4.4 Understand Unified Modeling Language
 - 4.4.1 Define UML and its purpose in Software Engineering
 - 4.4.2 Explain the importance of UML in Object oriented Design
 - 4.4.3 List and Explain Building blocks of UML
 - 4.4.4 List different symbols used in UML notation
 - 4.4.5 Classify and list standard UML diagrams
 - 4.4.6 Know about Class Diagrams
 - 4.4.6.1 Describe the purpose of Class Diagram
 - 4.4.6.2 Know how to Draw simple Class Diagrams
 - 4.4.7 Know about Use case diagram
 - 4.4.7.1 Define Use Case and Actors
 - 4.4.7.2 Describe the purpose of Use case diagram
 - 4.4.7.3 Know how to Draw Use case diagrams
 - 4.4.8 Understand Interaction diagrams
 - 4.4.8.1 Explain the purpose and use of Interaction diagrams
 - 4.4.8.2 Distinguish between Sequence and Communication Diagrams
 - 4.4.8.3 Know how to Draw Interaction diagrams for System Scenarios
- 4.5 Know the Concept of Software Coding
 - 4.5.1 Explain Coding Standards
 - 4.5.2 Discuss Coding guidelines
 - 4.5.3 Explain the process of Code Review
 - 4.5.4 Describe Code Walkthroughs
 - 4.5.5 Explain Code Inspection

- 4.5.6 Define Clean Room Testing
- 4.5.7 Explain the importance of Software Documentation

5.0 Testing, Debugging, Reliability, Quality Management & Maintenance

- 5.1 Understand Testing
 - 5.1.1 Define Software Testing and its purpose
 - 5.1.2 Differentiate Verification and Validation
 - 5.1.3 List and Describe common Test Case Design techniques
 - 5.1.4 Compare Testing in the Large and Testing in the Small
 - 5.1.5 Explain Unit Testing with suitable examples
 - 5.1.6 Explain Black box Testing techniques
 - 5.1.7 Explain White Box Testing techniques
 - 5.1.8 List various Software Testing tools
 - 5.1.9 Describe the Role of Testing in Agile and DevOps environment
- 5.2 Know about Debugging
 - 5.2.1 Explain Debugging Approaches
 - 5.2.2 List standard Debugging Guidelines
- 5.3 Explain Program Analysis Tools
 - 5.3.1 Know about Static Analysis Tools
 - 5.3.2 Know about Dynamic Analysis Tools
- 5.4 Explain the purpose and process of Integration Testing
- 5.5 Apply System Testing techniques to check the overall working of the software
- 5.6 Apply Performance Testing to check how fast and stable the software runs
- 5.7 Explain the role of Artificial Intelligence in Software Testing
- 5.8 Understand the basics of Object-Oriented Testing and its techniques
- 5.9 Understand the concept of Software Reliability
 - 5.9.1 Differentiate Hardware Reliability and Software Reliability
 - 5.9.2 List common reliability metrics: MTTF, MTTR, and availability
 - 5.9.3 Identify the key steps in reliability growth modeling
- 5.10 Explain Software Quality Management systems
- 5.11 Explain SEI Capability Maturity Model (CMM) and its levels

TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED FOR UNIT TESTS I & II

Unit Test	Learning outcomes to be covered
Unit test-I	From 1.1 to 3.8
Unit test-II	From 4.1 to 5.11

Android Programming

Course code	Course Title	No. Of periods/ week	Total No of Periods/ Semester	FA Marks	SA Marks	Credits
26CM503T	ANDROID PROGRAMMING	6	90	30	70	4

TIME SCHEDULE

S. No	Chapter/ Unit Title	No. of Periods	Weight age of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1.	Android Basics and Anatomy	15	14	2	1	CO1
2.	Components, Activity Life Cycle, Intents	15	14	2	1	CO2
3.	Android – User Interface	20	22	2	2	CO3
4.	Android Advanced Concepts	20	25	3	2	CO4
5.	Data Base connectivity in Android	20	25	3	2	CO5
Total		90	100	12	8	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To know the Basics of Android Application Development.
(ii)	To familiarize with the Android Anatomy, Components, Activity Life Cycle, Intents.
(iii)	To use various User Interface controls in Android Application Development.
(iv)	To reinforce theoretical concepts by creating relevant Android applications.

COURSE OUTCOMES

CM503.1	Explain Basics of Android Programming.
CM503.2	Comprehend the Anatomy, Components, Activity Life Cycle, Intents.
CM503.3	Incorporate the User Interface Controls in Android Programming.
CM503.4	Analyse the Android Advanced Concepts in Android Programming.

LEARNING OUTCOMES

1.0 Android Basics, Android Anatomy

- 1.1 List the mobile phone generations
- 1.2 Define Smart phone
- 1.3 Explain the Android Architecture
- 1.4 Describe Android versions
- 1.5 List Features of Android
- 1.6 Explain installation of Android SDK Tools
- 1.7 Explain creation of Android Virtual Devices(AVD)
- 1.8 Explain Anatomy of Android Application
 - 1.8.1 Main Activity File
 - 1.8.2 Manifest File
 - 1.8.3 R file
 - 1.8.4 Strings File
 - 1.8.5 The Layout File
 - 1.8.6 Dalvik Virtual Machine
- 1.9 Explain Creation of “Hello World” Android Application.
- 1.10 Explain procedure for Deploying Android app on USB connected Android device

2.0 Components, Activity Life Cycle, Intents

- 2.1 Explain Android application components
 - 2.1.1 Activities
 - 2.1.2 Services
 - 2.1.3 Content providers
 - 2.1.4 Broadcast Receivers
- 2.2 Describe Activity life cycle
- 2.3 Define intents
 - 2.3.1 Exploring Intent objects
 - 2.3.2 List the Intent types
 - 2.3.3 Linking activities using intents
- 2.4 Explain Fragments
 - 2.4.1 Fragment Implementation
 - 2.4.2 Finding Fragments
 - 2.4.3 Adding, Removing, and Replacing Fragments
 - 2.4.4 Finding Activity Using Fragment
- 2.5 Explain the creation of Android application that switches between Activities

3.0 Android – User Interface

- 3.1 List types of User Interface layouts
- 3.2 Explain User Interface Designing Layouts
- 3.3 Define User Interface Controls
- 3.4 List User Interface Controls

- 3.5 Describe the need of Event Handling
- 3.6 Explain Android Event Handling
- 3.7 Explain the usage of User Interface Controls
 - 3.7.1 Textbox
 - 3.7.2 Edit Text
 - 3.7.3 Button
 - 3.7.4 Toast
 - 3.7.5 Check box
 - 3.7.6 Radio Button
 - 3.7.7 Toggle Button
 - 3.7.8 Spinner
 - 3.7.9 Date Picker
 - 3.7.10 Time Picker
 - 3.7.11 List View
 - 3.7.12 Progress Bar
 - 3.7.13 Analog and Digital clock
- 3.8 Explain development of Android App using above user Interface Controls

4.0 Android Advanced Concepts

- 4.1 State the purpose of Menu
- 4.2 List various types of Menu
- 4.3 Explain Menu
 - 4.3.1 Options Menu
 - 4.3.2 Context Menu
 - 4.3.3 Popup Menu
- 4.4 Explain Images
 - 4.4.1 Image Button
 - 4.4.2 Image Switcher
 - 4.4.3 Image View
- 4.5 Describe Alert Dialog.
- 4.6 Explain Alarm Manager
- 4.7 Compose the procedure for SMS sending
 - 4.7.1 List the methods in SMS Manager Class
- 4.8 Explain procedure for E-mail sending
- 4.9 Explain Media Player Class
 - 4.9.1 List various methods in Media Player class
 - 4.9.2 Explain the procedure for Running Media Player
- 4.10 Explain Telephony Manager
- 4.11 Explain the procedure of using Camera
- 4.12 Describe the procedure of Recording Video
- 4.13 Explain Home Screen Widgets
 - 4.13.1 Adding the Broadcast Receiver Class to an Android Manifest
 - 4.13.2 Using the RemoteViews and AppWidgetManager Classes
 - 4.13.3 Creating a Customized Clock Widget
- 4.14 Describe the collection View Widgets
 - 4.14.1 Collection View Widget Layouts
 - 4.14.2 Creating the Remote Views Service Class
 - 4.14.3 Creating a Remote Views Factory Interface
 - 4.14.4 Populating Collection View Widgets

5 Database connectivity in Android

- 5.1 Define persistent data storage
- 5.2 Understanding of Android storage system
 - 5.2.1 List different storage options
 - 5.2.2 Explain Internal file Storage
 - 5.2.3 Explain External file Storage
- 5.3 Know about Content Providers
 - 5.3.1 Importance of Content providers
 - 5.3.2 Explain Content Providers
- 5.4 Understand SQLite Database
 - 5.4.1 Define Schema
 - 5.4.2 Define Contract class
 - 5.4.3 List the Database Operations
 - 5.4.4 Explain SQLite DataBase
- 5.5 Explain the Database Operations with an example database
- 5.6 Explain the procedure for publishing of an Android Application
- 5.7 Explain the procedure for Deploying APK files

CO-PO/PSO MAPPING

COURSE CONTENT

UNIT 1:Android Basics

Types of mobile phone generations, Android Architecture, Android Versions, Features of Android, Installing Android SDK Tools, Android Development Tools (ADT), Creating Android Virtual Devices (AVD), Anatomy of android application, Deploying Android app on USB connected Android device,

UNIT 2:Android Anatomy, Components, Activity Life Cycle, Intents

Creating first android application, Android application components, Activity life cycle, understanding activities, Exploring Intent objects, Intent Types, linking activities using intents, Fragments-Fragment Implementation, Finding Fragments, Adding, Removing, and Replacing Fragments, Finding Activity Using Fragment

UNIT 3: Android – User Interface

Understanding the User Interface Layouts, User Interface Controls - Button, Toast, Toggle Button, Checkbox, Radio Button, Spinner, Edit Text, Date Picker, Time Picker, List View, Progress- Bar, Analog and Digital clock, Handling UI events, List fragment, Dialog fragment

UNIT 4: Android Advanced Concepts

Menus-Option, Context, Popup, Images- Image Button, Image Switcher, Image View, Alert Dialog, Alarm manager, SMS, E-mail, Media Player, Handling Telephony Manager, camera, Video, Widgets.

UNIT 5: Database connectivity in Android

Storing the data persistently-Data Storage Options: preferences, Internal Storage, External Storage, Content Provider, The SQLite database, connecting with SQLite database and operations-Insert, Delete, Update, Fetch, Publishing and deploying android applications.

INTERNET OF THINGS

Course Code	Course Title	Periods/ week	Total No of Periods/Semester	FA Marks	SA Marks	Credits
26CM504E	INTERNET OF THINGS	3	45	30	70	2

TIME SCHEDULE

S. No.	Chapter/ Unit Title	No. of Periods	Weightage of marks	No. of Short Questions	No. of Essay Questions	COs Mapped
1	IoT-Introduction, System Design	8	14	2	1	CO1
2	IoT Hardware and Perception Layer Protocols	12	25	3	2	CO2
3	IoT Network Layer	10	25	3	2	CO3
4	IoT Application Layer	8	22	2	2	CO4
5	Security, Privacy and Future Trends	7	14	2	1	CO5
Total		45	100	12	8	

COURSE OBJECTIVES

Upon completion of the course the student shall be able to

(i)	Grasp IoT Fundamentals: Understand the core concepts, defining characteristics, and the layered architectural models of the Internet of Things.
(ii)	Analyze Core Components: Examine the various hardware elements like sensors and actuators, and the key communication protocols such as Bluetooth and NFC that operate at the perception layer.
(iii)	Evaluate Network Protocols: Assess and contrast network layer protocols like 6LoWPAN, RPL, and Zigbee, which are specifically designed for low-power, resource-constrained IoT environments.
(iv)	Compare Application Technologies: Differentiate between major application layer messaging protocols (e.g., MQTT, CoAP) and understand the critical role of middleware and cloud platforms in building IoT systems.

(v)	Assess Advanced Topics: Evaluate significant security vulnerabilities, address privacy and ethical challenges, and analyze the impact of emerging technologies such as AI, Blockchain, and Digital Twins on the evolution of IoT.
-----	---

COURSE OUTCOME

CO	CO Code	Course Outcome Statement
CO1	CM504.1	Explain the fundamental concepts, characteristics, and layered architectures of the Internet of Things.
CO2	CM504.2	Analyze the various hardware components, including sensors, actuators, and communication protocols like Bluetooth and NFC, used in the IoT perception layer.
CO3	CM504.3	Evaluate network layer protocols designed for constrained environments, such as 6LoWPAN, RPL, and Zigbee.
CO4	CM504.4	Compare different application layer messaging protocols (like MQTT and CoAP) and the role of middleware and cloud platforms in IoT systems.
CO5	CM504.5	Assess the security vulnerabilities, privacy challenges, and the impact of emerging technologies like AI and Blockchain on IoT.

LEARNING OUTCOMES

Chapter 1: IoT-Introduction, System Design

- 1.1. Explain the transformation of data into wisdom within an IoT system using the DIKW pyramid model.
- 1.2. Define the Internet of Things (IoT).
- 1.3. Describe the key characteristics that define an IoT system (e.g., connectivity, heterogeneity, scalability).
- 1.4. Recall at least six distinct application domains of IoT.
- 1.5. Construct and label a diagram illustrating the 4-layer IoT architecture.
- 1.6. Explain the functions of the additional layers (e.g., Business, Processing) in a 5-layer IoT architecture compared to a 4-layer one.
- 1.7. Define 'physical design' and 'logical design' in the context of IoT.
- 1.8. Explain the roles of 'Things,' IoT devices, and hardware interfaces in the physical design of an IoT system.
- 1.9. List the primary functions of an IoT gateway, such as data aggregation and protocol translation.
- 1.10. Describe the purpose and interaction of the main functional blocks of an IoT system, such as Device, Communication, and Services.
- 1.11. Categorize a list of communication protocols into their respective layers (Link, Network, Transport, Application).
- 1.12. Compare and contrast the Request-Response, Publish-Subscribe, Push-Pull, and Exclusive Pair communication models.
- 1.13. Define a communication API.

- 1.14. Deconstruct the operational flow of REST and Web Socket APIs, providing appropriate use cases for each in an IoT context.
- 1.15. Categorize different IoT systems based on their architectural complexity and functional capabilities.
- 1.16. Explain how key technologies like Wireless Sensor Networks (WSN), cloud computing, and big data analytics enable IoT systems.

Chapter 2: IoT Hardware and Perception Layer Protocols

- 2.1. State the primary function of the Perception layer in an IoT architecture.
- 2.2. Distinguish between a sensor and an actuator by explaining their roles in interacting with the physical environment.
- 2.3. Categorize various sensors based on criteria like output type, power needs, and measured quantity.
- 2.4. Categorize actuators based on their physical principles (e.g., hydraulic, electric) and applications.
- 2.5. Compare the architectures of microcontrollers and microprocessors.
- 2.6. Provide specific examples of IoT applications where a microcontroller (like Arduino) is a suitable choice versus those where a microprocessor (like Raspberry Pi) is more appropriate.
- 2.7. Describe how technologies like barcodes, QR codes, and RFID are used to identify and track devices in an IoT ecosystem.
- 2.8. Summarize the features, use cases, and limitations of wired technologies like Ethernet and Power Line Communication (PLC) in IoT.
- 2.9. Define Bluetooth.
- 2.10. Describe the technical specifications of Bluetooth, including its use of FHSS, network topology, and data rates.
- 2.11. Match specific Bluetooth profiles (e.g., A2DP, HID) to their corresponding use cases (e.g., audio streaming, input devices).
- 2.12. Recall major Bluetooth versions and the key advancements in each.
- 2.13. Define Near Field Communication (NFC).
- 2.14. Explain the operating principle of NFC and its different communication modes (e.g., reader/writer, peer-to-peer).
- 2.15. Categorize different NFC tag types and list the data formats they support.
- 2.16. List the advantages and common application domains for Bluetooth and NFC.
- 2.17. Describe the IEEE 802.15.4 standard, including its architecture, network topologies, and device types.

Chapter 3: IoT Network Layer

- 3.1. State the primary function of the Network layer in an IoT architecture.

- 3.2. Justify the need for specialized IoT protocols by explaining the limitations of standard IPv4/IPv6 for constrained devices.
- 3.3. Draw a diagram showing the 6LoWPAN protocol stack and its relation to other layers.
- 3.4. Explain the purpose of the 6LoWPAN adaptation layer and its key features like header compression and fragmentation.
- 3.5. Explain the purpose of the RPL routing protocol for constrained environments.
- 3.6. Describe the operation of RPL, including concepts like DODAGs and control messages.
- 3.7. Explain the synergistic relationship between 6LoWPAN and RPL.
- 3.8. Define Zigbee and explain why it is often preferred for low-power mesh networks.
- 3.9. Describe the functions of the Zigbee Network (NWK) layer and how its routing protocol works.
- 3.10. Recall the network topologies (star, mesh, tree) supported by Zigbee.
- 3.11. Recall IoT application domains where Zigbee is commonly used.
- 3.12. Compare and contrast the 6LoWPAN/RPL stack with the Zigbee stack, focusing on IP compatibility, flexibility, and interoperability.

Chapter 4: Application Layer

- 4.1. Explain how middleware facilitates IoT solutions by providing services like device management and data aggregation.
- 4.2. Compare cloud-based IoT platforms (like AWS IoT Core, Azure IoT Hub) with on-premise solutions based on features, services, and management models.
- 4.3. For brokered protocols (MQTT, AMQP) and peer-to-peer protocols (CoAP, XMPP), analyze their core principles, architectures, key features, and provide suitable IoT use cases for each.
- 4.4. Using a smart home scenario, illustrate how the Zigbee Application Layer, its Cluster Library (ZCL), and profiles work to enable device interoperability.

Chapter 5: Security, Privacy, and Future Trends

- 5.1. Identify and describe potential security vulnerabilities at the device, network, cloud, and application layers of the IoT architecture.
- 5.2. Propose appropriate security measures and best practices to mitigate vulnerabilities at each layer of the IoT architecture.
- 5.3. Explain the key privacy and ethical challenges associated with data collection in IoT systems.
- 5.4. Analyze the specific challenges related to obtaining user consent and protecting data in large-scale IoT deployments.-IoT Privacy
- 5.5. Discuss and form a judgment on the deeper moral dilemmas presented by IoT, such as algorithmic bias, surveillance, and autonomous decision-making.-IoT Ethics

- 5.6. Summarize the key provisions of India's DPDP Act 2023, the IT Act 2000 (in relation to CERT-In), and modern telecommunications regulations as they apply to IoT.
- 5.7. Explain the mechanism of integrating AI/ML with IoT and illustrate with specific applications.
- 5.8. Explain how block chain can be applied to IoT for enhanced security and provide relevant application examples.
- 5.9. Explain the concept of a Digital Twin, how it uses IoT data, and describe its impact on applications like predictive maintenance.
- 5.10. Discuss the dual-edged impact of quantum computing on IoT, considering both its potential benefits and the security threats it poses.

CO-PO/PSO MAPPING

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3
CO1	3	2	1	-	-	1	-	3	1	1
CO2	3	3	2	1	2	-	-	3	2	-
CO3	3	3	2	2	1	-	-	3	2	-
CO4	3	3	2	2	3	-	-	3	3	1
CO5	2	2	1	2	1	3	2	1	1	3
Average	2.8	2.6	1.6	1.75	1.75	2	2	2.6	1.8	1.66

3 – Strong correlation (direct, significant contribution to outcome achievement), 2 – Moderate correlation (partial or indirect contribution), 1 – Low correlation (marginal contribution)

COURSE CONTENT

Chapter-1: IoT-Introduction, Architecture

DIKW Pyramid, IoT - Definition, Characteristics, Applications, IoT System Design - Architecture, Physical Design, Logical Design, and Classification based on complexity, IoT enabled technologies.

Chapter-2: IoT Hardware and Perception Layer Protocols

Role, IoT Devices - Sensor, Actuators, End devices, Protocols - Wired (Ethernet, PLC), Wireless (IEEE 802.15.4, Bluetooth, NFC)

Chapter-3: IoT Network Layer:

6LoWPAN (purpose, functions, architecture, topologies) with RPL (purpose, functions, working, limitations) , Zigbee (NWK layer,

topologies, devices, AODV, applications), Differentiate 6LoWPAN with Zigbee.

Chapter-4: IoT Application Layer

Middleware and Service Layer - Role of Middleware, Features of Cloud and On premise IoT Platforms

Application Layer Messaging Protocols - Principles, Architecture, Features and Use cases of MQTT, AMQP, CoAP, XMPP. Zigbee specific application layer protocol. Zigbee Application Layer - key components, Zigbee cluster library and profile.

Chapter-5: Security, Privacy and Future Trends

IoT Security Challenges, Solutions.

IoT privacy, ethics and regulatory frameworks with respect to India. Emerging technologies and their impact on IoT.

1	Introduction to AI	8	14	2	1	CO1
2	Problem Solving with AI	9	22	2	2	CO2
3	Foundations of Machine Learning	10	25	3	2	CO3
4	Supervised Learning	10	25	3	2	CO4
5	Unsupervised Learning & Apps	8	14	2	1	CO5, CO6
Total		45	100	12	8	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To provide a strong foundational understanding of AI principles and problem-solving techniques.
(ii)	To introduce the core concepts, types, and applications of Machine Learning.
(iii)	To equip students with the knowledge to differentiate between various AI and ML models.
(iv)	To make students aware of the real-world impact and applications of this technology, making them more industry-ready.

COURSE OUTCOMES

CO1	CM505.1	Explain the fundamental concepts of Artificial Intelligence, its history, and intelligent agents.
CO2	CM505.2	Apply various search strategies to solve well-defined problems.

CO3	CM505.3	Differentiate between supervised, unsupervised, and reinforcement learning.
CO4	CM505.4	Apply basic supervised learning algorithms for classification and regression tasks.
CO5	CM505E.5	Describe the working of unsupervised learning algorithms and the basics of neural networks.
CO6	CM505E.6	Identify real-world applications of AI and ML across various domains.

LEARNING OUTCOMES

1.0 Introduction to Artificial Intelligence

- 1.1 Define Artificial Intelligence and its goals
- 1.2 Explain the different types of AI.
- 1.3 Describe the structure of an intelligent agent.
- 1.4 Differentiate between various types of agent environments.
- 1.5 Analyze the structure of different agent types.

2.0 Problem Solving with AI

- 2.1 Define a problem using state space representation.
- 2.2 Explain the difference between uninformed and informed search.
- 2.3 Apply Breadth-First Search (BFS) to find a solution.
- 2.4.1 Apply Depth-First Search (DFS) to find a solution.
- 2.5 Describe how heuristics can guide a search process.

3.0 Foundations of Machine Learning

- 3.1 Define Machine Learning and its relevance.
- 3.2 Differentiate between AI, ML and Deep Learning.
- 3.3 Explain the three main types of machine learning.
- 3.4 Describe the typical workflow of an ML project.
- 3.5 Analyze the concepts of training, validation, and test datasets
- 3.6 Explain the concepts of overfitting and underfitting.

4.0 Supervised Learning

- 4.1 Differentiate between regression and classification problems.
- 4.2 Explain the working of Linear Regression for prediction.
- 4.3 Apply the K-Nearest Neighbors (k-NN) algorithm to classify new data points.
- 4.4 Explain how Decision Trees are used for classification.
- 4.5 Apply a simple decision tree model to solve a classification problem.
- 4.6 Describe basic metrics for evaluating classification models.

5.0 Unsupervised Learning & Applications

- 5.1 Explain the goal of unsupervised learning.
- 5.2 Apply the K-Means algorithm to group data into clusters.
- 5.3 Describe the basic structure of an Artificial Neural Network (ANN).
- 5.4 Identify various real-world applications of AI and ML.
- 5.5 Discuss the ethical considerations related to AI.

CO-PO/PSO MAPPING

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2
CO1	3	2	1	-	1	-	2	2	-
CO2	3	3	2	1	-	1	2	2	-
CO3	2	3	2	-	1	-	2	2	-
CO4	3	3	2	2	-	1	2	2	-
CO5	2	2	1	-	1	-	2	2	-
CO6	1	2	2	1	3	2	2	2	1
Average	2.33	2.5	1.66	1.33	1.5	1.33	2	2	1

3-Strongly Mapped

2- Moderately Mapped

1- Slightly Mapped

COURSE CONTENT

Chapter 1: Introduction to Artificial Intelligence

What is AI? A brief history, Turing Test. The AI Problems, AI Techniques, Applications of AI. Intelligent Agents: Agents and Environments. Concept of Rationality, Nature of Environments. Structure of Agents: Simple reflex agents, Model-based agents, Goal-based agents, Utility-based agents.

Chapter 2: Problem Solving with AI

Problem Solving: Define the problem as a State Space Search. Search Strategies: Uninformed (blind) vs Informed (Heuristic) Search. Uninformed Search Algorithm: Breadth-First Search (BFS), Depth-First Search (DFS), Comparing BFS and DFS on completeness, time complexity, space complexity and optimality. Informed Search: Heuristic Functions, Greedy Best-First Search, A* Search concept.

Chapter 3: Foundations of Machine Learning

Introduction to Machine Learning: What is ML? Why do we need ML? Relationship between AI, ML and Deep Learning. Types of Machine Learning: Supervised, Unsupervised and Reinforcement Learning. General ML Workflow: Data collection, preprocessing, Model Training, Evaluation, Deployment. Key Terms: Features, Labels, Training set, Test set, Validation set. Introduction to Model Evaluation: Overfitting vs Underfitting, Bias-Variance Tradeoff (conceptual)

Chapter 4: Supervised Learning

Introduction to Supervised Learning: Classification vs Regression. Regression: Simple Linear Regression. Classification: K-Nearest Neighbors(k-NN) algorithm, choosing the value of 'k'. Decision Tree Classification: Structure of a decision tree (nodes, edges, leaves), basic concept of splitting. Building a simple decision tree from a given data set. Model Evaluation for Classification: Accuracy, Confusion MAPPING (True Positives, False Negatives, etc.).

Chapter 5: Unsupervised Learning & Applications

Introduction to Unsupervised Learning: The concept of finding hidden patterns in unlabeled data. Clustering: K-Means Algorithm (steps involved, choosing 'k', concept of centroids). Introduction to Neural Networks & Deep Learning: The neuron model (Perceptron), layers (input, hidden, output), activation functions. Real-world Applications of AI/ML: Image recognition, spam detection, recommendation systems (Eg. Netflix, Amazon), medical diagnosis. Ethics in AI: Bias in AI, data privacy, and the societal impact of AI.

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I & II**

Unit Test	Learning Outcomes to be Covered
Unit Test – I	From 1.1 to 3.3
Unit Test – II	From 3.4 to 5.5

UI / UX Design

Course code	Course Title	No. Of periods/ week	Total No of Periods/ Semester	FA Marks	SA Marks	Credits
26CM506A	UI / UX DESIGN	2	30	-	-	

TIME SCHEDULE

S.No	Chapter/Unit Title	No.of Periods	COs Mapped
1.	Foundations of UI/UX and Human-Centered Design	10	CO1
2.	UI/UX Design Process and Prototyping Techniques	10	CO2
3.	Interactive Prototyping and Usability Testing	10	CO3
Total Periods		30	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To introduce the foundational concepts of User Interface (UI) and User Experience (UX) Design.
(ii)	To develop students' ability to apply the design process.
(iii)	To enable students to create interactive prototypes and conduct usability testing.

COURSE OUTCOMES

CO1	CM506.1	Understand fundamental UI/UX principles and human-centered design concepts.
CO2	CM506.2	Apply the UI/UX design process to develop user personas, user journeys, and wireframes.
CO3	CM506.3	Develop interactive prototypes and perform basic usability testing to evaluate design effectiveness.

CO-PO/PSO MAPPING

Average	2.0	2.3	2.3	2.0	2.7	2.0	1.7	2.7	2.3	1.7

3=strongly mapped, 2=moderately mapped, 1=slightly mapped

LEARNING OUTCOMES

1.0 Foundations of UI/UX and Human-Centered Design.

1.1 Theory Learning Outcomes (TLOs):

1. Define UI and UX and distinguish between them
2. Describe the principles of human-centered design
3. Explain usability heuristics and accessibility guidelines
4. Understand user persona development and empathy mapping

1.2 Practical Learning Outcomes (PLOs):

1. Create a user persona using Canva or Figma
2. Perform a heuristic evaluation of a common website
3. Use Draw.io to develop an empathy map for a sample app
4. Conduct a short peer feedback session on usability

Free Tools: Figma, Canva, Draw.io, Google Forms

2.0 UI/UX Design Process – User Flows and Wireframes

2.1 Theory Learning Outcomes (TLOs):

1. List the key stages of the UI/UX design process
2. Describe how to create user flows and wireframes
3. Explain the difference between low- and high-fidelity wireframes
4. Understand the basics of information architecture and card sorting

2.2 Practical Learning Outcomes (PLOs):

1. Create a low-fidelity wireframe in Figma
2. Design a user flow using Lucidchart or Draw.io
3. Perform a card sorting activity using OptimalSort (free trial) or paper-based methods
4. Build a basic sitemap using Gloomaps

Free Tools: Figma, Draw.io, Lucidchart, Gloomaps, Miro (free for small teams)

3.0 Prototyping and Usability Testing

3.1 Theory Learning Outcomes (TLOs):

1. Explain the purpose of prototyping and usability testing

2. Describe different levels of prototypes (paper, digital, interactive)
3. Define key usability metrics
4. Understand how to collect and analyze user feedback

3.2 Practical Learning Outcomes (PLOs):

1. Create an interactive prototype using Figma's Prototyping Tool
2. Conduct a basic usability test with peers and document findings
3. Collect feedback using Google Forms and summarize user insights
4. Perform accessibility testing using WAVE browser extension

Free Tools: Figma, Google Forms, WAVE, OBS Studio (for usability recordings)

COURSE CONTENT

UNIT – I

Foundations of UI/UX and Human-Centered Design

Introduction to UI/UX Design, Difference between UI and UX, Principles of human-centered design, Usability heuristics and Nielsen's principles, Accessibility guidelines (WCAG basics), Understanding user needs, Developing user personas, Empathy mapping techniques, Role of user feedback in UX.

UNIT – II

UI/UX Design Process – User Flows and Wireframes

UI/UX Design Process Overview, Requirement gathering and user research methods, Creating user journey maps, Defining user flows, Information architecture and content hierarchy, Low-fidelity wireframing (sketches), High-fidelity wireframing using digital tools, Layout design principles and grid systems, Navigation design and menu structuring.

UNIT – III

Prototyping and Usability Testing

Interactive Prototyping Concepts, Tools and levels of prototype fidelity, Creating clickable prototypes using Figma, Linking wireframes and designing transitions, Planning and conducting usability tests, Collecting and analyzing user feedback, Metrics and KPIs for user experience evaluation, Introduction to accessibility tools (WAVE), Iterating based on test results..

TEXT BOOKS

1. Don't Make Me Think – Steve Krug
2. The Design of Everyday Things – Don Norman
3. About Face: The Essentials of Interaction Design – Alan Cooper et al.

2.	Android – User Interface	16	CO2
3.	Android Advanced Concepts	24	CO3
4.	Database connectivity in Android	12	CO4
Total Periods		60	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To know the Basics of Android Application Development.
(ii)	To familiarize with the Android Anatomy, Components, Activity Life Cycle, Intents.
(iii)	To use various User Interface controls in Android Application Development.
(iv)	To reinforce theoretical concepts by creating relevant Android applications.

COURSE OUTCOMES

CO1	CM507.1	Demonstrate the Basics of Android Programming for developing Android Applications
CO2	CM507.2	Incorporate the User Interface Controls in Android Programming
CO3	CM507.3	Analyse the Android Advanced Concepts in Android Programming
CO4	CM504.4	Integrate the DataBase with Android Applications.

LIST OF EXERCISES

1. Create an Android Application To display “Hello World”
2. Create an Android app to shift from one activity to another activity using a button.
3. Create an Android app to accept a number in textfield and display the factorial of it in a Toast message on clicking a button
4. Create an Android app to illustrate the use of DatePicker widget and TimePicker widget.
5. Create an Android app that uses multiple UI controls like EditText, CheckBox, Spinner and Buttons.
6. Create an Android app to show Analog and Digital clock
7. Create an Android app to set an alarm.
8. Create an Android Application To Integrate Google Maps
9. Create an Android Application To send SMS
10. Create an Android Application To calling a number
11. Create an Android Application To send E-mail
12. Create an Android Application to show clock widget.
13. Create an Android Application Using Database operations like insert and display.
14. Create an Android Application Using Database operations like delete and display?
15. Create an Android Application Using Database operations like update and display?

Android Programming Lab Objectives and Key Competencies			
Sl.No	Name of the Experiment	Objectives	Key Competencies
1	Exercise to display "Hello World".	Create an Android app to show "Hello World"	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Confirm whether the required output generated properly or not
2	Exercise on Intent.0	Create an Android app to shift from one activity to another activity using a button.	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Know how to apply start Activity () method using intent ❖ Confirm whether the control moves from one activity to another activity.
3	Exercise on textfield and toast message.	Create an Android app to accept a number in textfield and display the factorial of it in a Toast message on clicking a button	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the EditText and Button classes and the required methods ❖ Confirm whether the factorial is computed and shown in the Toast or not
4	Exercise on Datepicker and Timepicker	Create an Android app to illustrate the use of Datepicker and Timepicker.	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the Datepicker and Timepicker class and its required methods ❖ Confirm whether the selected date and time is shown on a Toast message.
5	Exercise on multiple UIcontrols	Create an Android app that uses multiple UI controls like textfield, Checkbox, Spinner and Buttons	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the textfield, Checkbox, Spinner and Buttons classes and its required methods. ❖ Confirm whether the required operations are done properly
6	Exercise on Analog and Digital clock	Create an Android app to show Analog and Digital clock	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the Analog and Digital clock view. ❖ Confirm whether the selected time is shown as a Toast message.

7	Exercise on Alarm.	Create an Android app to set an alarm	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the alarm class. ❖ Confirm whether the alarm is worked or not.
8	Create an Android Application To Integrate Google Maps	Create an Android Application To Integrate Google Maps	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the GoogleMap class and its methods ❖ Confirm whether the Map working properly or not
9	Create an Android Application To send SMS	Create an Android Application To send SMS	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the SmsManager class and its methods ❖ Confirm whether the messages are sending properly or not
10	Create an Android Application To calling a number	Create an Android Application To calling a number	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the class and its methods ❖ Confirm whether the event performed or not
11	Create an Android Application To send E-mail	Create an Android Application To send E-mail	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the E-mail functionality with Intents ❖ Confirm whether the E-mails are sending properly or not
12	Exercise on clock widget	Create an Android Application to show a clock widget.	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the widgets ❖ Confirm whether the clock widget is properly placed or not
13	Exercise on Database operations like insert and display.	Create an Android Application Using Database operations like insert and display.	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the operations of Database ❖ Confirm whether the data is properly inserted or not ❖ Confirm whether the data is properly fetched or not
14	Exercise on Database operations like delete and display.	Create an Android Application Using Database operations like delete and display.	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the operations of Database

			<ul style="list-style-type: none"> ❖ Confirm whether the data is properly deleted or not ❖ Confirm whether the data is properly fetched or not
15	Exercise on Database operations like update and display.	Create an Android Application Using Database operations like insert and display.	<ul style="list-style-type: none"> ❖ Correct syntactical errors ❖ Debug logical errors ❖ Study the operations of Database ❖ Confirm whether the data is properly updated or not ❖ Confirm whether the data is properly fetched or not

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED
FOR UNIT TESTS I & II**

Unit Test	Learning Outcomes to be Covered
UNIT TEST-I	Learning Outcomes: 1 to 8
UNIT TEST-II	Learning Outcomes: 9 to 15

AI using Python (Practicum-Practicals)

Course code	Course Title	No. Of periods/ week	Total No of Periods/ Semester	FA Marks	SA Marks	Credits
26CM508L	AI USING PYTHON LAB	6	90	40	60	2

TIME SCHEDULE

S. No.	Chapter / Unit Title	No.of Periods	COs Mapped
1.	Introduction to Python for AI & ML	18	C01
2.	Basic Machine Learning Algorithms	27	C02
3.	Fundamentals of Deep Learning using Keras/Tensor Flow	18	C03
4.	Basics of Artificial Intelligence Techniques	27	C04, C05
Total Periods		90	

COURSE OBJECTIVES

Upon completion of the course, the student shall be able

(i)	To apply core Python programming constructs for developing Artificial Intelligence and Machine Learning applications.
(ii)	To provide practical experience in implementing fundamental Machine Learning and Deep Learning models using Python.
(iii)	To analyze and solve basic AI problems using search techniques, knowledge representation, and rule-based logic implemented in Python.

COURSE OUTCOMES

CO1	CM508.1	Apply core Python constructs, libraries, and data structures in the context of AI and ML problem-solving.
CO2	CM508.2	Implement and evaluate basic machine learning algorithms using Python-based libraries such as Scikit-learn.
CO3	CM508.3	Build and train fundamental deep learning models using Keras/TensorFlow frameworks
CO4	CM508.4	Analyze and solve AI problems using uninformed and heuristic search, knowledge representation, and rule-based logic.

CO5	CM508L.5	Apply text and image-based AI techniques such as NLP and computer vision using Python tools and libraries.

Average	3	2.8	2.6	3	1	1	2	3	3	3

3=strongly mapped, 2=moderately mapped, 1=slightly mapped

LEARNING OUTCOMES

1. Introduction to Artificial Intelligence

- 1.1 Define Artificial Intelligence and its goals
- 1.2 Explain the different types of AI.
- 1.3 Describe the structure of an intelligent agent.
- 1.4 Differentiate between various types of agent environments.
- 1.5 Analyze the structure of different agent types

S.No	LEARNING OUTCOME	THEORY (explained using PPT, useful videos from YouTube, etc.)	PRACTICAL (Key Competencies table enclosed)
Chapter 1: Introduction to Python for AI & ML			
1	Install Python, Jupyter Notebook, and essential AI/ML libraries	Overview of Python, Jupyter Notebook, and AI/ML ecosystem	Demonstration of Python, Jupyter, and library installation
2	Explore datasets using loading and inspection techniques	Explanation of Pandas data loading functions and dataset exploration	Hands-on dataset loading and inspection
3	Perform feature scaling and encoding	Data preprocessing concepts	Implementing scaling and encoding
4	Visualize dataset features using Python libraries	Introduction to matplotlib and seaborn for data visualization	Plotting graphs and charts from datasets
Chapter 2: Basic Machine Learning Algorithms			
5	Apply Linear Regression for predictive modeling	Theory of regression and line fitting	Implementation of Linear Regression
6	Implement Logistic Regression for binary classification	Theory of classification and sigmoid function	Implementation of Logistic Regression
7	Classify data using k-Nearest Neighbors	Concept of distance-based classification	k-NN model building and testing
8	Construct a Decision Tree for classification	Decision tree theory and splitting criteria	Building and visualizing a Decision Tree
9	Apply Naive Bayes for classification	Bayes theorem and probabilistic classification	Implementing Naive Bayes model
10	Implement k-Means clustering	Concept of clustering and centroid-based algorithms	Running k-Means on sample data
11	Evaluate models using cross-validation	Importance of evaluation metrics and validation	Train-test split and K-Fold validation
Chapter 3: Fundamentals of Deep Learning using Keras/Tensor Flow			

12	Install and verify deep learning frameworks	Overview of TensorFlow and Keras	Installing and testing DL setup
13	Perform binary classification using ANN	Concepts of binary classification in ANN	Building binary classification model
14	Build an Artificial Neural Network for multi-class classification	ANN architecture and activation functions	Creating ANN for classification
15	Apply dropout and batch normalization	Overfitting and regularization in DL	Adding dropout and normalization layers
16	Use a pre-trained model for image classification	Transfer learning concepts	Loading and using MobileNet for classification
Chapter 4: Basics of Artificial Intelligence Techniques			
17	Implement BFS and DFS	Uninformed search concepts	BFS and DFS implementation on a simple graph
18	Implement Greedy Best-First Search	Heuristic search concepts	Implementing Greedy search with Manhattan distance
19	Create a simple rule-based system	Knowledge representation basics	Coding a basic rule-based inference system
20	Tokenize and remove stopwords from text	NLP pre-processing concepts	Tokenization and stopword removal using NLTK
21	Perform sentiment analysis using keyword matching	Sentiment analysis concepts	Implementing keyword-based sentiment classifier
22	Detect objects or faces in images	Introduction to computer vision	Face detection using OpenCV and pre-trained cascades

Key Competencies:

S.No	Name of the Experiment	Objectives	Key Competencies
1	Install Python, Jupyter Notebook, and essential AI/ML libraries	Set up programming environment for AI & ML	<ol style="list-style-type: none"> 1. Download Python and Jupyter 2. Install numpy, pandas, matplotlib, scikit-learn, tensorflow, keras, opencv 3. Verify installation
2	Explore datasets using loading and inspection techniques	Load datasets and explore structure	<ol style="list-style-type: none"> 1. Use Pandas to load datasets 2. Inspect data using head(), tail(), describe(), info()
3	Perform feature scaling and encoding	Prepare data for ML algorithms	<ol style="list-style-type: none"> 1. Apply normalization/standardization 2. Perform one-hot encoding
4	Visualize dataset features using Python libraries	Represent data visually	<ol style="list-style-type: none"> 1. Use matplotlib/seaborn to plot bar, line, scatter charts 2. Label and style plots
5	Apply Linear Regression for predictive modeling	Predict continuous values	<ol style="list-style-type: none"> 1. Fit Linear Regression model 2. Predict output values 3. Plot regression line
6	Implement Logistic Regression for binary classification	Predict binary outcomes	<ol style="list-style-type: none"> 1. Fit Logistic Regression model 2. Evaluate predictions
7	Classify data using k-Nearest Neighbors	Classify new data based on nearest neighbors	<ol style="list-style-type: none"> 1. Train k-NN model 2. Predict class labels
8	Construct a Decision Tree for classification	Visual decision rules	<ol style="list-style-type: none"> 1. Train Decision Tree 2. Visualize decision paths
9	Apply Naive Bayes for classification	Classify based on probabilities	<ol style="list-style-type: none"> 1. Train Naive Bayes model 2. Measure accuracy

10	Implement k-Means clustering	Group unlabeled data	<ol style="list-style-type: none"> 1. Apply k-Means algorithm 2. Visualize clusters
11	Evaluate models using cross-validation	Assess generalization ability	<ol style="list-style-type: none"> 1. Use train-test split 2. Apply K-Fold validation
12	Install and verify deep learning frameworks	Prepare deep learning environment	<ol style="list-style-type: none"> 1. Install TensorFlow/Keras 2. Run test script
13	Perform binary classification using ANN	Apply ANN to two-class problems	<ol style="list-style-type: none"> 1. Build binary ANN 2. Evaluate model
14	Build an Artificial Neural Network for multi-class classification	Implement basic ANN	<ol style="list-style-type: none"> 1. Define ANN layers 2. Compile and train ANN
15	Apply dropout and batch normalization	Prevent overfitting in ANN	<ol style="list-style-type: none"> 1. Add dropout layers 2. Add batch normalization
16	Use a pre-trained model for image classification	Apply transfer learning	<ol style="list-style-type: none"> 1. Load pre-trained model 2. Classify sample images
17	Implement BFS and DFS	Explore graphs systematically	<ol style="list-style-type: none"> 1. Implement BFS 2. Implement DFS
18	Implement Greedy Best-First Search	Use heuristic-based search	<ol style="list-style-type: none"> 1. Define heuristic 2. Implement search
19	Create a simple rule-based system	Implement if-else based reasoning	<ol style="list-style-type: none"> 1. Define rules 2. Implement inference
20	Tokenize and remove stopwords from text	Preprocess text for NLP	<ol style="list-style-type: none"> 1. Tokenize text 2. Remove stopwords
21	Perform sentiment analysis using keyword matching	Classify text sentiment	<ol style="list-style-type: none"> 1. Define positive/negative word lists 2. Analyze sentiment

22	Detect objects or faces in images	Apply basic computer vision	<ol style="list-style-type: none"> 1. Load Haar cascade 2. Detect and display bounding boxes
----	-----------------------------------	-----------------------------	--

**TABLE SPECIFYING THE SCOPE OF SYLLABUS TO BE COVERED

PROJECT WORK

Course code	Course Title	No. Of periods/ week	Total No of Periods/ Semester	FA Marks	SA Marks	Credits
26CM509P	PROJECT WORK	6	90	40	60	2

COURSE OBJECTIVES

Upon completion of the course the student shall be able to

(i)	Enhance the knowledge by innovative learning and get the skills through the teamwork
(ii)	Provide with the opportunity to synthesize knowledge from various areas of learning
(iii)	Critically and creatively apply it to real life situations

COURSE OUTCOMES

CO1	CM509.1	Organising teamwork.
CO2	CM509.2	Innovative learning.
CO3	CM509.3	Apply theoretical knowledge to practical work situations.
CO4	CM509.4	Practice technical project reports preparation and presentation.

LEARNING OUTCOMES

1. Problem solving and Critical Thinking

- 1.1 Identify different works to be carried out in the Project
- 1.2 Collect data relevant to the project work
- 1.3 Carryout need survey
- 1.4 Select the most efficient method from the available choices based on preliminary investigation
- 1.5 Design the required elements of the project work as per standard practices
- 1.6 Prepare the working modules / equipment required for the project work
- 1.7 Estimate the cost of project, technological need, computer skills, materials and other equipment
- 1.8 Prepare the plan and schedule of starting time and sequence of operations to be carried out at various stages of the project work in detail
- 1.9 Prepare critical activities at various stages of the project work
- 1.10 Test various conditions with different electrical input parameter if required
- 1.11 Implement project work and record the results.
- 1.12 Draw Appropriate Conclusions
- 1.13 Preparation of project report.

2. Communication

- 2.1 Communicate effectively.
- 2.2 Present Ideas Clearly.
- 2.3 Present Ideas Coherently.
- 2.4 Report writing.

3. Collaboration

- 3.1. Discuss the ideas.
- 3.2. Coordinate with team members
- 3.3. Team work in accomplishing the task.

4. Independent Learning

- 4.1. Involves in the group task.
- 4.2. Analyse the appropriate actions.
- 4.3. Compares merits and demerits
- 4.4. Analyse the activities for sustainability
- 4.5. Analyse the activities to ensure ethics

5. Ethics

- 5.1 Give respect and value to all classmates, educators, colleagues, and others
- 5.2 Understand the health, safety, and environmental impacts of their work
- 5.3 Recognize the constraints of limited resources
- 5.4 Develop sustainable products and processes that protect the health, safety, and prosperity of future generations
- 5.5 Maintain integrity in all conduct and publications and give due credit to the contributions of others

CO-PO/PSO MAPPING

CO/PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2	PSO3

CO4						3		3		2
Average	2	2	3	2	2	3	1	3	2	2

3=strongly mapped, 2=moderately mapped and 1=slightly mapped

Note:

The gaps in CO and PO mapping will be met by one or more appropriate activities from the following:

- (i) Assignments (ii) Tutorials (iii) Seminars (iv) Guest Lectures (v) Group Discussions (vi) Quiz (vii) Industry Visits (viii) Tech Fest (ix) Mini Projects (x) Library Visits.

COURSE CONTENT

Suggested Project Domains & Ideas (Aligned with C26 Curriculum)

Projects can be chosen from the following domains. These categories are directly linked to the subjects you have studied, allowing you to apply your specialized knowledge.

1. Full-Stack Web and Database Applications

- Relevant Subjects: WEB TECHNOLOGIES, DBMS, OOP THROUGH JAVA, PYTHON PROGRAMMING, UI/UX DESIGN.
- Project Ideas:

- E-commerce Platform: Develop a complete online store with user accounts, product catalogs, a shopping cart, and an integrated payment gateway.
- Online Learning Management System (LMS): Create a portal for students and teachers to manage courses, submit assignments, and track progress.
- Real-time Polling/Survey Application: Build a web app where users can create polls and see live results, similar to Mentimeter or Kahoot!
- Hostel or Mess Management System: An application for managing student accommodations, fee payments, and meal preferences.

2. AI/ML and Data Science Projects

- Relevant Subjects: FUNDAMENTALS OF AIML, AI USING PYTHON, DATA STRUCTURES THROUGH PYTHON.
- Project Ideas:
 - Student Performance Predictor: Use college data to build a model that predicts student academic outcomes, helping identify at-risk students early.
 - College Admissions Chatbot: Develop an NLP-based chatbot to answer prospective students' questions about courses, fees, and campus life.
 - Sentiment Analysis of Social Media: Create a tool to analyze public sentiment on a specific topic (e.g., a new policy or event) by scraping data from social media.
 - Handwritten Digit or Object Recognizer: Build and train a neural network to recognize handwritten text or objects in images.

3. Mobile and Android Applications

- Relevant Subjects: ANDROID PROGRAMMING, JAVA, MOBILE COMMUNICATIONS, UI/UX DESIGN.
- Project Ideas:
 - Campus Navigator App: An app that provides indoor maps and navigation for the college campus, helping new students find labs, classrooms, and offices.
 - Event Notification App: A mobile application for the college that sends real-time notifications about events, workshops, and placement drives.
 - Personal Finance Tracker: Develop an Android app to help users track their income and expenses, with features for budgeting and generating reports.
 - Fitness and Wellness App: An app to track daily physical activity, set fitness goals, and provide simple workout routines.

4. Internet of Things (IoT) and Embedded Systems

- Relevant Subjects: IoT, COMPUTER ORGANIZATION, DIGITAL ELECTRONICS.
- Project Ideas:
 - Smart Campus System: Design an IoT network to monitor and control classroom lights and fans based on occupancy, saving energy.

- Automated Irrigation System: Create a system using soil moisture sensors to automatically water plants, with a dashboard to monitor water usage.
- * Smart Parking Solution: Develop a system using sensors to detect empty parking spots and an app to guide drivers to them.
- Environment Monitoring Station: Build a device that measures air quality (PM2.5, CO2) and temperature, and uploads the data to a cloud platform for analysis.

5. Networking and Cyber Security Projects

- Relevant Subjects: COMPUTER NETWORKS, CYBER SECURITY, LINUX PRACTICALS, TROUBLESHOOTING OF COMPUTER NETWORKS.
- Project Ideas:
 - Phishing Website Detector: Create a browser extension or tool that analyzes URLs and web page content to detect and warn users about potential phishing scams.
 - Secure File Transfer Utility: Develop a client-server application for transferring files securely over a network using encryption algorithms.
 - Network Intrusion Detection System (NIDS): Design a basic NIDS that monitors network traffic for suspicious patterns or signatures of common attacks.
 - Folder/File Encryption Tool: A desktop utility that allows users to encrypt and password-protect their sensitive files and folders.

Weightage of marks for Assessment of Learning Outcomes of Project work

S.No	Item	Marks
1	Internal Marks Completion of Assigned task in the group/individual to complete the project	40
2	End Exam Marks: i) Demonstration of skill relevant to the project (30) ii) Project Report (20) iii) Viva Voce (10)	60
Total marks		100

- Each group should have a project guide assigned by the HOS/Principal.
- End Examination assessment shall be done by HOS, external examiner and faculty supervisor who guided the students during project work.
- The external examiner shall be from an industry/organisation/Head of Section of other polytechnic/Senior faculty of other polytechnic.

Internal Assessment Guidelines:

- First Review: To be conducted after the completion of 4 weeks.
- Second Review: To be conducted after the completion of 10 weeks.
- Third Review: To be conducted after the completion of 14 weeks.

SCHEME OF EVALUATION
Internal marks

Review 1 (10 Marks)	Review 2 (15 Marks)	Review 3 (15 Marks)
COMMITTEE: 5 Marks PROJECT GUIDE: 5 Marks	COMMITTEE: 7.5 Marks PROJECT GUIDE: 7.5 Marks	COMMITTEE: 7.5 Marks PROJECT GUIDE: 7.5 Marks

DIPLOMA IN COMPUTER SCIENCE AND ENGINEERING
SCHEME OF INSTRUCTIONS AND EXAMINATIONS
VI-SEMESTER

Course Code	Course Title	Duration	FA Marks	SA Marks	Credits
26CM601I	INDUSTRIAL TRAINING	Semester	240	60	20

LEARNING OUTCOMES (In Industry)

The student shall be able to display the following skill sets

- Apply knowledge and skill already learnt in the institution.
- Acquire the required skills of analysis, design and development, testing, verification and Validation.
- Acquire skills of deployment and distribution of the product.
- Involve in product design, development, and quality testing and maintenance production by Exhibiting the strength, teamwork spirit and self-confidence
- Prepare product documents like user manual, installation guide and operational manuals.
- Perform the activities of deploying product at customer site and training the end-user.
- Maintaining the system at user site (Post product services)

S.No	Unit Title	Duration	Cos Mapped
1	Application of Knowledge acquired.	Semester	CO1
2	Skill Acquirement.		CO2
3	Participate in product development.		CO3
4	Perform onsite service.		CO4
	Total		

COURSE OUTCOMES

CO1	CM601.1	Apply knowledge and skill already learnt in the institution.
CO2	CM601.2	Acquire the required skills of analysis, design and development, testing, verification and validation, deployment and distribution of the product.
CO3	CM601.3	Involve in product design, development, quality testing and maintenance production by exhibiting the strength, teamwork spirit and self-confidence
CO4	CM601.4	Prepare product document, gain the skills in deploying product at customer site, training the end user, maintaining the system.

**DIPLOMA IN COMPUTER SCIENCE AND ENGINEERING
SCHEME OF INSTRUCTIONS AND EXAMINATIONS
VI-SEMESTER**

Assessment No	Upon completion of	Conducted by	Based on	Max Marks
Pre-Assessment	15 Days to 30 Days from the commencement of training	Mentor faculty member visits the industry one month after commencement of training and will submit a detailed report to the principal outlining the each candidate's details and observed work culture		
1 (Formative Assessment)	Mid Semester Assessment (after three months - at industry)	1.The mentor faculty member concerned 2. Industry Training In charge	Learning outcomes as given in the scheme of assessment, for Industrial Training	120
	COURSE-I	Registration at Nptel/Swayam/Moocs/course era/lectera/caltech/NASSCOM/AP SKILL DEVELOPMENT/oxford/hackerrank/udemy...etc.,	1.Learning 2.Mini Application development 3.Report preparation	
2 (Formative Assessment)	Last month of training (at industry)	1. The mentor faculty member concerned 2. Industry Training In charge	Learning outcomes as given in the scheme of assessment, for Industrial Training	120
	COURSE-II	Registration at Nptel/Swayam/Moocs/course era/lectera/caltech/NASSCOM/AP SKILL DEVELOPMENT/oxford/hackerrank/udemy...etc.,	1.Learning 2.Mini Application development 3.Report preparation	
3 (Summative Assessment)	After completion of the training (at Institution)	1.The faculty member concerned, 2.HoD concerned 3.An external examiner from Industry	1.Demonstration of any one of the skills listed in learning outcomes	30
			2.Training Report	20
			3. Viva Voce	10
TOTAL				300

The Industrial Training shall carry maximum 300 marks. Pass mark is 50% in first and second assessment put together and also 50% in final summative assessment at the institution level.

**Weightage of marks for Assessment of Learning Outcomes during first and second assessment
(at industry)**

Sl. No	Learning Outcome	Max Marks Allotted For first assessment	Max Marks Allotted For second assessment
1	Apply knowledge and skill already learnt in the institution.	50	10
2	Acquire the required skills of analysis, design and development, testing, verification and validation , deployment and distribution of the product.	70	30
3	Involve in product design, development, quality testing and maintenance production by exhibiting the strength, teamwork spirit and self-confidence	-	40
4	Prepare product document, gain the skills in deploying product at customer site, training the end user, maintaining the system.	-	40
	Total	120	120

During assessment the performance of the students shall be assessed in those skills in which the student has been trained and be awarded the marks as per the weightage assigned as above. In case the student has undergone training in a few skillsets then the total marks obtained shall be raised to 120marks for the given assessment i.e. either assessment 1 or 2. However the performance of the student shall be assessed at the most skill sets listed above but not less than three skillsets.

Illustration for First assessment:

If the student has undergone training in only in 2skillsets (namely 1 for 50 marks, and 2 for 40 marks) out of 3(namely 1 for 50marks,2 for 40marks and 3 for 30marks) in First assessment and marks awarded during assessment is 60 out of 90marks, then the marks of 60 shall be enhanced to 120 proportionately as $(60/90) * 120 = 80$.

Illustration for second assessment:

If the student has undergone training in only in 5 skillsets (namely 1 for 10 marks,2 for 20 marks,3 for10 marks,4 for 25 marks,5 For 15 marks) out of 7(namely 1 for 10 marks,2 for 20 marks,3 For 10 marks,4 for 25 marks,5 For 15 marks,6 for 25 marks and 7 for15 marks) in second assessment and marks awarded during assessment is 65 out of 80 marks, then the marks of 65 shall be enhanced to 120 proportionately as $(65/80) * 120 = 97.5 = \text{rounded to } 98$.

GUIDELINES FOR INDUSTRIAL TRAINING OF DIPLOMA IN ENGINEERING PROGRAMME

Duration of the training:6months.

Eligibility: The as per SBTET norms

Training Area: Students can be trained in either in In-house/Industry in the areas of

Application Software Development / system software Development / firmware development/ Mobile application development/ Database applications / Web development/ IoT application development / smart technologies / Hardware interfacing/ Networking.

The candidate shall put a minimum of 90% attendance during Industrial Training.

If the student fails to secure 90% attendance during industrial training, the student shall reappear for 6 months industrial training.

Formative assessment at industry level shall be carried out by the Mentor from of the industry, where the student is undergoing training and the faculty in charge (Guide)from the concerned section in the institution.

The Industrial training shall carry 300 marks and pass marks is 50% in assessments at industry (first and second assessment) and final summative assessment at institution level put together i.e. 150 marks out of 300 marks.

If the student fails to secure 50% marks in final summative assessment at institution level, the student should reappear for final summative assessment in the subsequent board examination.

Final summative assessment at institution level is done by a committee including 1. Head of the section (of concerned discipline ONLY), 2. External examiner from an industry and 3. Faculty member who assessed the student during Industrial Training as members.
